

**MINUTES OF PLANNING COMMITTEE MEETING OF THE COUNCIL
OF THE CITY OF RANDWICK HELD ON TUESDAY, 11 AUGUST 2009
AT 6:25PM**

Present:

North Ward	- Councillors K Smith, P Tracey & M Woodsmith
South Ward	- Councillors R Belleli, C Matthews & A White
East Ward	- Councillors M Matson (Chairperson)
West Ward	- Councillors B Hughes & J Procopiadis
Central Ward	- Councillors A Andrews & T Seng & G Stevenson

Officers present:

General Manager	Mr R Brownlee
Director City Services	Mr J Frangoples
Director City Planning	Ms S Truvert
Director Governance & Financial Services	Mr G Banting
Acting Manager Development Assessment	Mr R Quinton
Senior Administrative Coordinator	Ms J Hartshorn

The meeting was adjourned at 6.25pm and was resumed at 6.48pm.

Apologies/Granting of Leave of Absences

Apologies were received from Councillors Bowen, Nash and Notley-Smith.

RESOLVED: (Hughes/Woodsmith) that the apologies received from Councillors Bowen, Nash and Notley-Smith be accepted and leave of absence from the meeting be granted.

Confirmation of the Minutes

**CONFIRMATION OF THE MINUTES OF THE PLANNING COMMITTEE MEETING
HELD ON TUESDAY 14 JULY 2009**

PL61/09

RESOLUTION: (Woodsmith/Smith) that the Minutes of the Planning Committee Meeting held on Tuesday 14 July 2009 (copies of which were circulated to all Councillors) be and are hereby confirmed as a correct record of the proceedings of that meeting.

Declarations of Pecuniary and Non-Pecuniary Interests

- (a) Cr Smith declared a non-significant non-pecuniary interest in Item D45/09 (10 Eurimbla Avenue, Randwick) as he knows one of the objectors as an acquaintance.
- (b) Cr Smith declared a pecuniary interest in Item D49/09 (73-109 Belmore Road, Randwick) as he has a work related interest in TABs.
- (c) Cr Stevenson declared a non-significant non-pecuniary interest in Item D49/09 (73-109 Belmore Road, Randwick) as he has done work previously for the TAB Corporation.
- (d) Cr Woodsmith declared a non-significant non-pecuniary interest in Item 46/09 (272 Arden Street, Coogee) as she owns a property and lives in Arden Street in close proximity to the application.

Address of Council by Members of the Public

Prior to consideration of the Agenda by the Committee, deputations were received in respect of the following matters:

D44/09 28 FRENCH STREET, MAROUBRA

For Bryan Bass - Architect for applicant

D45/09 10 EURIMBLA AVENUE, RANDWICK

Against Elizabeth Temple - objector

For Dr John Feller

(Note: Dr Feller addressed the Committee later in the meeting, see page 20 of these Minutes)

D46/09 272 ARDEN STREET, COOGEE

For Statila Pyke - applicant

D47/09 2 SECOND AVENUE, MAROUBRA

Against Gerard Clifton - objector

For Larissa Andelman - applicant

D49/09 73-109 BELMORE ROAD, RANDWICK

For Robert Stark - Planning Consultant for applicant

The meeting was adjourned at 7.28pm and was resumed at 7.45pm.

Urgent Business

Development Application Reports

D44/09 Development Application Report - 28 French Street, Maroubra (DA/275/2009)

PL62/09

RESOLUTION: (Andrews/Hughes) that Council, as the consent authority, grants development consent under Sections 80 and 80A of the Environmental Planning and Assessment Act 1979, as amended, to Development Application No. DA/275/2009 for demolition of existing structures on site and construction of a detached dwelling house incorporating 4 levels of floor space with garage, terraces and balconies, retaining walls and site landscaping, at No. 28 French Street, Maroubra, subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the Environmental Planning and Assessment Act 1979 and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the following plans:

Plan Number	Dated	Received	Prepared By
0316-DA100(J)	25/06/09	26 June 2009	Alex Popov & Associates
0316-DA102(J)	25/06/09	26 June 2009	
0316-DA103(J)	25/06/09	26 June 2009	
0316-DA104(J)	25/06/09	26 June 2009	
0316-DA105(J)	25/06/09	26 June 2009	
0316-DA106(J)	25/06/09	26 June 2009	
0316-DA107(J)	25/06/09	26 June 2009	
0316-DA114(J)	01/07/09	26 June 2009	

the application form and any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:

2. The colours, materials and finishes of the external surfaces to the building are to be consistent with the submitted Finishes Board, numbered 0316-DA120, undated, prepared by Alex Popov & Associates, and received by Council on 26 June 2009.
3. The south-eastern wall to the rainwater tank storage areas at the "entry level" **shall be setback a minimum distance of 6000mm from the French Street boundary** of the subject site. The additional setback areas shall be utilized for soft landscaping/planting purposes. Details demonstrating compliance with the above requirement shall be incorporated in the Construction Certificate documentation to the satisfaction of the Principal Certifying Authority.
4. The windows attached to the stairwell areas on the south-western elevation shall be constructed with obscured/frosted/translucent glazing. Details of compliance are to be incorporated in the Construction Certificate documentation.
5. There must be no encroachment of the structure/s onto Council's road reserve, footway or public place, unless written permission has been obtained from the Council beforehand.
6. Street numbering must be provided to the premises in a prominent position, in accordance with the Australia Post guidelines and AS/NZS 4819 (2003) to the satisfaction of Council, **prior to an occupation certificate being issued** for

7. The finished ground levels external to the building are to be consistent with the development consent and are not to be raised (other than for the provision of approved paving or the like on the ground) without the written consent of Council.
8. Eaves, gutters, hoods and similar structures or attachments are required to be setback from the side boundaries of the allotment a minimum distance of 500mm and details of compliance are to be included in the construction certificate details.
9. Lighting to the premises shall be designed so as not to cause a nuisance to nearby residents.
10. No cooking facilities or sanitary fittings other than those indicated on the approved plans are to be installed in the premises without the prior written consent of the Council.
11. Metal roof sheeting is to be painted or colour bonded to minimize reflection and to be sympathetic and compatible with the building and surrounding environment.
12. Any gate opening shall be constructed so that the gate, when hung, will be fitted in such a manner that it will not open over the footway on French Street or a public place.

The following condition is imposed to satisfy the requirements of the Sydney Water Corporation:

13. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition is applied to meet additional demands for public facilities:

14. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, the following monetary levy must be paid to Council.

Category	Cost	Applicable Levy	S94A Levy
Development cost more than \$200,000	\$2,292,919	1.0%	\$22,929.19

The levy must be paid in cash, bank cheque or by credit card prior to a

construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

15. In accordance with Section 80A (11) of the Environmental Planning and Assessment Act 1979 and Clause 97A of the Environmental Planning and Assessment Regulation 2000, it is a prescribed condition that all of the required commitments listed in the relevant BASIX Certificate for this development are fulfilled.
16. In accordance with the provisions of the Environmental Planning & Assessment Regulation 2000, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

17. The following provisions are to be implemented in accordance with the relevant BASIX Certificate and details are to be included in the Construction Certificate documentation (as applicable), to the satisfaction of the Certifying Authority:
 - Stormwater management (i.e. rainwater tanks)
 - Water efficiency (i.e. triple A rated taps and showers, dual flush toilets and water re-use)
 - Landscaping provisions
 - Thermal comfort (i.e. construction materials, glazing and insulation)
 - Energy efficiency (i.e. cooling & heating provisions and hot water systems)
18. In accordance with Clause 154B of the Environmental Planning & Assessment Regulation 2000, a Certifying Authority must not issue a final Occupation Certificate for this development, unless it is satisfied that each of the required BASIX commitments has been fulfilled.

Relevant documentary evidence of compliance with the BASIX commitments is to be forwarded to the Council upon issuing the final Occupation Certificate.

The following condition has been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

19. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so

as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

20. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

21. All new building work must be carried out in accordance with the provisions of the **Building Code of Australia** (BCA), in accordance with Clause 98 of the *Environmental Planning and Assessment Regulation 2000*.

22. **Prior to the commencement of any building works, a construction certificate** must be obtained from the Council or an accredited certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans & specifications and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

23. **Prior to the commencement of any building works**, the person having the benefit of the development consent must:

- i) appoint a *Principal Certifying Authority* for the building work, and
- ii) appoint a *principal contractor* for the building work, or in relation to residential building work, obtain an *owner-builder* permit in accordance with the requirements of the Home Building Act 1989, and notify the *Principal Certifying Authority* and Council accordingly in writing, and
- iii) unless the person having the benefit of the consent is the *principal contractor* (i.e. *owner-builder*), notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*, and
- iv) give at least two days notice to the Council, in writing, of the persons intention to commence building works.

In relation to residential building work, the principal contractor must be the holder of a contractor licence, in accordance with the provisions of the Home Building Act 1989.

24. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of

construction to be inspected in accordance with section 81A (2) (b1) (ii) of the Environmental Planning & Assessment Regulation 2000 and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

Documentary evidence of the building inspections carried out and details of compliance with Council's consent is to be maintained by the *Principal Certifying Authority*. Details of *critical stage inspections* carried out and copies of certification relied upon must also be forwarded to Council with the *occupation certificate*.

The *principal contractor* or *owner-builder* (as applicable) must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's "Notice of Critical Stage Inspections"*, are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

25. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable)
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
26. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building work** encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The relevant requirements of the Environmental Planning & Assessment Act 1979 and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

27. **Prior to the issuing of an interim or final occupation certificate**, a statement is required to be obtained from the Principal Certifying Authority, which confirms that the development is not inconsistent with the development consent and the relevant conditions of development consent have been satisfied.

Details of *critical stage* inspections carried out by the principal certifying authority together with any other certification relied upon must also be provided to Council with the occupation certificate.

28. In accordance with clause 98 of the Environmental Planning and Assessment Regulation 2000, it is a prescribed condition, that in the case of residential building work, a contract of insurance must be obtained and in force, in accordance with the provisions of the Home Building Act 1989.

Where the work is to be done by a licensed contractor, excavation or building

work must not be carried out unless the Principal Certifying Authority (PCA):

- has been informed in writing of the licensee's name and contractor number; and
- is satisfied that the licensee has complied with the insurance requirements of Part 6 of the *Home Building Act 1989*, or

Where the work to be done by any other person (i.e. an *owner-builder*), excavation or building work must not be carried out unless the Principal Certifying Authority:

- has been informed of the person's name and *owner-builder* permit number, or
- has been given a declaration, signed by the owner of the land that states that the market cost of the labour and materials involved in the work does not exceed \$5,000.

Details of the principal building contractor and compliance with the provisions of the *Home Building Act 1989* (i.e. *Details of the principal licensed building contractor and a copy of the Certificate of Insurance*) are to be submitted to Council **prior to the commencement of works**, with the notice of appointment of the PCA / notice of intention to commence building work.

29. The required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

30. Smoke alarms are required to be installed in each Class 1 building or residential dwelling in accordance with the relevant provisions of Part 3.7.2 of the B.C.A. – Housing Provisions.

Smoke alarms must comply with AS3786 – Smoke alarms and be connected to the consumer mains electric power supply and provided with a battery back-up.

The smoke alarms are to be installed in suitable locations on or near the ceiling, in any storey containing bedrooms; located between each part of the dwelling containing the bedrooms and the remainder of the dwelling, or where bedrooms are served by a hallway, the smoke alarms are to be located in that hallway; and smoke alarms are to be installed in any other storey not containing bedrooms, to the satisfaction of the certifying authority.

Smoke alarms are not to be located in 'dead-air-spaces', in the corner junction of walls and ceilings between exposed rafters/joists or at the apex of raked ceilings, as detailed in Part 3.7.2 of the Building Code of Australia – Housing Provisions.

Details of compliance with the provisions of the Building Code of Australia must be included in the plans / specification for the **construction certificate**.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

31. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the following regulations:
- The requirements and Guidelines of WorkCover NSW
 - Occupational Health and Safety Act 2000
 - Australian Standard 2601 (2001) – Demolition of Structures
 - The Protection of the Environment Operations Act 1997
 - Protection of the Environment Operations (Waste) Regulation 1996.
32. A Demolition Work Plan must be prepared for the development in accordance with Australian Standard AS2601-2001, Demolition of Structures.

The Work Plan must include the following information (as applicable):

- The name, address, contact details and licence number of the Demolisher /Asbestos Removal Contractor
- Details of hazardous materials, including asbestos
- Method/s of demolition and removal of asbestos
- Measures and processes to be implemented to ensure the health & safety of workers and community
- Measures to be implemented to minimise any airborne asbestos and dust
- Methods and location of disposal of any asbestos or other hazardous materials
- Other relevant details, measures and requirements to be implemented as identified in the Asbestos Survey
- Date the demolition and removal of any asbestos materials will commence

The Demolition Work Plan must be submitted to Council and the Principal Certifying Authority (PCA) if the Council is not the PCA, not less than two (2) working days **before commencing any demolition works** involving asbestos products or materials. A copy of the Demolition Work Plan must also be maintained on site and be made available to Council officers upon request.

Note *it is the responsibility of the persons undertaking demolition work to obtain the relevant WorkCover licences and permits.*

33. Any work involving the demolition, storage and disposal of asbestos products and materials must be carried out in accordance with the following requirements:
- a. Relevant Occupational Health & Safety legislation and WorkCover NSW requirements
 - b. Randwick City Council's Asbestos Policy (adopted 13 September 2005)
 - c. A WorkCover licensed demolition or asbestos removal contractor must undertake removal of more than 10m² of bonded asbestos (or as otherwise specified by WorkCover or relevant legislation). Removal of friable asbestos material must only be undertaken by contractor that holds a current friable asbestos removal licence.
 - d. On sites involving the removal of asbestos, a sign must be clearly displayed in a prominent visible position at the front of the site, containing the words 'DANGER ASBESTOS REMOVAL IN PROGRESS' and include details of the licensed contractor.
 - e. Asbestos waste must be stored, transported and disposed of in

compliance with the Protection of the Environment Operations Act 1997 and the Protection of the Environment Operations (Waste) Regulation 1996.

- f. A Clearance Certificate or Statement, prepared by a suitably qualified person (ie an occupational hygienist, licensed asbestos removal contractor, building consultant, architect or experienced licensed building contractor), must be provided to Council and the Principal certifying authority upon completion of the asbestos related works which confirms that the asbestos material have been removed appropriately and the relevant conditions of consent have been satisfied.

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development Section or a copy can be obtained from Council's Customer Service Centre.

34. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Retaining walls, shoring, or piling must be designed and installed in accordance with appropriate professional standards and the relevant requirements of the Building Code of Australia and Australian Standards. Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

35. A dilapidation report prepared by a professional engineer, accredited building surveyor or other suitably qualified person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:

- new dwellings or additions to dwellings sited up to the property boundaries (including additions to a semi-detached dwelling),
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the zone of influence of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- as otherwise required by the Principal Certifying Authority.

The report (including photographs) is to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works.

36. The adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

If an excavation associated with the erection or demolition of a building

extends below the level of the base of the footings of any building located on an adjoining allotment of land, the person causing the excavation must:

- preserve and protect the building /s on the adjoining land from damage; and
- effectively support the excavation and building; and
- at least seven (7) days before excavating below the level of the base of the footings of a building on an adjoining allotment of land (including a public road or public place), give notice of the intention and particulars of the works to the owner of the adjoining land.

Notes

- *This consent and condition does not authorise any trespass or encroachment upon any adjoining or supported land or building whether private or public. Where any underpinning, shoring, soil anchoring (temporary or permanent) or the like is proposed to be carried out upon any adjoining or supported land, the principal contractor or owner-builder must obtain:*
 - a) *the consent of the owners of such adjoining or supported land to trespass or encroach, or*
 - b) *an access order under the Access to Neighbouring Land Act 2000, or*
 - c) *an easement under section 88K of the Conveyancing Act 1919, or*
 - d) *an easement under section 40 of the Land & Environment Court Act 1979, as appropriate.*
- *Section 177 of the Conveyancing Act 1919 creates a statutory duty of care in relation to support of land. Accordingly, a person has a duty of care not to do anything on or in relation to land being developed (the supporting land) that removes the support provided by the supporting land to any other adjoining land (the supported land).*

37. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and between 8.00am to 5.00pm on Saturdays and all building activities are strictly prohibited on Sundays and Public Holidays.

In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like, is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and loss of amenity to nearby residents.

38. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.

Noise and vibration from any rock excavation machinery and pile drivers (or the like) must be minimised by using appropriate plant and equipment and silencers and a construction noise and vibration minimisation strategy, prepared by a suitably qualified consultant is to be implemented during the works, to the satisfaction of the Principal Certifying Authority.

39. A Registered Surveyor's check survey certificate or *compliance certificate* is to be forwarded to the principal certifying authority (*and a copy is to be forwarded to the Council, if the Council is not the principal certifying authority*), detailing compliance with Council's approval at the following stage/s of construction:

- a) Prior to construction of the footings or first completed floor slab (prior to the pouring of concrete), showing the area of the land, building and boundary setbacks and levels of the building.

- b) On completion of the erection of the building showing the area of the land, the position of the building and boundary setbacks and verifying the building has been constructed at the approved levels.
40. Temporary toilet facilities are to be provided, at or in the vicinity of the work site throughout the course of demolition and construction, to the satisfaction of WorkCover NSW and the toilet facilities must be connected to a public sewer or other sewage management facility approved by Council.
41. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

Temporary site fences are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

The public safety provisions and temporary fences must be in place **prior to the commencement of any demolition, excavation or building works** and be maintained throughout construction.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

42. A Construction Site Management Plan is to be submitted to and approved by the principal certifying authority **prior to the commencement** of demolition, excavation or building works. The site management plan must include the following measures, as applicable to the type of development:
- location and construction of protective fencing / hoardings to the perimeter of the site;
 - location of site storage areas/sheds/equipment;
 - location of building materials for construction;
 - provisions for public safety;
 - dust control measures;
 - site access location and construction
 - details of methods of disposal of demolition materials;
 - protective measures for tree preservation;
 - provisions for temporary sanitary facilities;
 - location and size of waste containers/bulk bins;
 - details of proposed sediment and erosion control measures;
 - construction noise and vibration management;
 - construction traffic management provisions.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain adequate levels of public health and safety. A copy of the approved Construction Site Management Plan must be maintained on site and be made

available to Council officers upon request.

43. During construction stages, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by the NSW Department of Housing.

Details of the proposed sediment control measures are to be detailed in the Construction Site Management Plan which must be submitted to and approved by the principal certifying authority **prior to the commencement of any site works**. The sediment and erosion control measures must be implemented prior to the commencement of any site works and be maintained throughout construction. A copy of the approved details must be forwarded to the Council and a copy is to be maintained on-site and be made available to Council officers upon request.

Details of proposed sediment and erosion control measures shall include; a site plan; indicating the slope of land, access points & access control measures, location and type of sediment & erosion controls, location of existing vegetation to be retained, location of material stockpiles and storage areas, location of building operations and equipment, methods of sediment control, details of drainage systems and details of existing and proposed vegetation.

44. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:
- a. Building materials, sand, soil, waste materials, construction equipment or other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
 - b. Stockpiles of soil, sand, aggregate or other materials must not be located on any footpath, roadway, nature strip, drainage line or any public place and the stockpiles must be protected with adequate sediment control measures.
 - c. Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
 - d. A warning sign for soil and water management must be displayed in a prominent position on the building site, visible to both the public and site workers. The sign must be displayed throughout the construction period. Copies of a suitable warning sign are available at Council's Customer Service Centre for a nominal fee.
 - e. Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.
 - f. Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction prior to occupation or finalisation of the development.

The following conditions are applied to ensure compliance with the

Swimming Pools Act 1992 and to maintain public safety and amenity:

45. Swimming pools are to be provided with childproof fences and self-locking gates, in accordance with the *Swimming Pools Act 1992* and regulations.

The swimming pool is to be surrounded by a fence having a minimum height of 1.2m, that separates the pool from any residential building situated on the premises and from any place (whether public or private) adjoining the premises; and that is designed, constructed and installed in accordance with AS 1926-1986.

Gates to pool area shall be a maximum width of 1 metre, and be self-closing and latching; the gate is required to open outwards from the pool area and prevent a small child opening the gate or door when the gate or door is closed.

Temporary pool safety fencing is to be provided pending the completion of all building work and the pool must not be filled until a fencing inspection has been carried out and approved by the principal certifying authority.

A sign shall be erected in a prominent position in the immediate vicinity of the swimming pool, in accordance with the document entitled "Policy Statement No.9.4.1: Guidelines for the Preparation of Posters on Resuscitation", published in 1985 by the Australian Resuscitation Council and the sign must bear a notice that contains the words "YOUNG CHILDREN SHOULD BE SUPERVISED WHEN USING THIS SWIMMING POOL", together with details of resuscitation techniques (for adults, children and infants) set out in accordance with the document entitled "Cardio Pulmonary Resuscitation" published by the Australian Resuscitation Council.

46. Swimming pools are to be designed, installed and operated in accordance with the following general requirements: -

- a. Backwash of the pool filter and other discharge of water is to be drained to the sewer in accordance with the requirements of the Sydney Water Corporation; and
- b. All pool overflow water is to be drained away from the building and adjoining premises, so as not to result in a nuisance or damage to premises; and
- c. Water recirculation and filtrations systems are required to comply with AS 1926.3 - 2003: Swimming Pool Safety - Water Recirculation and Filtration Systems; and
- d. Pool plant and equipment is to be enclosed in a sound absorbing enclosure or installed within a building, to minimise noise emissions and possible nuisance to nearby residents; and
- e. The pool plant and equipment shall not be operated during the following hours if the noise emitted can be heard within a habitable room in any other residential premises, or, as otherwise specified in relevant Noise Control Regulations:
 - i. before 8.00am or after 8.00pm on any Sunday or public holiday; or
 - ii. before 7.00am or after 8.00pm on any other day.

47. Written notification must be provided to Council advising of the installation and completion of the Swimming Pool (or Spa Pool), to satisfy the requirements of the *Swimming Pools Act 1992*, **prior to issuing an Occupation Certificate.**

Council's "Notification & Registration of a Swimming Pool" form must be completed and forwarded to Council prior to any Occupation Certificate being issued for the pool.

48. The operation of all plant and equipment shall not give rise to an 'offensive noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the plant and equipment shall not give rise to an $L_{Aeq, 15 \text{ min}}$ sound pressure level at any affected premises that exceeds the background $L_{A90, 15 \text{ min}}$ noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A) in accordance with relevant NSW Department of Environment & Conservation Noise Control Guidelines.

The following conditions have been applied to ensure that noise emissions from the development satisfy legislative requirements and maintain reasonable levels of amenity to the area:

49. The installation of rainwater tanks shall comply with the following noise control requirements:-

- a) The operation of all plant and equipment shall not give rise to an 'offensive noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the plant and equipment shall not give rise to an $L_{Aeq, 15 \text{ min}}$ sound pressure level at any affected premises that exceeds the background $L_{A90, 15 \text{ min}}$ noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A) in accordance with relevant NSW Department of Environment & Conservation Noise Control Guidelines.

- b) Plant and equipment associated with rainwater tank(s) are to be enclosed in a sound absorbing enclosure or installed within a building, to minimise noise emissions and possible nuisance to nearby residents.

- c) The operation of plant and equipment associated with the rainwater tank(s) are to be restricted to the following hours if the noise emitted can be heard within a habitable room in any other residential premises:

- before 8.00am or after 8.00pm on weekends or public holiday;
or
- before 7.00am or after 8.00pm on weekdays.

The following conditions are applied to ensure that adequate provisions are made for the management of waste from the development:

50. Adequate provisions are to be made within the premises for the storage and removal of waste and recyclable materials, to the satisfaction of Council and details are to be included in the construction certificate documentation.

51. A demolition and construction Waste Management Plan (WMP) must be developed and implemented for the development, to the satisfaction of Council, **prior to the commencement of works**.

The Waste Management Plan must provide details of the type and quantities of demolition and construction waste materials, proposed re-use and recycling of materials, methods of disposal and details of recycling outlets and land fill sites.

Where practicable waste materials must be re-used or recycled, rather than disposed and further details of Council's requirements including relevant guidelines and pro-forma WMP forms can be obtained from Council's Customer Service Centre or by telephoning Council on 9399 0999.

Details and receipts verifying the recycling and disposal of materials must be kept on site at all times and presented to Council officers upon request.

The following conditions are applied to provide adequate security against damage to Council's infrastructure:

52. The following damage/civil works security deposit requirement is to be complied with prior to a construction certificate being issued for the development, as security for making good any damage caused to the roadway, footway, verge or any public place; or as security for completing any public work; and for remedying any defect on such public works, in accordance with section 80A(6) of the Environmental Planning and Assessment Act 1979:

- a) \$1000.00 - Damage/Civil Works Security Deposit

The damage/civil works security deposit may be provided by way of a cash or cheque with the Council and is refundable upon:

- A satisfactory inspection by Council that no damage has occurred to the Council assets such as roadway, kerb, guttering, drainage pits, footway, or verge; and
- Completion of the civil works as conditioned in this development consent by Council.

The applicant is to advise Council, in writing, of the completion of all building works and/or obtaining an occupation certificate, if required.

The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

53. Prior to the issuing of an occupation certificate the applicant must meet the full cost for Council or a Council approved contractor to:
- a) Construct concrete vehicular crossing and layback (maximum 5.50m wide) at kerb opposite the vehicular entrance to the site.
 - b) Remove the redundant concrete vehicular crossing and layback and to reinstate the area with concrete footpath, turf and integral kerb and gutter to Council's specification.
54. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.
55. The applicant shall note that all external work, carried out on Council property, shall be in accordance with Council's Policy for "Vehicular Access and Road and Drainage Works". An application for the cost of the Council civil works is to be submitted to Council at the completion of the internal building works. An application fee shall be payable to Council for the quotation of the required works. The applicant may elect to use his contractor for the required works, subject to Council approval, however a design and supervision fee based on the lowest quotation from Council's nominated contractor will be required to be

paid prior to the commencement of any works.

The following conditions are applied to provide adequate provisions for future civil works in the road reserve:

56. The Council's Development Engineer has inspected the above site and has determined that the design alignment level at the property boundary for driveways, access ramps and pathways or the like, must be as follows:

A maximum of 350mm above the existing Council footpath level at all points opposite the Council footpath.

The design alignment levels (concrete/paved/tiled level) issued by Council and their relationship to the roadway/kerb/footpath must be indicated on the building plans for the construction certificate. The design alignment level at the street boundary, as issued by the Council, must be strictly adhered to.

57. The above alignment levels and the site inspection by Council's Development Engineering Section have been issued at a prescribed fee of \$717.00 calculated at \$44.00 (inclusive of GST) per metre of site frontage. This amount is to be paid prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate consideration for service authority assets:

58. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
59. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.

Note: The Sewer Man Hole Lid located on Council's footpath may have to be altered to suit the new Council driveway crossing servicing the site.

60. A Road / Asset Opening Permit must be obtained from Council prior to carrying out any public utility service works within or upon a road, footpath, nature strip or in any public place, in accordance with section 138 of the Roads Act 1993 and all of the conditions and requirements contained in the Road / Asset Opening Permit must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council, prior to the issuing of a final occupation certificate for the development.

For further information, please contact Council's Road / Asset Opening Officer on 9399 0691 or 9399 0999.

The following conditions are applied to provide adequate provisions for drainage and associated infrastructure:

61. Generally all site stormwater shall be piped to a sediment/silt arrester pit that drains to an infiltration area with a minimum 5 m² base area. An overflow pipe shall be provided from the silt arrester pit to drain to Council's kerb and gutter.

The location and details of the proposed internal stormwater pipelines, silt arrestor pit and the infiltration area shall be submitted to and approved by the certifying authority prior to a construction certificate being issued for the development. A copy of the plans shall be forwarded to Council, prior to a construction certificate being issued, if Council is not the certifying authority.

Notes:

- a. The sediment/silt arrestor pit shall be constructed:
 - i. within the site at or near the street boundary.
 - ii. with a child proof and corrosion resistant fastening system (e.g. spring loaded jay-bolt).
 - iii. with a minimum of 4 x 90 mm diameter weep holes (preferably located in the walls of the pit at the floor level) and with a suitable geotextile material **with a high filtration rating** located around the weep holes.
 - iv. with the pit floor being a minimum 300mm below the invert level of the outlet pipelines.
 - v. with a **galvanised** heavy duty screen (Lysaght RH3030 Maximesh or similar) located over the outlet pipes draining to the infiltration pit and the kerb. (Similar to a Mascot GRC stormwater discharge control pit, product code DS3SDC).

- b. The infiltration/rubble pit shall:
 - i. have a minimum 300 mm of soil cover (600 mm where the pit is located under a garden/landscaping area).
 - ii. be located a minimum of 3.0 metres from the dwelling or other structure (closer if a structural engineer certifies that the infiltration area will not adversely affect the structure) and 2.1 metres from the adjacent side or rear boundaries.
 - iii. be constructed with a minimum 200 mm thick layer of 20 mm basalt/blue metal (or similar) that is wrapped in a suitable geotextile material covering with a high filtration rating (Geofabrics Bidim "A" range of filtration fabrics or equivalent). A suitable means of dispersing the stormwater over the area of infiltration is to be constructed.
Note: other equivalent methods of infiltration may be adopted.
 - iv. have a minimum base area of 5.0 square metres (m²).

The outlet from the silt arrestor pit to the infiltration area shall be located at least 50 mm below the outlet from the silt arrestor pit to the kerb and gutter.

- c. The requirement for an infiltration/rubble pit will not be enforced should the underground soil conditions preclude the construction of the infiltration pit (eg rock is located within 300 mm of the base of the infiltration area). If the infiltration/rubble pit is not constructed then all site stormwater shall be discharged to the kerb and gutter via a sediment/silt arrestor pit (as detailed in note a. above).

All works shall be to the satisfaction of the certifying authority.

- d. The overflow pipe/s from the rainwater tank/s shall be directed into the infiltration area.

62. As the above site may encounter groundwater/seepage water within the depth of the basement, the basement carpark or similar structures are to be suitably

tanked and/or waterproofed. A Structural Engineer\Geotechnical Engineer shall certify the tanking and/or waterproofing has been carried out to an acceptable standard, to the satisfaction of the certifying authority. A copy of the certification is to be forwarded to Council.

Notes:-

- a) Any subsoil drainage (from planter boxes etc) is to be disposed of within the site and is not to be discharged to Council's kerb & gutter and/or underground drainage system.
 - b) Adequate provision is to be made for the ground water to drain around the basement carpark (to ensure that the basement will not dam or slow the movement of the ground water through the development site).
63. Any seepage water must be drained directly into an absorption pit within the site. Seepage water must **not** be drained from the site.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

64. Landscaping at the site shall be installed in accordance with the Landscape Plan prepared by William Dangar & Associates, drawing number LP01 – 0909, Issue 01, revision A, dated April 2009 and stamped 11th May 2009, **prior to the issue of a Final Occupation Certificate**, with a certificate confirming compliance from a qualified Landscape Designer/Architect who is a registered member of either AILD or AILA to be submitted to, and be approved by, the PCA.
65. The nature-strip upon Council's footway shall be excavated to a depth of 150mm, backfilled with topsoil equivalent with 'Organic Garden Mix' as supplied by Australian Native Landscapes, and re-turfed with Kikuyu Turf or similar. Such works shall be installed prior to the issue of a final Occupation Certificate.

Tree Management

66. The applicant shall submit a total payment of \$107.25 (including GST), being the cost for Council to supply and install 1 x 25 litre street tree, *Agonis flexuosa* (Willow Myrtle), on the French Street nature strip, near the western site boundary, upon completion of all site works.

The amount shall be paid into **Tree Amenity Income account no 4001.768401** at the Cashier on the Ground Floor of the Administrative Centre, **prior to a construction certificate being issued for the development.**

The applicant must contact Council's Landscape Development Officer on 9399-0613, giving at least four working weeks notice, to arrange for planting of the new street tree.

67. Approval is granted for the removal of all existing vegetation within the site, subject to full implementation of the approved landscape plan:
- All vegetation within the front setback, in the terraced gardens between the front (southern) boundary and existing dwelling, due to their small size and general insignificance;
 - One *Washintonia robusta* (*Washingtonia robusta*) in the rear yard, about

halfway along the length of the eastern boundary, in order to accommodate the new planting and associated works as shown;

- All other perimeter vegetation around the rear yard, as they were all observed to be insignificant, and too small for the provisions of Council's Tree Preservation Order (TPO).

Tree Protection Measures

68. In order to ensure retention of the *Araucaria heterophylla* (Norfolk Island Pine) located beyond the western boundary, within the front yard of the adjoining property to the west, 30 French Street, close to the common boundary in good health, the following measures are to be undertaken:
- a. All detailed architectural, building, demolition, engineering (structural, stormwater & drainage, services), and landscape documentation submitted for the construction certificate application must show the retention of this neighbouring tree, with the position and diameter of its trunks, together with the extent of its canopy to be clearly shown on all drawings.
 - b. Any roots encountered during either the demolition of existing structures, or construction of new retaining walls associated with the reconfigured pedestrian entry must be cut cleanly by hand, and the affected areas backfilled with clean site soil as soon as practically possible.

ADVISORY MATTERS:

- A1 Building or excavations works must not be commenced until a construction certificate has been obtained from Council's Building Certification Services or an Accredited Certifier and either Council's Building Certification Services or an Accredited Certifier has been appointed as the Principal Certifying Authority (PCA) for this development.

Failure to obtain a Construction Certificate and appoint a PCA before commencing works is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the Environmental Planning & Assessment Act 1979.

- A2 A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-

- Install or erect any site fencing, hoardings or site structures
- Operate a crane or hoist goods or materials over a footpath or road
- Placement of a waste skip or any other container or article.

- A3 The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

MOTION: (Andrews/Hughes) CARRIED UNANIMOUSLY - SEE RESOLUTION.

D45/09 Development Application Report - 10 Eurimbla Avenue, Randwick (DA/267/2009)

With the consent of the meeting, the Chairperson suspended debate to allow the applicant (Dr John Feller) to address the Committee (given that Dr Feller had register to speak, but was not in attendance earlier and also given that some Councillors had indicated that they had questions that they would like to put to the applicant)

PL63/09 **RESOLUTION: (Andrews/Matthews) -**

That Council, as the consent authority, grants development consent under Sections 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/267/2009 for alterations and additions to an existing semi-detached dwelling and change of use to a health consulting room, at No. 10 Eurimbla Avenue, Randwick, subject to the following conditions:

Conditions of Consent

The following conditions are applied to satisfy the provisions of section 79C of the *Environmental Planning & Assessment Act 1979* and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the following plans:

Plan Number	Dated	Received	Prepared By
0901 DA-100(C)	23.06.09	24 Jun 2009	Lacoste + Stevenson Pty. Ltd.
0901 DA-120(A)	05.05.09	7 May 2009	
0901 DA-200(A)	05.05.09	7 May 2009	
0901 DA-201(A)	05.05.09	7 May 2009	
0901 DA-202(A)	05.05.09	7 May 2009	
0901 DA-300(A)	05.05.09	7 May 2009	

the application form and any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:

2. The colours, materials and finishes of the external surfaces to the building are to be compatible with the adjacent development to maintain the integrity and amenity of the building and the streetscape.

Details of the proposed colours, materials and textures (i.e. a schedule and brochure/s or sample board) are to be submitted to and approved by the Principal Certifying Authority prior to a construction certificate being issued for the relevant building works.

3. The external materials, colours and finishes of the proposed works are required to match, as closely as possible, the existing building.
4. Metal roof sheeting is to be pre-painted (e.g. colourbond) and form part of the colour scheme and external finishes for the development.
5. There must be no encroachment of the structure/s or associated articles onto Council's road reserve, footway, nature strip or public place.
6. Details are to be provided in the Construction Certificate application to demonstrate that the proposed works will not encroach onto the adjoining properties, Council's road reserve or any public place, to the satisfaction of the

7. Street numbering must be provided to the premises in a prominent position, in accordance with the Australia Post guidelines and AS/NZS 4819 (2003) to the satisfaction of Council, prior to an occupation certificate being issued for the development.
8. Any gate openings shall be constructed so that the gates, when hung, will be fitted in such a manner that they will not open over the footway or public place.
9. Any proposed fences located on the side or rear boundaries of the site shall not exceed a maximum height of 1800mm, measured above the existing ground levels.

On sloping sites or at changes in ground levels, the maximum height of the fence may exceed the abovementioned specified height by up to 150mm maximum adjacent to any required 'step-downs' or changes in ground level.

The applicant and owner are advised that the relevant provisions of the Dividing Fences Act 1991 are to be satisfied accordingly and any necessary approvals or agreements are to be obtained from the owner/s of the adjoining land beforehand.

10. The hours of operation of the subject health consulting premises are restricted to: **8am to 6pm, Monday through to Friday inclusive only**. The premises shall not be opened to the patients/visitors outside the above approved operation hours.
11. A maximum of one (1) medical practitioner may operate in the premises at any one time.
12. The function of the individual rooms within the proposed health consulting premises shall be consistent with the approved drawings, and shall not be converted in any manner to allow the concurrent operation of more than one (1) medical practitioner.
13. Development consent from Council must be obtained prior to the erection of any advertising or business identification signs, with the exception of those that are described in Council's Development Control Plan – Exempt and Complying Development, or otherwise permitted under this Consent.
14. No goods, machinery or advertising signs (including A-frame signs) are to be placed on Council's footway at any time.

The following condition is imposed to satisfy relevant requirements of the Sydney Water Corporation:

15. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition is applied to meet additional demands for public facilities:

16. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, the following monetary levy must be paid to Council.

Category	Cost	Applicable Levy	S94A Levy
Development Cost More than \$200,000	\$271,223	1.0%	\$2,712.23

The levy must be paid in cash, bank cheque or by credit card prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency:

17. In all new and upgraded building work, the consumption of water shall be minimised by the use of triple A rated water efficient plumbing fixtures (taps and shower roses) and water efficient dual flush toilets. Details of compliance are to be noted in the **construction certificate** plans or specifications.
18. In all new and upgraded building work, external timber or metal framed and brick veneer walls and roofs are to be provided with insulation (i.e. bulk insulation and a reflective building membrane/reflective sarking/foil insulation), having a minimum total thermal resistance R-value of 3.0 in roofs and 1.5 in external walls. The insulation and reflective building membrane is to be installed in accordance with the relevant requirements of the Building Code of Australia and the manufacturers details.

Details of compliance with the requirements for insulation are to be included in the **construction certificate** application.

19. In all new and upgraded building work, hot water service pipes are to be provided with insulation and must also satisfy any relevant requirements of Building Code of Australia and AS 3500.

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

20. Surface water/stormwater must be drained and discharged to the street gutter or suitably designed absorption pit, to the satisfaction of the Certifying Authority and details are to be included in the construction certificate application for the development.

Absorption pits must be located not less than 3m from any adjoining premises

and the stormwater must not be directed or flow onto any adjoining premises or cause a nuisance.

Details of any works proposed to be carried out in or on a public road/footway are to be submitted to and approved by Council prior to commencement of works.

21. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the *Environmental Planning and Assessment Act 1979* and Regulations and to provide for reasonable levels of safety and amenity:

Regulatory

22. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

23. All new building work must be carried out in accordance with the provisions of the Building Code of Australia (BCA), in accordance with Clause 98 of the *Environmental Planning and Assessment Regulation 2000*.

24. **Prior to the commencement of any building works** (including fit-out works), a **construction certificate** must be obtained from the Council's Building Certification Services or an Accredited Certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans & specifications and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

25. **Prior to the commencement of any building works**, the person having the benefit of the development consent must:

- i) appoint a *Principal Certifying Authority*, and
- ii) appoint a *principal contractor* for the building work and notify the *Principal Certifying Authority* and Council accordingly in writing, and
- iii) notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*, and
- iv) give at least two days notice to the Council, in writing, of the person's intention to commence building works.

26. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning &

Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected in accordance with section 81A (2) (b1) (ii) of the Environmental Planning & Assessment Regulation 2000 and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

Documentary evidence of the building inspections carried out and details of compliance with Council's consent is to be maintained by the *Principal Certifying Authority*. Details of *critical stage inspections* carried out and copies of certification relied upon must also be forwarded to Council with the *occupation certificate*.

The *principal contractor* must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's* "Notice of Critical Stage Inspections", are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

27. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours,
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
28. An **Occupation Certificate** must be obtained from the Principal Certifying Authority prior to any occupation of the building work encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.
- An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The requirements of the Environmental Planning & Assessment Act 1979 and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.
29. **Prior to the issuing of an interim or final occupation certificate**, a statement is required to be obtained from the Principal Certifying Authority, which confirms that the development is not inconsistent with the development consent and the relevant conditions of development consent have been satisfied.
30. The required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, prior to the issuing of a Construction Certificate, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

31. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

Fire safety

32. The existing levels of fire and safety within the building are to be upgraded in accordance with the following requirements and the fire safety certificate provisions of Part 9 of the *Environmental Planning and Assessment Regulation 2000* must be complied with, **prior to issuing an occupation certificate:**

- a) The following works are to be undertaken in accordance with the specified provisions of the Building Code of Australia (BCA), as applicable:
- 1) Provide illuminated exit signs to the premises, in accordance with clause E4.5 & E4.8 of the BCA,
 - 2) Provide suitable portable fire extinguishers and fire blankets within the building adjacent to the kitchen area and in the store room, in accordance with clause E1.6 of the BCA,
 - 3) Prior to commencing the abovementioned works, a Construction Certificate must be obtained from Council's Building Certification Services or an accredited certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and *Environmental Planning & Assessment Regulation 2000*.

33. A Fire Safety Certificate must be submitted to Council **prior to the issuing of an Occupation Certificate**, in accordance with the requirements of the *Environmental Planning and Assessment Regulation 2000*.

A single and complete *Fire Safety Certificate* must be provided which includes details of all of the fire safety measures contained in the building and as detailed in the *fire safety schedule* attached to the Construction Certificate.

Prior to issuing any Occupation Certificate the Principal Certifying Authority must be satisfied that all of the relevant fire safety measures have been included and are sufficiently detailed within the *Fire safety Certificate*.

A copy of the *fire safety certificate* must be displayed in the building near the entrance and a copy must be forwarded to the NSW Fire Brigades.

Building & demolition works

34. A Certificate of Adequacy supplied by a *professional engineer* shall be submitted to the certifying authority (*and the Council, if the Council is not the certifying authority*) **prior to a construction certificate being issued** for the development, certifying the structural adequacy of the existing structure to support the additional or altered structural loads.
35. A dilapidation report prepared by a professional engineer, building surveyor or other suitably qualified independent person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:
- new dwellings or additions to dwellings sited up to the property boundaries (including additions to a semi-detached dwelling),
 - excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the *zone of influence* of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
 - excavations for new dwellings, additions to dwellings, swimming pools or the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,
 - as otherwise required by the Principal Certifying Authority.

The report (including photographs) are required to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works. A copy of the dilapidation report is to be given to the owners of the premises encompassed in the report/s before commencing any works.

36. Demolition work and the removal, storage, handling and disposal of building materials must be carried out in accordance with the following requirements (as applicable):
- Occupational Health and Safety Act 2000
 - Occupational Health and Safety (Hazardous Substances) Regulation 2001
 - Occupational Health and Safety (Asbestos Removal Work) Regulation 2001
 - WorkCover NSW Code of Practice and Guidelines
 - Australian Standard 2601 (2001) – Demolition of Structures
 - The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 1996.
 - Randwick City Council Asbestos Policy (adopted 13 September 2005)
37. In accordance with Council's Asbestos Policy, the following requirements are to be satisfied if any materials containing asbestos are present in the building:
- a) Randwick City Council Asbestos Policy (adopted 13 September 2005).
- A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.*
- b) A Demolition Work Plan must be developed and implemented in accordance with Australian Standard AS 2601-2001, Demolition of Structures.

- c) A WorkCover licensed demolition or asbestos removal contractor must undertake removal of more than 10m² of bonded asbestos (or as otherwise specified by WorkCover or relevant legislation). Removal of friable asbestos material must only be undertaken by contractor that holds a current friable asbestos removal licence.
 - d) Asbestos waste must be disposed of at an approved waste disposal depot (refer to the DEC or Waste Service NSW for details of sites). Copies of all receipts detailing method and location of disposal must be maintained on site and be provided to Council officers upon request, as evidence of correct disposal.
 - e) On demolition sites involving the removal of asbestos, a professionally manufactured sign must be clearly displayed in a prominent visible position at the front of the site, containing the words "DANGER ASBESTOS REMOVAL IN PROGRESS" and include details of the licensed contractor. The sign shall measure not less than 400mm x 300mm and the sign is to be installed prior to demolition work commencing and is to remain in place until such time as all asbestos has been safely removed from the site.
 - f) A certificate or Statement, prepared by a suitably qualified person (i.e. an occupational hygienist, licensed asbestos removal contractor, building consultant, architect or experienced licensed building contractor), must be provided to Council upon completion of the works (prior to an Occupation Certificate being issued), which confirms that the relevant requirements and conditions of consent, in relation to the safe removal and disposal of asbestos, have been satisfied.
38. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and (except as detailed below) between 8.00am to 5.00pm on Saturdays.
- All building, demolition and associated site works are strictly prohibited on Sundays, Public Holidays and also on Saturdays adjacent to a Public Holiday.
- In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and loss of amenity to nearby residents.
39. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.
40. Public safety and convenience must be maintained at all times during demolition, excavation and construction works.
- a) The roadway, footpath and nature strip must be maintained in a good, safe condition and free from any obstructions, materials, soils or debris at all times. Any damage caused to the road, footway or nature strip must be repaired immediately, to the satisfaction of Council.
 - b) A Road Opening Permit must be obtained from the Council and other relevant Authorities prior to excavating or opening-up the road or footway for services or the like.

- c) Building materials, sand, soil, waste materials or construction equipment must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
- d) Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health, Building & Regulatory Services department.
- e) During construction stages, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by the NSW Department of Housing. Sediment and erosion control measures must be implemented prior to the commencement of any site works and be maintained throughout construction.
- f) Public safety must be maintained at all times and public access to demolition/building works, materials and equipment on the site is to be restricted. If required, a temporary 1.8m high safety fence or hoarding is to be provided to protect the public, located between the work site and the public place. An awning may also be required to prevent any substance from, or in connection with, the work from falling into the public place or adjoining premises.

Temporary fences or hoardings or the like are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

The public safety provisions and temporary fences or hoardings must be in place prior to the commencement of any demolition, excavation or building works and be maintained throughout construction.

If it is proposed to locate any hoardings, site fencing or amenities upon any part of the footpath, nature strip or any public place, the written consent from Council's Health, Building & Regulatory Services department must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

- g) A separate local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities upon any part of the footpath, road, nature strip or in any public place:-
 - Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip or any other container or article on the road, footpath or nature strip.

The following conditions are applied to satisfy the relevant pollution control criteria and to maintain reasonable levels of health, safety and amenity to the locality:

- 41. The use and operation of the premises shall not give rise to an environmental health or public nuisance, vibration or, result in an offence under the *Protection*

of the Environment Operations Act 1997 and Regulations.

42. The use of the premises and the operation of all plant and equipment shall not give rise to an 'offensive noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the premises and plant and equipment shall not give rise to a sound pressure level at any affected premises that exceeds the background (L_{A90}), 15 min noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A). The source noise level shall be assessed as an $L_{Aeq, 15 \text{ min}}$ and adjusted in accordance with the NSW Environmental Protection Authority's Industrial Noise Policy 2000 and Environmental Noise Control Manual (sleep disturbance).

Access & Facilities

The following condition is applied to provide appropriate access and facilities to the premises:

43. Access and facilities for people with disabilities must be provided to new building work in accordance with any relevant provisions of the Building Code of Australia, to the satisfaction of the Certifying Authority and details are to be provided with the Construction Certificate application.

Waste Management

The following condition is applied to provide adequate provisions for waste management:

44. Adequate provisions are to be made within the premises for the storage, collection and disposal of trade/commercial waste and recyclable materials, to the satisfaction of Council.

Trade/commercial waste materials must not be disposed in or through Council's domestic garbage service. All trade/commercial waste materials must be collected by Council's Trade Waste Service or a waste contractor authorised by the Waste Service of New South Wales and details of the proposed waste collection and disposal service are to be submitted to Council **prior to commencing operation of the business.**

The operator of the business must also arrange for the recycling of appropriate materials and make the necessary arrangements with an authorised waste services contractor accordingly.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

45. All patients, other than emergency patients, shall make an appointment to see the health care provider concerned. At the time of making the appointment, the patient, carer or parent shall be informed that parking is also available in the Prince of Wales hospital complex and provide adequate information concerning its location. All patients, carers and parents are to be informed that parking is extremely limited in Eurimbla Avenue and that the Metro Parking facility at the Prince of Wales hospital complex is more convenient and should be utilised.
46. The administration staff of the Health Consulting Room shall have prepared for distribution by e-mail, website and/or postage a map showing the location of the Metro Parking facility located in the Prince of Wales Hospital complex relative to the location of the consulting room. Such information is to be distributed verbally or in written form at the time an appointment is made.

47. The one available off-street car space provided for the site shall be for the exclusive use of the patient/carer/parent during business hours.
48. Prior to the issuing of an occupation certificate the applicant is to have installed, at the front of the site, a sign advising that parking is available in the Prince of Wales hospital complex. The above sign is to be non-illuminating and has a size of not more than 0.5m². The design, material and colouring of the sign shall be compatible with the residential character of Eurimbla Avenue.
49. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.

The following conditions are applied to provide adequate provisions for future civil works in the road reserve:

50. The Council's Development Engineer has inspected the above site and has determined that the design alignment level (concrete/paved/tiled level) at the property boundary for driveways, access ramps and pathways or the like, must match the back of the existing footpath along the full site frontage.
51. The design alignment levels (concrete/paved/tiled level) issued by Council and their relationship to the footpath must be indicated on the building plans for the construction certificate. The design alignment level at the street boundary, as issued by the Council, must be strictly adhered to.
52. The above alignment levels and the site inspection by Council's Development Engineer have been issued at a prescribed fee of \$121.00 (inclusive of GST). This amount is to be paid prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate consideration for service authority assets:

53. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
54. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.

ADVISORY MATTERS:

1. The applicant is advised that the Construction Certificate plans and specification must comply with the provisions of the Building Code of Australia (BCA).

In this regard, the development consent plans do not show compliance with the deemed-to-satisfy provisions of the BCA. Details of compliance with the relevant provisions of the Building Code of Australia and conditions of development consent are to be provided in the plans and specifications for the construction certificate.

You are also advised to ensure that the development is not inconsistent with Council's consent and if necessary consult with Council's Building Certification Services or your accredited certifier prior to submitting your construction certificate application to enable these matters to be addressed accordingly.

2. The applicant/owner is advised that this approval does not guarantee compliance with the provisions of the Disability Discrimination Act 1992 and the applicant should therefore consider their liability under the Act. In this regard, the applicant is advised that compliance with the requirements of the Building Code of Australia and Australian Standard 1428.1 - Design for Access and Mobility does not necessarily satisfy the objectives of the Disability Discrimination Act 1992.

The applicant/owner is requested to give consideration to providing access and facilities for people with disabilities in accordance with Australian Standard 1428 Parts 1, 2, 3 and 4 - Design for Access and Mobility, which may be necessary to satisfy the objectives of the Disability Discrimination Act 1992.

3. The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

MOTION: (Andrews/Matthews) CARRIED - SEE RESOLUTION.

A **DIVISION** was taken and the names of the Councillors voting FOR and AGAINST were as follows:

FOR	AGAINST
Councillor Andrews	Councillor Smith

**D46/09 Development Application Report - 272 Arden Street, Coogee
(DA/160/2009)**

PL64/09 **RESOLUTION: (Andrews/Hughes) -**

- A. That Council support the objections under State Environmental Planning No. 1 (SEPP No.1) in respect to non-compliance with Clauses 31 & 32 of the Randwick Local Environmental Plan 1988, relating to landscaping and floor space ratio, on the grounds that the proposed development is consistent with the objective of the clauses and will not adversely affect the amenity of the surrounding locality and that the Department of Planning be advised accordingly.
- B. That Council, as the consent authority, grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/1602/2009 for permission carryout alterations and additions to the existing building to provide for the

operation of dental health consulting rooms at 272 Arden Street Coogee subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the *Environmental Planning & Assessment Act 1979* and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered 7/09, dated 16/2/2009 and received by Council on the 12th March 2009, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The colours, materials and finishes of the external surfaces to the building are to be compatible with the existing building and adjacent development to maintain the integrity and amenity of the building and the streetscape.

Details of the proposed colours, materials and textures (i.e. a schedule and brochure/s or sample board) are to be submitted to and approved by Council's Director of City Planning, in accordance with section 80A (2) of the *Environmental Planning and Assessment Act 1979* prior to a construction certificate being issued for the relevant building works.

3. Metal roof sheeting is to be pre-painted (e.g. colourbond) and form part of the colour scheme and external finishes for the development.
4. There must be no encroachment of the structures onto the adjoining properties and the property boundaries are to be established on site prior to the commencement of building works.
5. The hours of the health consulting rooms are restricted to 8.30am to 6.00pm, Monday to Friday.
6. There shall be no more than 2 practitioners providing dental services at the subject premises.

The following condition is imposed to satisfy relevant requirements of the Sydney Water Corporation.

7. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition is applied to meet additional demands for public facilities;

8. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, the following monetary levy must be paid to Council.

Category	Cost	Applicable Levy	S94A Levy
Development Cost More than \$200,000	\$ 320 000	1.0%	\$ 3 200.00

The levy must be paid in cash, bank cheque or by credit card prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

9. In accordance with Section 80A (11) of the *Environmental Planning and Assessment Act 1979* and Clause 97A of the *Environmental Planning and Assessment Regulation 2000*, it is a prescribed condition that all of the required commitments listed in the relevant BASIX Certificate for this development are fulfilled.

10. In accordance with the provisions of the *Environmental Planning & Assessment Regulation 2000*, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

11. The following provisions are to be implemented in accordance with the relevant BASIX Certificate and details are to be included in the Construction Certificate documentation (as applicable), to the satisfaction of the Certifying Authority:

- Stormwater management (i.e. rainwater tanks)
- Water efficiency (i.e. triple A rated taps and showers, dual flush toilets and water re-use)
- Landscaping provisions
- Thermal comfort (i.e. construction materials, glazing and insulation)
- Energy efficiency (i.e. cooling & heating provisions and hot water systems)

12. In accordance with Clause 154B of the *Environmental Planning & Assessment Regulation 2000*, a Certifying Authority must not issue an Occupation Certificate for this development, unless it is satisfied that each of the required BASIX commitments have been fulfilled.

Relevant documentary evidence of compliance with the BASIX commitments is to be forwarded to the Council upon issuing an Occupation Certificate.

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

13. Surface water/stormwater must be drained and discharged to the street gutter or suitably designed absorption pit, to the satisfaction of the Certifying Authority and details are to be included in the construction certificate application for the development.

Absorption pits must be located not less than 3m from any adjoining premises and the stormwater must not be directed or flow onto any adjoining premises or cause a nuisance.

Details of any works proposed to be carried out in or on a public road/footway are to be submitted to and approved by Council prior to commencement of works.

14. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

15. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of 'on-the-spot' penalty infringements or service of a notice and order by Council.

16. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the provisions of the Building Code of Australia (BCA).

17. **Prior to the commencement of any building or 'fit-out' works, a construction certificate must be obtained from the Council or an accredited certifier**, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment

18. **Prior to the commencement of any building or 'fit-out' works**, the person having the benefit of the development consent must:

- i) appoint a *Principal Certifying Authority* for the building work and
- ii) appoint a *principal contractor* for the building work and notify the

- Principal Certifying Authority* and Council accordingly in writing, and
- iii) notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*, and
 - iv) give at least two days notice to the Council, in writing, of the person's intention to commence building works.

19. The works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *principal contractor* or *owner-builder* (as applicable) must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's* "Notice of Critical Stage Inspections", are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

20. An Occupation Certificate must be obtained from the Principal Certifying Authority **prior to any occupation or use of the development** encompassed in this development consent (including alterations, additions and 'fit-out' work to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.

21. Where applicable, a *Fire Safety Certificate* must be submitted to Council **prior to the issuing of an Occupation Certificate**, in accordance with the requirements of the *Environmental Planning and Assessment Regulation 2000*.

The *Fire Safety Certificate* must include details of all of the fire safety measures contained in the building and as detailed in the *fire safety schedule* attached to the Construction Certificate.

Prior to issuing any Occupation Certificate the Principal Certifying Authority must be satisfied that all of the relevant fire safety measures have been included and are sufficiently detailed within the *Fire Safety Certificate*. A copy of the *fire safety certificate* must be displayed in the building near the entrance and a copy must be forwarded to the NSW Fire Brigades.

An annual *Fire Safety Statement* must be submitted to the Council and the NSW Fire Brigades, each year after the date of the *Fire Safety Certificate*, in accordance with the *Environmental Planning & Assessment Regulation 2000*.

22. **Prior to an occupation certificate being issued for the development** a report is to be obtained from a suitably qualified and experienced consultant in acoustics, which demonstrates and certifies that noise and vibration from the development satisfies the relevant provisions of the *Protection of the Environment Operations Act 1997*, NSW EPA/DECC Noise Control Manual & Industrial Noise Policy, Council's conditions of consent (including any relevant approved acoustic report and recommendations), to the satisfaction of Council. The assessment and report must include all relevant fixed and operational noise sources and a copy of the report must be included in the occupation certificate documentation.

23. Any required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a**

Construction Certificate, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

24. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If the proposed works are suitable, the plans will be appropriately stamped by Sydney Water or their Agent. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority is required to ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **prior to the commencement of any building works**.

25. In existing buildings, the following works are to be carried out to ensure minimum levels of fire safety (as applicable):-

- 1) Any new or replacement ceilings walls and floor linings and doorways are required to satisfy the relevant requirements of the Building Code of Australia.
- 2) Any residential parts of the building are to be fire-separated from the commercial area encompassed in this development application, in accordance with the relevant provisions of the Building Code of Australia.
- 3) Any residential parts of the building must be provided with a smoke detection and alarm system, in accordance with the relevant provisions of the Building Code of Australia.

Details of the abovementioned items and other building and fire safety works are to be provided in the construction certificate.

26. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 E of the *Environmental Planning & Assessment Regulation 2000*, it is a prescribed condition that the adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

- 1) If the development involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development must, at the person's own expense:
 - a) protect and support the adjoining premises from possible damage from the excavation, and
 - b) where necessary, underpin the adjoining premises to prevent any such damage.

- 2) The condition referred to in subclause 1) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.
27. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and (except as detailed below) between 8.00am to 5.00pm on Saturdays.

All building, demolition and associated site works are strictly prohibited on Sundays, Public Holidays and also on Saturdays adjacent to a Public Holiday.

In addition, the use of any rock excavation machinery or the like is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only.

28. Public health, safety and convenience must be maintained at all times during demolition and building works and the following requirements must be complied with at all times (as applicable):

- a) The demolition of buildings must be carried out in accordance with Australian Standard, AS2601 (2001) - The Demolition of Structures and a Demolition Work Plan is required to be developed and implemented to the satisfaction of the Principal Certifying Authority **prior to commencing any demolition works.**
- b) The demolition, removal, storage and disposal of any materials containing asbestos must be carried out in accordance with the relevant requirements of WorkCover NSW, Council's Asbestos Policy and the following requirements:
- A licence must be obtained from WorkCover NSW for the removal of friable asbestos and or more than 10m² of bonded asbestos (i.e. fibro)
 - Asbestos waste must be disposed of in accordance with the Protection of the Environment Operations Act 1997 & relevant Regulations
 - A sign must be provided to the site/building stating "Danger Asbestos Removal In Progress"
 - A Clearance Certificate or Statement must be obtained from a suitably qualified person (i.e. Occupational Hygienist) upon completion of the asbestos removal works, which is to be submitted to the Principal Certifying Authority and Council **prior to issuing an Occupation Certificate.**

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

- c) A sign must be provided and maintained in a prominent position, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable)
 - name, address and telephone number of the *Principal Certifying Authority*,

- a statement stating that "unauthorised entry to the work site is prohibited".
- d) The roadway, footpath and nature strip must be maintained in a good, safe condition and free from any obstructions, trip hazards, materials, soils or debris at all times. Any damage caused to the road, footway or nature strip must be repaired immediately, to the satisfaction of Council.
- e) A Road/Asset Opening Permit must be obtained from Council prior to carrying out any works within or upon a road, footpath, nature strip or in any public place, in accordance with section 138 of the Roads Act 1993 and all of the conditions and requirements contained in the Road/Asset Opening Permit must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council. For further information, please contact Council's Road/Asset Opening Officer on 9399 0691 or 9399 0999.

- f) Building materials, sand, soil, waste materials, construction equipment or other materials or articles must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
- g) Bulk bins, waste containers or other articles must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container or other articles in a public place can be made to Council's Building Services section.
- h) During demolition and construction, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to the satisfaction of Council.
- i) Public safety must be maintained at all times and public access to any demolition and building works, materials and equipment on the site is to be restricted. If necessary, a temporary safety fence or hoarding is to be provided to protect the public. Temporary site fences are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

If it is proposed to locate any site fencing, hoardings or items upon any part of the footpath, nature strip or any public place, a Local Approval application must be submitted to and approved by Council's Health, Building & Regulatory Services department beforehand. Details and plans are to be submitted with the application, together with payment of the weekly charge in accordance with Council's adopted Pricing Policy.

Disabled access

29. Access and/or facilities for people with disabilities must be provided to new buildings or work in accordance with the relevant provisions of the Building Code of Australia, to the satisfaction of the Certifying Authority and details are to be provided with the Construction Certificate application.

Waste management

30. Adequate provisions are to be made within the premises for the storage, collection and disposal of trade/commercial waste and recyclable materials, to the satisfaction of Council.
31. Any trade/commercial waste materials must not be disposed in or through Council's domestic garbage service. All trade/commercial waste materials must be collected by Council's Trade Waste Service or a waste contractor authorised by the Waste Service of New South Wales. Details of the proposed waste collection and disposal service are to be submitted to Council prior to commencing operation of the business.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

32. A Certificate of Adequacy supplied by a *professional engineer* shall be submitted to the certifying authority (*and the Council, if the Council is not the certifying authority*) **prior to a construction certificate being issued** for the development, certifying the structural adequacy of the existing structure to support the upper floor addition.
33. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the relevant requirements of WorkCover NSW, the NSW Department of Environment & Climate Change (formerly EPA) and Randwick City Council policies, including:

- Occupational Health and Safety Act 2000 & Regulations
- WorkCover NSW Guidelines & Codes of Practice
- Australian Standard 2601 (2001) – Demolition of Structures
- The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 2005
- Relevant DECC/EPA Guidelines
- Randwick City Council Asbestos Policy (adopted 13 September 2005)

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

34. A Demolition Work Plan must be prepared for the development in accordance with Australian Standard AS2601-2001, Demolition of Structures.

The Demolition Work Plan must include the following information (as applicable):

- The name, address, contact details and licence number of the Demolisher /Asbestos Removal Contractor
- Details of hazardous materials (including asbestos)
- Method/s of demolition (including removal of any asbestos)
- Measures and processes to be implemented to ensure the health & safety of workers and community
- Measures to be implemented to minimise any airborne dust and asbestos
- Methods and location of disposal of any hazardous materials
- Other relevant details, measures and requirements to be implemented
- Date the demolition works will commence

The Demolition Work Plan must be submitted to the Principal Certifying Authority (PCA), not less than two (2) working days before commencing any

demolition work. A copy of the Demolition Work Plan must be maintained on site and be made available to Council officers upon request.

If the work involves asbestos products or materials, a copy of the Demolition Work Plan must be provided to Council, not less than 2 days before commencing such works.

Note it is the responsibility of the persons undertaking demolition work to obtain the relevant WorkCover licences and permits.

35. Any work involving the demolition, storage or disposal of asbestos products and materials must be carried out in accordance with the following requirements:

- Relevant Occupational Health & Safety legislation and WorkCover NSW requirements
- Randwick City Council's Asbestos Policy (adopted 13 September 2005)
- A WorkCover licensed demolition or asbestos removal contractor must undertake removal of more than 10m² of bonded asbestos (or as otherwise specified by WorkCover or relevant legislation). Removal of friable asbestos material must only be undertaken by contractor that holds a current friable asbestos removal licence.
- On sites involving the removal of asbestos, a sign must be clearly displayed in a prominent visible position at the front of the site, containing the words 'DANGER ASBESTOS REMOVAL IN PROGRESS' and include details of the licensed contractor.
- Asbestos waste must be stored, transported and disposed of in compliance with the *Protection of the Environment Operations Act 1997* and the *Protection of the Environment Operations (Waste) Regulation 2005*.
- A Clearance Certificate or Statement, prepared by a suitably qualified person (i.e. an occupational hygienist, licensed asbestos removal contractor, building consultant, architect or experienced licensed building contractor), must be provided to Council and the principal certifying authority immediately upon completion of the asbestos related works, which confirms that the asbestos material have been removed appropriately and the relevant conditions of consent have been satisfied.

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

36. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Retaining walls, shoring, or piling must be designed and installed in accordance with appropriate professional standards and the relevant requirements of the

Building Code of Australia and Australian Standards. Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

37. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 E of the *Environmental Planning & Assessment Regulation 2000*, it is a prescribed condition that the adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

- 1) If the development involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development must, at the person's own expense:
 - a) protect and support the adjoining premises from possible damage from the excavation, and
 - b) where necessary, underpin the adjoining premises to prevent any such damage.
- 2) The condition referred to in subclause 1) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.

38. A dilapidation report prepared by a professional engineer, building surveyor or other suitably qualified independent person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:

- new dwellings or additions to dwellings sited up to the property boundaries (including additions to a semi-detached dwelling),
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the *zone of influence* of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- as otherwise required by the Principal Certifying Authority.

The report (including photographs) are required to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works. A copy of the dilapidation report is to be given to the owners of the premises encompassed in the report/s before commencing any works.

39. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.

Noise and vibration from any rock excavation machinery, pile drivers and all plant and equipment must be minimised, by using appropriate plant and equipment, silencers and the implementation of noise management strategies.

A construction noise and vibration minimisation strategy, prepared by a suitably qualified person is to be implemented throughout the works, to the satisfaction of the Council. A copy of the strategy must be provided to the Principal Certifying Authority and Council **prior to the commencement of site works.**

40. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied, to the satisfaction of Council.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

41. A Construction Site Management Plan is to be developed and implemented **prior to the commencement of any works.** The site management plan must include the following measures, as applicable to the type of development:

- location and construction of protective fencing/hoardings to the perimeter of the site;
- location of site storage areas/sheds/equipment;
- location of building materials for construction;
- provisions for public safety;
- dust control measures;
- site access location and construction
- details of methods of disposal of demolition materials;
- protective measures for tree preservation;
- provisions for temporary sanitary facilities;
- location and size of waste containers/bulk bins;
- details of proposed sediment and erosion control measures;
- construction noise and vibration management;
- construction traffic management details.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and amenity to the satisfaction of Council. A copy of the Construction Site Management Plan must be provided to the Principal Certifying Authority and Council. A copy must also be maintained on site and be made available to Council officers upon request.

42. During construction stages, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to the satisfaction of Council.

Details of the proposed sediment control measures are to be detailed in the Construction Site Management Plan which must be submitted to and approved by the Principal Certifying Authority or Council **prior to the commencement**

of any site works.

43. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:
- a. Building materials, sand, soil, waste materials, construction equipment or other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
 - b. Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
 - c. Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.
 - d. Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

44. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.

The following conditions are applied to provide adequate consideration of service authority assets:

45. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.

The following conditions are applied to provide adequate provisions for drainage and associated infrastructure:

46. Drainage plans shall be submitted to and approved by the certifying authority prior to the issue of a construction certificate. The drainage plans shall demonstrate compliance with the conditions of this development approval.
47. Stormwater runoff from the site shall be discharged to the kerb and gutter or drainage system at the front of the property in Arden Street. Should a charged system be required to drain any portion of the site, the charged system must be designed with suitable clear-outs/inspection points at pipe bends and junctions.
48. Should a pump system be required to drain any portion of the site the system must be designed with a minimum of two pumps being installed, connected in

parallel (with each pump capable of discharging at the required discharge rate) and connected to a control board so that each pump will operate alternatively. The pump wet well shall be sized for the 1 in 100 year, 2 hour storm assuming both pumps are not working.

The pump system must also be designed and installed strictly in accordance with Randwick City Council's Stormwater Code.

49. All pump out water must pass through a stilling pit prior to being discharged by gravity to the kerb and gutter.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

Tree Management

50. Approval is granted for removal of the following vegetation as part of this application:
- a. All vegetation within the front portion of the site including one *Tibouchina granulosa* (Lasiandra) in the northern half of the site, and one *Syagrus romanzoffianum* (Cocos Palm) towards the southern half, as both are exempt from the provisions of Council's Tree Preservation Order (TPO).
 - b. One *Corymbia citriodora* (Lemon Scented Gum) in the rear yard, beyond the southwest corner of the existing dwelling, along the southern boundary, due to its poor health and condition, its inappropriate location close to the existing dwelling, as well as to accommodate the rear ground and first floor extensions as shown, which will occupy this area of the site;
 - c. Immediately to the west of the tree described in point 'b' above, one small *Plumeria acutifolia* (Frangipani), and then further to the west, a row of three *Syagrus romanzoffianum* (Cocos Palms), as all are exempt from Council's TPO.

Street Tree Protection

51. In order to ensure retention of the recently planted *Banksia serrata* (Saw Toothed Banksia) and tree guard installed within Council's Arden Street footpath, roughly halfway across the width of the site in good health, the following measures are to be undertaken:
- a. All documentation submitted for the construction certificate application must show the retention of this street tree, with the position and diameter of both its trunk and canopy to be clearly shown on all drawings.
 - b. The applicant is not authorised to perform any works to this street tree, and must contact Council's Landscape Development Officer on 9399-0613 should pruning or any similar such work appear necessary, with the applicant required to cover all associated costs with such work, to Council's satisfaction, prior to the issue of a final occupation certificate.
 - c. There must be no storage of materials or machinery or site office/sheds, nor is cement to be mixed or chemicals spilt/disposed of and no stockpiling of soil or rubble surrounding this tree/guard, within 1 metre of its trunk.
 - d. A refundable deposit in the form of cash, credit card or cheque for an

amount of **\$500.00 (no GST)** shall be paid at the Cashier on the Ground Floor of the Administrative Centre, **prior to a construction certificate being issued for the development**, in order to ensure compliance with the conditions listed in this consent, and ultimately, preservation of this street tree.

The refundable deposit will be eligible for refund following the issue of a Final Occupation Certificate, subject to completion and submission of Council's 'Security Deposit Refund Application Form', and pending a satisfactory inspection by Council's Landscape Development Officer (9399-0613).

Any contravention of Council's conditions relating to the tree at any time during the course of the works, or prior to the issue of a final occupation certificate, may result in Council claiming all or part of the lodged security in order to perform any rectification works necessary, as per the requirements of 80A (6) of the Environmental Planning and Assessment Act 1979.

52. In order to also ensure retention of (from east to west in the rear yard, along the northern boundary, beyond the northwest corner of the existing dwelling) one multi-trunk *Archontophoenix cunninghamiana* (Bangalow Palm), as well as the large, mature and significant *Washingtonia robusta* (Washington Palm), in good health, the following measures are to be undertaken:
- a. All documentation submitted for the construction certificate application must show the retention of both specimens, with the position and diameter of both of their trunks and canopy/crowns to be clearly shown on all drawings.
 - b. The construction certificate plans will be required to clearly show that the soil levels in the existing garden bed that both palms are growing within along the northern boundary will be maintained, with details to be submitted showing that the new retaining wall will not encroach beyond the eastern edge of this existing garden area.
 - c. Both palms are to be physically protected by the installation of 1.8 metre high steel mesh/chainwire fencing which shall extend from the northern boundary, along the eastern edge of this existing garden bed, then a minimum distance of 1.0 metre off the southern edge of both of their trunks, where it shall return a distance of 1.0 metre to the west of the trunk of the Washington Palm, matching up again with the northern boundary, in order to completely enclose both palms as one group for the duration of the works.
 - d. This fencing shall be installed prior to the commencement of demolition and construction works and shall remain in place until all works are completed, to which signage containing the following words shall be clearly displayed and permanently attached: "TREE PROTECTION ZONE, DO NOT ENTER".
 - e. Within the zone specified in point 'c' above, there is to be no storage of materials or machinery or site office/sheds, nor is cement to be mixed or chemicals spilt/disposed of, and no stockpiling of soil or rubble.
 - f. Any roots encountered during excavations associated with the new retaining wall must be cut cleanly and the affected area backfilled with clean site soil as soon as practically possible.

ADVISORY MATTERS:

- A1 Demolition, building or excavation work must not be commenced until;
- A Construction Certificate has been obtained from Council or an Accredited Certifier
 - Council or an Accredited Certifier has been appointed as the Principal Certifying Authority for the development
 - Council and the Principal Certifying Authority have been given at least 2 days notice (in writing) prior to commencing any works.

Failure to comply with these important requirements is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the *Environmental Planning & Assessment Act 1979*. Alternatively, Council may issue a penalty infringement notice (for up to \$1,500) for each offence.

- A2 A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-
- Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip (greater than 3m in length) or any container or other article.

- A3 Specific details of the location of the building/s should be provided in the Construction Certificate to demonstrate that the proposed building work will not encroach onto the adjoining properties, Council's road reserve or any public place, to the satisfaction of the certifying authority.

- A4 The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

- A5 The assessment of this development application does not include an assessment of the proposed building work under the Building Code of Australia (BCA).

All new building work must comply with the BCA and relevant Australian Standards and details of compliance must be provided in the Construction Certificate application.

- A6 Wherever practicable, in existing buildings, the levels of fire and occupant safety should be upgraded and details incorporated in the Construction Certificate to the satisfaction of the Certifying authority.

Where the levels of accessibility to existing buildings do not meet current standards, if practicable, the level of accessibility should be upgraded in conjunction with the proposed development (e.g. via the installation of a 1:8 access ramp within the building) and details included in the construction certificate application.

Building owners, applicants and builders are advised to speak to the appointed Certifying Authority prior to lodgement of the Construction Certificate.

MOTION: (Andrews/Hughes) CARRIED UNANIMOUSLY - SEE RESOLUTION.

**D47/09 Development Application Report - 2 Second Avenue, Maroubra
(DA/61/2009)**

PL65/09

RESOLUTION: (Andrews/White) that Council's Coordinator Development Assessment under delegated authority from the General Manager, as the consent authority, grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/61/2009 for the construction of an attached garage with trafficable roof terrace area above to the front of the existing dwelling at 2 Second Avenue, Maroubra, subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the Environmental Planning and Assessment Act 1979 and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered 905/09 sheets 1 of 2 and 2 of 2, dated February 2009 and received by Council on 22nd June 2009, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. Colours, materials and finishes of the external surfaces to the garage are to be compatible with the adjacent development to maintain the integrity and amenity of the building and the streetscape.
3. The width of the driveway is to be 3m at the Second Avenue boundary. Details of compliance are to be provided in the construction certificate plans.
4. The driveway is to have a minimum width of 3m, set back at least 1m from the south eastern side boundary, and constructed perpendicular to the front boundary.
5. There must be no encroachment of the structure/s onto Council's road reserve, footway or public place, unless written permission has been obtained from the Council beforehand.
6. Street and unit numbering must be provided to the premises in a prominent position, in accordance with the Australia Post guidelines and AS/NZS 4819 (2003) to the satisfaction of Council, **prior to an occupation certificate being issued** for the development.

The following condition is imposed to satisfy the requirements of the Sydney Water Corporation.

7. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

8. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

9. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

10. All new building work must be carried out in accordance with the provisions of the **Building Code of Australia** (BCA), in accordance with Clause 98 of the *Environmental Planning and Assessment Regulation 2000*.
11. **Prior to the commencement of any building works, a construction certificate** must be obtained from the Council or an accredited certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans & specifications and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

12. **Prior to the commencement of any building works**, the person having the benefit of the development consent must:
 - i) appoint a *Principal Certifying Authority* for the building work, and
 - ii) appoint a *principal contractor* for the building work, or in relation to residential building work, obtain an *owner-builder* permit in accordance with the requirements of the Home Building Act 1989, and notify the *Principal Certifying Authority* and Council accordingly in writing, and
 - iii) unless the person having the benefit of the consent is the *principal contractor* (i.e. *owner-builder*), notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*, and
 - iv) give at least two days notice to the Council, in writing, of the persons intention to commence building works.

In relation to residential building work, the principal contractor must be the

holder of a contractor licence, in accordance with the provisions of the Home Building Act 1989.

13. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected in accordance with section 81A (2) (b1) (ii) of the Environmental Planning & Assessment Regulation 2000 and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

Documentary evidence of the building inspections carried out and details of compliance with Council's consent is to be maintained by the *Principal Certifying Authority*. Details of *critical stage inspections* carried out and copies of certification relied upon must also be forwarded to Council with the *occupation certificate*.

The *principal contractor* or *owner-builder* (as applicable) must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's "Notice of Critical Stage Inspections"*, are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

14. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable)
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
15. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building work** encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The relevant requirements of the Environmental Planning & Assessment Act 1979 and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

16. **Prior to the issuing of an interim or final occupation certificate**, a statement is required to be obtained from the Principal Certifying Authority, which confirms that the development is not inconsistent with the development

consent and the relevant conditions of development consent have been satisfied.

Details of *critical stage* inspections carried out by the principal certifying authority together with any other certification relied upon and must also be provided to Council with the occupation certificate.

17. In accordance with clause 98 of the Environmental Planning and Assessment Regulation 2000, it is a prescribed condition, that in the case of residential building work, a contract of insurance must be obtained and in force, in accordance with the provisions of the Home Building Act 1989.

Where the work is to be done by a licensed contractor, excavation or building work must not be carried out unless the Principal Certifying Authority (PCA):

- has been informed in writing of the licensee's name and contractor number; and
- is satisfied that the licensee has complied with the insurance requirements of Part 6 of the *Home Building Act 1989*, or

Where the work to be done by any other person (i.e. an *owner-builder*), excavation or building work must not be carried out unless the Principal Certifying Authority:

- has been informed of the person's name and *owner-builder* permit number, or
- has been given a declaration, signed by the owner of the land that states that the market cost of the labour and materials involved in the work does not exceed \$5,000.

Details of the principal building contractor and compliance with the provisions of the *Home Building Act 1989* (i.e. *Details of the principal licensed building contractor and a copy of the Certificate of Insurance*) are to be submitted to Council **prior to the commencement of works**, with the notice of appointment of the PCA/notice of intention to commence building work.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

18. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the following regulations:
- The requirements and Guidelines of Work Cover NSW
 - Occupational Health and Safety Act 2000
 - Australian Standard 2601 (2001) – Demolition of Structures
 - The Protection of the Environment Operations Act 1997
 - Protection of the Environment Operations (Waste) Regulation 1996.
19. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Retaining walls, shoring, or piling must be designed and installed in accordance with appropriate professional standards and the relevant requirements of the Building Code of Australia and Australian Standards. Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

20. The adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

If an excavation associated with the erection or demolition of a building extends below the level of the base of the footings of any building located on an adjoining allotment of land, the person causing the excavation must:

- preserve and protect the building/s on the adjoining land from damage; and
- effectively support the excavation and building; and
- at least seven (7) days before excavating below the level of the base of the footings of a building on an adjoining allotment of land (including a public road or public place), give notice of the intention and particulars of the works to the owner of the adjoining land.

Notes

- *This consent and condition does not authorise any trespass or encroachment upon any adjoining or supported land or building whether private or public. Where any underpinning, shoring, soil anchoring (temporary or permanent) or the like is proposed to be carried out upon any adjoining or supported land, the principal contractor or owner-builder must obtain:*
 - a) *the consent of the owners of such adjoining or supported land to trespass or encroach, or*
 - b) *an access order under the Access to Neighbouring Land Act 2000, or*
 - c) *an easement under section 88K of the Conveyancing Act 1919, or*
 - d) *an easement under section 40 of the Land & Environment Court Act 1979, as appropriate.*
- *Section 177 of the Conveyancing Act 1919 creates a statutory duty of care in relation to support of land. Accordingly, a person has a duty of care not to do anything on or in relation to land being developed (the supporting land) that removes the support provided by the supporting land to any other adjoining land (the supported land).*

21. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and between 8.00am to 5.00pm on Saturdays and all building activities are strictly prohibited on Sundays and Public Holidays.

In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like, is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and loss of amenity to nearby residents.

22. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.

Noise and vibration from any rock excavation machinery and pile drivers (or the like) must be minimised by using appropriate plant and equipment and silencers and a construction noise and vibration minimisation strategy, prepared by a suitably qualified consultant is to be implemented during the works, to the satisfaction of the Principal Certifying Authority.

23. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

Temporary site fences are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

The public safety provisions and temporary fences must be in place **prior to the commencement of any demolition, excavation or building works** and be maintained throughout construction.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

24. A Construction Site Management Plan is to be submitted to and approved by the principal certifying authority **prior to the commencement** of demolition, excavation or building works. The site management plan must include the following measures, as applicable to the type of development:

- location and construction of protective fencing/hoardings to the perimeter of the site;
- location of site storage areas/sheds/equipment;
- location of building materials for construction;
- provisions for public safety;
- dust control measures;
- site access location and construction
- details of methods of disposal of demolition materials;
- protective measures for tree preservation;
- provisions for temporary sanitary facilities;
- location and size of waste containers/bulk bins;
- details of proposed sediment and erosion control measures;
- construction noise and vibration management;
- construction traffic management provisions.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain adequate levels of public health and safety. A copy of the approved Construction Site Management Plan must be maintained on site and be made available to Council officers upon request.

25. During construction stages, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by the NSW Department of Housing.

Details of the proposed sediment control measures are to be detailed in the

Construction Site Management Plan which must be submitted to and approved by the principal certifying authority **prior to the commencement of any site works**. The sediment and erosion control measures must be implemented prior to the commencement of any site works and be maintained throughout construction. A copy of the approved details must be forwarded to the Council and a copy is to be maintained on-site and be made available to Council officers upon request.

Details of proposed sediment and erosion control measures shall include; a site plan; indicating the slope of land, access points & access control measures, location and type of sediment & erosion controls, location of existing vegetation to be retained, location of material stockpiles and storage areas, location of building operations and equipment, methods of sediment control, details of drainage systems and details of existing and proposed vegetation.

26. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:
- a. Building materials, sand, soil, waste materials, construction equipment or 5 other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
 - b. Stockpiles of soil, sand, aggregate or other materials must not be located on any footpath, roadway, nature strip, drainage line or any public place and the stockpiles must be protected with adequate sediment control measures.
 - c. Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
 - d. A warning sign for soil and water management must be displayed in a prominent position on the building site, visible to both the public and site workers. The sign must be displayed throughout the construction period. Copies of a suitable warning sign are available at Council's Customer Service Centre for a nominal fee.
 - e. Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.
 - f. Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction prior to occupation or finalisation of the development.

The following conditions are applied to ensure that adequate provisions are made for the management of waste from the development:

27. Adequate provisions are to be made within the premises for the storage and removal of waste and recyclable materials, to the satisfaction of Council and details are to be included in the construction certificate documentation.
28. A construction Waste Management Plan (WMP) must be developed and implemented for the development, to the satisfaction of Council, **prior to the**

commencement of works.

The Waste Management Plan must provide details of the type and quantities of demolition and construction waste materials, proposed re-use and recycling of materials, methods of disposal and details of recycling outlets and land fill sites.

Where practicable waste materials must be re-used or recycled, rather than disposed and further details of Council's requirements including relevant guidelines and pro-forma WMP forms can be obtained from Council's Customer Service Centre or by telephoning Council on 9399 0999.

Details and receipts verifying the recycling and disposal of materials must be kept on site at all times and presented to Council officers upon request.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

29. Prior to the issuing of a final occupation certificate the applicant must meet the full cost for Council or a Council approved contractor to:
 - a. Construct concrete vehicular crossing and layback at kerb opposite the vehicular entrance to the site.
30. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.
31. The applicant shall note that all external work, carried out on Council property, shall be in accordance with Council's Policy for "Vehicular Access and Road and Drainage Works". An application for the cost of the Council civil works is to be submitted to Council at the completion of the internal building works. An application fee shall be payable to Council for the quotation of the required works. The applicant may elect to use his contractor for the required works, subject to Council approval, however a design and supervision fee based on the lowest quotation from Council's nominated contractor will be required to be paid prior to the commencement of any works.

The following conditions are applied to provide adequate provisions for future civil works in the road reserve:

32. The Council's Development Engineer has inspected the above site and has determined that the design alignment level (concrete/paved/tiled level) at the property boundary for the proposed garage slab shall be as follows:
 - **Not greater than 600mm above the Council footpath level directly opposite the eastern edge of the proposed garage opening.**

The design alignment level at the property boundary must be strictly adhered to.
33. The design alignment levels (concrete/paved/tiled level) issued by Council and their relationship to the footpath must be indicated on the building plans for the construction certificate.
34. The above alignment levels and the site inspection by Council's Development Engineer have been issued at a prescribed fee of \$121.00 (inclusive of GST).

This amount is to be paid prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate consideration for service authority assets:

35. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
36. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

37. That part of the nature-strip upon Council's footway which is damaged during the construction of the proposed works shall be excavated to a depth of 150mm, backfilled with topsoil equivalent with 'Organic Garden Mix' as supplied by Australian Native Landscapes, and re-turfed with Kikuyu Turf or similar. Such works shall be installed prior to the issue of a final Occupation Certificate.

Tree Management

38. Approval is granted for the applicant/owner to remove the Bottlebrush Street Tree adjacent to the proposed Council vehicular crossing subject to the owner planting a 1 x 45 litre replacement Bottlebrush tree further west of the vehicular crossing.

Note: The existing Council street tree should be removed when construction of the Council vehicular crossing commences.

The following condition is applied to protect the privacy of the adjacent property:

39. A planter box is to be provided along the entire south eastern edge of the garage roof terrace adjacent to the adjoining residential flat building at No. 4 Second Avenue. The planter box is to be suitably constructed and provided with sufficient screen planting to a height of 1.8m to preserve the privacy of the adjoining property. Details of compliance are to be demonstrated in construction certificate plans.

ADVISORY MATTERS:

- A1 **Building or excavations works must not be commenced until a construction certificate has been obtained from Council's Building Certification Services or an Accredited Certifier and either Council's Building Certification Services or an Accredited Certifier has been appointed as the Principal Certifying Authority (PCA) for this development.**

Failure to obtain a Construction Certificate and appoint a PCA before commencing works is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the Environmental Planning & Assessment Act 1979.

- A2 A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-
- Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip or any other container or article.
- A3 The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

MOTION: (Smith/Woodsmith) that Council's Coordinator Development Assessment under delegated authority from the General Manager, as the consent authority, refuse development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/61/2009 for the construction of an attached garage with trafficable roof terrace area above to the front of the existing dwelling at 2 Second Avenue, Maroubra, for the following reason:

- The alignment of the garage in front of the building line is not in accordance with Council's policy. **LOST**

D49/09 Development Application Report - 73-109 Belmore Road, Randwick (DA/251/2009)

Having declared interests in this item earlier in the meeting, Councillors Smith and Stevenson left the meeting (at 8.18pm) and did not take part in the debate or the vote on the matter.

PL66/09

RESOLUTION: (Andrews/Hughes) that Council as the consent authority grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/251/2009 to change the use of the existing tenancy in Royal Randwick Shopping Centre to TAB outlet, fit-out, alterations to shop front and associated signage at 73-109 Belmore Road, Randwick subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the *Environmental Planning & Assessment Act 1979* and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered DA000, DA102 (Rev. 1), DA001 (Rev.2), DA101 (Rev.3), DA301 (Rev.3), dated 27/04/09, DA501 (Rev.3), DA502 (Rev.3), DA503 (Rev.3), dated 11/05/09 & A002 dated 04/16/09, and all received by Council on 12 May 2009, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The Plan of Management submitted to Council by JBA Planning consultants on 18 June 2009 is to be updated to incorporate details of how the TAB will discourage patrons from smoking & loitering in the public domain areas adjacent to the premises. The TAB shall be operated in general accordance with the undated Plan of Management
3. This consent shall cease to operate six (6) months from the date of the issue of an occupation certificate, if any of the existing three TAB's in the Randwick area (Shop 2, No. 67-69 Frenchmans Road; Shop 3, No. 130 Belmore Road, (Randwick Plaza), & No. 22 Silver Street) are still operational.
4. The proposed projection screen for sports viewing outside of the store in Short Street shall be deleted. The plans submitted for the construction certificate shall demonstrate compliance with this requirement.
5. The hours of the operation of the business are restricted to:

Monday through to Saturday, inclusive from: 8.30am to 11.00pm.
Sundays, from: 8.30am to 7.00pm.
6. All external illuminated signage on the premises shall be turned off at the close of business each day. The signage may only be illuminated during the approved hours of operation.
7. The proposed LED scrolling band signs located above the entry door and above the window along the Avoca Street frontage shall be deleted as they may distract motorists. The plans submitted for the construction certificate shall demonstrate compliance with this requirement.
8. The external signage and lighting shall be designed so as not to cause a nuisance to nearby residents or motorists and to ensure that light overspill does not affect the amenity of the area.

9. Matching graphics are to be provided to each of the two larger Avoca Street shopfronts (in general accordance with the darker, southern-most graphic shown on the submitted plans) in order to reinforce the consistent façade treatment of the existing retail complex and minimise visual complexity in the streetscape. Amended drawings are to be submitted to and approved by Council's Director City Planning, in accordance with Section 80A (2) of the Environmental Planning and Assessment Act 1979 prior to a construction certificate being issued for the development.
10. The entirety of the aluminium framing to the tenancy shopfronts is to be repainted in a single colour. Details of the proposed colour scheme are to be submitted to and approved by Council's Director City Planning, in accordance with Section 80A (2) of the Environmental Planning and Assessment Act 1979 prior to a construction certificate being issued for the development.
11. The proposed under-awning signs are to have maximum dimensions of 1800mm wide by 350mm deep. The underside of the signs is to align with the bottom of the masonry bulkhead and be located 300mm from it. Amended drawings are to be submitted to and approved by Council's Director City Planning, in accordance with Section 80A (2) of the Environmental Planning and Assessment Act 1979 prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

12. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.

The following condition is imposed to satisfy relevant requirements of the Sydney Water Corporation.

13. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition/s are applied to meet additional demands for public facilities;

14. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, the following monetary levy must be paid to Council.

Category	Cost	Applicable Levy	S94A Levy
Development Cost More than \$200,000	\$385,000	1.0%	\$3850

The levy must be paid in cash, bank cheque or by credit card prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are applied to ensure that the development satisfies the provisions of the *Environmental Planning and Assessment Act 1979* and Regulations and to provide for reasonable levels of health, safety and amenity:

15. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of 'on-the-spot' penalty infringements or service of a notice and order by Council.

16. All new building work must be carried out in accordance with the provisions of the **Building Code of Australia** (BCA), in accordance with Clause 98 of the *Environmental Planning and Assessment Regulation 2000*.

17. **Prior to the commencement of any building works** (including fit-out works), a **construction certificate** must be obtained from the Council's Building Certification Services or an Accredited Certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans & specifications and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

18. **Prior to the commencement of any building works** (including fit-out), the person having the benefit of the development consent must:-

- i) appoint a *Principal Certifying Authority*, and
- ii) appoint a *principal contractor* for the work, and notify the *Principal Certifying Authority* and Council accordingly in writing, and
- iii) notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*, and
- iv) give at least two days notice to the Council, in writing, of the person's intention to commence building works.

19. The work must be inspected by the *Principal Certifying Authority* (or another

certifying authority if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected in accordance with section 81A (2) (b1) (ii) of the Environmental Planning & Assessment Regulation 2000 and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

Documentary evidence of the building inspections carried out and details of compliance with Council's consent is to be maintained by the *Principal Certifying Authority*. Details of *critical stage inspections* carried out and copies of certification relied upon must also be forwarded to Council with the *occupation certificate*.

The *principal contractor* must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's* "Notice of Critical Stage Inspections", are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

20. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours,
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
21. An **Occupation Certificate** must be obtained from the Principal Certifying Authority prior to any occupation of the building work encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The requirements of the Environmental Planning & Assessment Act 1979 and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

22. The required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

23. The existing levels of fire safety within the building are to be upgraded **prior to issuing an occupation certificate**, in accordance with the following requirements and relevant provisions of the Building Code of Australia (BCA), as applicable,:
- a) Provide an emergency lighting system in accordance with clause E4.2 & E4.4 of the BCA,
 - b) Provide exit signs in accordance with clause E4.5 & E4.7 of the BCA,
 - c) Provide suitable portable fire extinguishers and fire blankets within the premises and adjacent to the electrical switchboard in accordance with clause E1.6 of the BCA,
 - d) Enclose the electrical switchboard in a smoke sealed, non combustible enclosure,

Details of the abovementioned works must be included in the Construction Certificate, which must be obtained from Council's Building Certification Services or an Accredited Certifier, prior to carrying out any works,

24. Upon completion of the fire safety upgrading works and **prior to the issuing of an occupation certificate**, a single, complete *fire safety certificate* is to be submitted to Council. A copy of the fire safety certificate and fire safety schedule are to be displayed in a prominent position within the building (i.e. entrance area) and a copy is to be forwarded to the NSW Fire Brigades, in accordance with the provisions of the Environmental Planning and Assessment Act 1979.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

25. Demolition work and the removal, storage, handling and disposal of building materials must be carried out in accordance with the following requirements (as applicable):
- Australian Standard 2601 (2001) – Demolition of Structures
 - Occupational Health and Safety Act 2000
 - Occupational Health and Safety (Hazardous Substances) Regulation 2001
 - Occupational Health and Safety (Asbestos Removal Work) Regulation 2001
 - WorkCover NSW Codes of Practice and Guidelines
 - The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 1996.
 - Randwick City Council Asbestos Policy (adopted 13 September 2005).
26. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and (except as detailed below) between 8.00am to 5.00pm on Saturdays.

All building, demolition and associated site works are strictly prohibited on Sundays, Public Holidays and also on Saturdays adjacent to a Public Holiday.

In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and

loss of amenity to nearby residents.

27. Public health, safety and convenience must be maintained at all times during demolition, building and fit-out works.
28. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.
29. The roadway, footpath and nature strip must be maintained in a good, safe condition and free from any obstructions, construction equipment, building or waste materials, soil, sand or debris at all times. Any damage caused to the road, footway or nature strip must be repaired immediately, to the satisfaction of Council.
30. A Road Opening Permit must be obtained from the Council and other relevant Authorities beforehand, if it is proposed to excavate or open-up the road or footway for services or the like.
31. Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health, Building & Regulatory Services department.
32. Public safety must be maintained at all times and public access to demolition/building works, materials and equipment on the site is to be restricted. If required, a temporary 1.8m high safety fence or hoarding is to be provided to protect the public, located between the work site and the public place. An awning may also be required to prevent any substance from, or in connection with, the work from falling into the public place or adjoining premises.

Temporary fences or hoardings or the like are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

If it is proposed to locate any hoardings, site fencing or amenities upon any part of the footpath, nature strip or any public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

The public safety provisions and temporary fences or hoardings must be in place prior to the commencement of any demolition, excavation or building works and be maintained throughout construction.

33. A Construction Site Management Plan is to be developed and implemented **prior to the commencement of any works**. The site management plan must include the following measures, as applicable to the type of development:
 - location and construction of protective fencing/hoardings to the perimeter of the site;
 - location of site storage areas/sheds/equipment;
 - location of building materials for construction;
 - provisions for public safety;
 - dust control measures;
 - site access location and construction
 - details of methods of disposal of demolition materials;

- protective measures for tree preservation;
- provisions for temporary sanitary facilities;
- location and size of waste containers/bulk bins;
- details of proposed sediment and erosion control measures;
- construction noise and vibration management;
- construction traffic management details.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and amenity to the satisfaction of Council. A copy of the Construction Site Management Plan must be provided to the Principal Certifying Authority and Council. A copy must also be maintained on site and be made available to Council officers upon request.

The following conditions are applied to satisfy the relevant pollution control criteria and to maintain reasonable levels of health, safety and amenity to the locality:

34. The use and operation of the premises shall not give rise to an environmental health or public nuisance, vibration or, result in an offence under the *Protection of the Environment Operations Act 1997 and Regulations*.
35. The use of the premises and the operation of all plant and equipment shall not give rise to an 'offensive noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the premises and plant and equipment shall not give rise to a sound pressure level at any affected premises that exceeds the background ($L_{A90}, 15 \text{ min}$ noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A). The source noise level shall be assessed as an $L_{Aeq, 15 \text{ min}}$ and adjusted in accordance with the NSW Environmental Protection Authority's Industrial Noise Policy 2000 and Environmental Noise Control Manual (sleep disturbance).

The following conditions have been applied to ensure compliance with Local Government Legislation and Policies of Council:

36. The premises must be registered with the Council for the sale of food and the relevant Registration Form is to be completed by the operator and together with the appropriate fee, is to be forwarded to the Council **prior to issuing any occupation certificate** for the development.
Note: only pre-packaged food may be sold from the premises.

The following conditions are applied to provide appropriate access and facilities to the premises:

37. Access and facilities for people with disabilities must be provided to new building work in accordance with any relevant provisions of the Building Code of Australia, to the satisfaction of the Certifying Authority and details are to be provided with the Construction Certificate application.

The following conditions are applied to provide adequate provisions for waste management:

38. Adequate provisions are to be made within the premises for the storage, collection and disposal of trade/commercial waste and recyclable materials, to the satisfaction of Council.

Trade/commercial waste materials must not be disposed in or through

Council's domestic garbage service. All trade/commercial waste materials must be collected by Council's Trade Waste Service or a waste contractor authorised by the Waste Service of New South Wales and details of the proposed waste collection and disposal service are to be submitted to Council **prior to commencing operation of the business.**

The operator of the business must also arrange for the recycling of appropriate materials and make the necessary arrangements with an authorised waste services contractor accordingly.

ADVISORY MATTERS:

- A1 The applicant is advised that the Construction Certificate plans and specification must comply with the provisions of the Building Code of Australia (BCA).

In this regard, the development consent plans do not show compliance with the deemed-to-satisfy provisions of the BCA. Details of compliance with the relevant provisions of the Building Code of Australia and conditions of development consent are to be provided in the plans and specifications for the construction certificate.

You are also advised to ensure that the development is not inconsistent with Council's consent and if necessary consult with Council's Building Certification Services or your accredited certifier prior to submitting your construction certificate application to enable these matters to be addressed accordingly.

- A2 The applicant/owner is advised that this approval does not guarantee compliance with the provisions of the Disability Discrimination Act 1992 and the applicant should therefore consider their liability under the Act. In this regard, the applicant is advised that compliance with the requirements of the Building Code of Australia and Australian Standard 1428.1 - Design for Access and Mobility does not necessarily satisfy the objectives of the Disability Discrimination Act 1992.

The applicant/owner is requested to give consideration to providing access and facilities for people with disabilities in accordance with Australian Standard 1428 Parts 1, 2, 3 and 4 - Design for Access and Mobility, which may be necessary to satisfy the objectives of the Disability Discrimination Act 1992.

- A3 The applicant shall be advised that Council may, in the future, be implementing a new policy (under Section 611 of the Local Government Act) wherein fees may apply for advertising in public airspace.
- A4 The applicant is to consider replacing the existing shopfront glazing with full height glazing to be consistent with the Design Guidelines for external shopfronts and signage, which has been produced by the owners of the retail complex. This will ensure consistency with other new shopfronts in the centre.
- A5 The applicant shall be advised that Council may, in the future, be implementing a new policy (under Section 611 of the Local Government Act) wherein fees may apply for advertising in public airspace.

MOTION: (Andrews/Hughes) CARRIED - SEE RESOLUTION.

A **DIVISION** was taken and the names of the Councillors voting FOR and AGAINST were as follows:

FOR

Councillor Andrews
 Councillor Matson
 Councillor Matthews
 Councillor Procopiadis
 Councillor Seng
 Councillor White

Total (6)**AGAINST**

Councillor Belleli
 Councillor Hughes

 Councillor Woodsmith

Total (4)

Councillors Smith and Stevenson returned to the meeting at 8.20pm

Miscellaneous Reports**M9/09 Miscellaneous Report - Restrictions on Smoking in Outdoor Dining Areas (F2004/07507)**

PL67/09 **RESOLUTION: (Andrews/Hughes) that:**

- a) Council adopts the draft amendments to the 'Smoking in the Public Place' Policy;
- b) new controls be incorporated in the appropriate section of the proposed Comprehensive Development Control Plan requiring the provision of a minimum of 50% of any new outdoor seating as 'non smoking' when 11 or more outdoor dining seats are proposed; and
- c) the restriction on smoking in outdoor dining areas be included in the proposed public awareness programme.

MOTION: (Andrews/Hughes) CARRIED UNANIMOUSLY - SEE RESOLUTION.

M11/09 Miscellaneous Report - Planning changes for the Port Botany and Matraville Industrial Area (F2008/00320)

PL68/09 **RESOLUTION: (Hughes/Andrews)** that Council endorse the attached letter to the Department of Planning, noting the potential significant community and environmental impacts this SEPP amendment has created and seeking urgent consideration of the reinstatement of 'buffer' controls to reduce the potential impact of industrial development on the adjoining residential areas.

MOTION: (Hughes/Andrews) CARRIED UNANIMOUSLY - SEE RESOLUTION.

Notices of Rescission Motions

Nil

The meeting closed at 8.23pm.

The minutes of this meeting were confirmed at the Planning Committee Meeting of the Council of the City of Randwick held on Tuesday, 8 September 2009.
