

**MINUTES OF PLANNING COMMITTEE MEETING OF THE
COUNCIL OF THE CITY OF RANDWICK HELD ON
TUESDAY, 8 MARCH 2011 AT 6:25PM**

Present:

The Mayor, Councillor M Matson (East Ward)

North Ward	- Councillors K Smith, P Tracey & M Woodsmith
South Ward	- Councillors R Belleli, C Matthews & A White
East Ward	- Councillors T Bowen & B Notley-Smith
West Ward	- Councillors B Hughes (Deputy Chairperson), J Procopiadis & S Nash
Central Ward	- Councillors A Andrews & T Seng (Chairperson) & G Stevenson

Officers present:

General Manager	Mr R Brownlee
Director City Services	Mr J Frangoples
Director City Planning	Ms S Truvert
Director Governance & Financial Services	Mr G Banting
Manager Development Assessment	Mr K Kyriacou
Senior Administrative Coordinator	Ms J Hartshorn

The meeting was adjourned at 6.25pm and was resumed at 6.47pm.

Apologies/Granting of Leave of Absences

Nil.

Confirmation of the Minutes

**CONFIRMATION OF THE MINUTES OF THE PLANNING COMMITTEE MEETING
HELD ON TUESDAY 8 FEBRUARY 2011**

PL16/11

RESOLUTION: (Belleli/Andrews) that the Minutes of the Planning Committee Meeting held on Tuesday 8 February 2011 (copies of which were circulated to all Councillors) be and are hereby confirmed as a correct record of the proceedings of that meeting.

Declarations of Pecuniary and Non-Pecuniary Interests

- a) Cr Nash declared a significant non pecuniary interest in Item D22/11 as he has a professional relationship with the applicant's Town Planner. Cr Nash indicated that he would not take part in the debate or the vote on the matter.
- b) Cr Tracey declared a non significant non pecuniary interest in Item D14/11 as he knows the Member for Coogee, Paul Pearce, MP (who made a submission in relation to the application on behalf of one of his constituents).
- c) Cr Bowen declared a non significant non pecuniary interest in Item D14/11 as he knows the Member for Coogee, Paul Pearce, MP (who made a submission in relation to the application on behalf of one of his constituents).
- d) Cr Matson declared a non significant non pecuniary interest in Item D18/11 as his daughter attends a school in the vicinity of the application.
- e) Cr Smith declared a non significant non pecuniary interest in Item D19/11 as he lives in Clifton Road, Clovelly.
- f) Cr Smith declared a non significant non pecuniary interest in Item D14/11 as his parents own a property in the vicinity of the application.
- g) Cr Matthews declared a non significant non pecuniary interest in Item D14/11 as he knows the applicant.
- h) Cr Notley-Smith declared a non significant non pecuniary interest in Item D14/11 as several years ago he had a business relationship with GK Strata Management (who made a submission in relation to the application).

Address of Council by Members of the Public

Prior to consideration of the Agenda by the Committee, deputations were received in respect of the following matters:

D14/11 2 WOLSELEY ROAD, COOGEE

Objector Caroline Mock (representing the objectors)

Applicant Gary Shiels (representing the applicant)

D15/11 21 GOVETT STREET, RANDWICK

Objector Anthony Betros (representing the objectors)

Applicant Michael Neustein (representing the applicant)

D16/11 39 WAVERLEY STREET, RANDWICK

Objector Sue McFarlane

Applicant Con Harris (representing the applicant)

D17/11 21 HELENA STREET, RANDWICK

Objector Robert Ralph

Applicant Ben Dermody

D18/11 25 DINE STREET, RANDWICK

Applicant Anthony Betros (representing the applicant)

D21/11 205 OBERON STREET, COOGEE

Applicant Graham Lay

D22/11 44 ADAMS AVENUE, MALABAR

Applicant Ebram Sadikoen

D23/11 37 THE CORSO, MAROUBRA

Applicant Tony Moody (representing the applicant)

The meeting was adjourned at 7.55pm and was resumed at 8.15pm.

Urgent Business

Nil.

Development Application Reports

D14/11 Development Application Report - 2 Wolseley Road, Coogee (DA/12/2009)

PL17/11 **RESOLUTION: (Mayor, Cr Matson/Andrews)** that the application be deferred to enable legal advice to be obtained in relation to whether application falls outside the legislative timing for review and whether the current application is substantially the same as the previous application.

MOTION: (Mayor, Cr Matson/Andrews) CARRIED - SEE RESOLUTION.

D17/11 Development Application Report - 21 Helena Street, Randwick (DA/1041/2010)

PL20/11

RESOLUTION: (Andrews/Matthews) –

- A. That Council supports the objections under State Environmental Planning Policy No. 1 – Development Standards in respect to non-compliance with Clauses 20F & 20G of Randwick Local Environmental Plan 1998, relating to floor space ratio and building height respectively, on the grounds that the proposed development complies with the objectives of the above clauses, and will not adversely affect the amenity of the locality, and that the Department of Planning be advised accordingly.
- B. That Council grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No 1041/2010 for alterations and additions to the existing dwelling at 21 Helena Street Randwick subject to the following conditions;

The following conditions are applied to satisfy the provisions of section 79C of the *Environmental Planning & Assessment Act 1979* and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered 7244/10, sheets 1-6, dated 22/11/2010 and received by Council on the 25th November 2010, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The external materials, colours and finishes of the building are to be consistent with the submitted external colours and finishes dated 17th November 2010 received with the application on the 25th November 2010.
3. Open-able windows to a room, corridor, stairway or the like with a floor level more than 4m above the external ground/surface level, must be designed and constructed to reduce the likelihood of a child accessing and falling through the window opening.

Options may include one or more of the following measures:

- i) The window having a minimum sill height of 1.5m above the internal floor level,
 - ii) Providing a window locking device at least 1.5m above the internal floor level,
 - iii) Fixing or securing the window (e.g. by screws or a window locking device) to restrict or to be able to secure the extent of the opening to a maximum of 125mm,
 - iv) Installing a fixed heavy-duty gauge metal screen over the opening (e.g. A metal security screen or metal security mesh and frame system, but not standard fly-screen material),
 - v) Other appropriate effective safety measures or barrier.
4. To prevent direct overlooking into the adjoining properties privacy screens are to be installed to the sides of the proposed Juliet style balcony to the rear of the dwelling. The privacy screens are to be of timber lattice, timber slats or obscured glazing. Any openings in the screen are to be no more than 25mm with a total area of openings not exceeding 25% of the area of the screen. The privacy screens are to be installed prior to the occupation of the upper level addition. Details are to be provided with the Construction Certificate.
5. To restrict the potential for overlooking into private living areas of the adjoining property the deck to the side of the dwelling is to be reduced in length to a maximum of 5m as measured from the northern edge of the ground floor addition, exclusive of the entry steps. The deck at the rear of the dwelling, including the steps to the rear yard, is to be reduced in width to align with the south eastern corner of the ground floor at the rear of the dwelling. Details are to be provided with the Construction Certificate.

The following condition is imposed to satisfy relevant requirements of the Sydney Water Corporation.

6. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition is applied to meet additional demands for public facilities;

7. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, based on the development cost of \$ 364 252 the following applicable monetary levy must be paid to Council: \$ 3 642.50.

The levy **must be paid in cash, bank cheque or by credit card** prior to a

construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

8. In accordance with Section 80A (11) of the *Environmental Planning and Assessment Act 1979* and Clause 97A of the *Environmental Planning and Assessment Regulation 2000*, it is a prescribed condition that all of the required commitments listed in the relevant BASIX Certificate for this development are fulfilled.
9. In accordance with the provisions of the *Environmental Planning & Assessment Regulation 2000*, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

10. The following provisions are to be implemented in accordance with the relevant BASIX Certificate and details are to be included in the Construction Certificate documentation (as applicable), to the satisfaction of the Certifying Authority:
 - Stormwater management (i.e. rainwater tanks)
 - Water efficiency (i.e. triple A rated taps and showers, dual flush toilets and water re-use)
 - Landscaping provisions
 - Thermal comfort (i.e. construction materials, glazing and insulation)
 - Energy efficiency (i.e. cooling & heating provisions and hot water systems)
11. In accordance with Clause 154B of the *Environmental Planning & Assessment Regulation 2000*, a Certifying Authority must not issue an Occupation Certificate for this development, unless it is satisfied that each of the required BASIX commitments have been fulfilled.

Relevant documentary evidence of compliance with the BASIX commitments is to be forwarded to the Council upon issuing an Occupation Certificate.

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

12. Surface water/stormwater must be drained and discharged to the street gutter or suitably designed absorption pit, to the satisfaction of the Certifying

Authority and details are to be included in the construction certificate application for the development.

Absorption pits must be located not less than 3m from any adjoining premises and the stormwater must not be directed or flow onto any adjoining premises or cause a nuisance.

Details of any works proposed to be carried out in or on a public road/footway are to be submitted to and approved by Council prior to commencement of works.

13. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

14. The requirements and provisions of the *Environmental Planning & Assessment Act 1979* and *Environmental Planning & Assessment Regulation 2000*, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

15. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the provisions of the Building Code of Australia (BCA).

16. **Prior to the commencement of any building works**, the following requirements must be complied with:

- a) a Construction Certificate must be obtained from the Council or an accredited certifier, in accordance with the provisions of the *Environmental Planning & Assessment Act 1979*.

A copy of the construction certificate, the approved development consent plans and consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

- b) a *Principal Certifying Authority* (PCA) must be appointed to carry out the necessary building inspections and to issue an *occupation certificate*; and
- c) a *principal contractor* must be appointed for the building work, or in relation to residential building work, an *owner-builder* permit may be obtained in accordance with the requirements of the *Home Building Act 1989*, and the PCA and Council are to be notified accordingly; and
- d) the *principal contractor* must be advised of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*; and
- e) at least two days notice must be given to the Council, in writing, prior to

commencing building works.

17. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the *Environmental Planning & Assessment Act 1979* and clause 162A of the *Environmental Planning & Assessment Regulation 2000*, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

18. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:

- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable);
- name, address and telephone number of the *Principal Certifying Authority*; and
- a statement stating that "unauthorised entry to the work site is prohibited".

19. The relevant requirements of the *Home Building Act 1989* must be complied with, in accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*.

Details of the Licensed Building Contractor (and a copy of any relevant Certificate of Insurance) or a copy of the Owner-Builder Permit (as applicable) must be provided to the Principal Certifying Authority and Council **prior to commencement of works**.

20. The required Long Service Levy payment, under the *Building and Construction Industry Long Service Payments Act 1986*, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the *Environmental Planning & Assessment Act 1979*.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

21. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building work** encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the *Environmental Planning & Assessment Act 1979*.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The requirements of the *Environmental Planning & Assessment Act 1979* and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

22. Smoke alarms are required to be installed in each Class 1 building or residential dwelling in accordance with the relevant provisions of Part 3.7.2 of the B.C.A. – Housing Provisions.

Smoke alarms must comply with AS3786 – Smoke alarms and be connected to the consumer mains electric power supply and provided with a battery back-up.

Details of compliance with the provisions of the Building Code of Australia must be included in the plans/specification for the **construction certificate**.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

23. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the relevant requirements of WorkCover NSW, the NSW Department of Environment & Climate Change (formerly EPA) and Randwick City Council policies, including:

- Occupational Health and Safety Act 2000 & Regulations
- WorkCover NSW Guidelines & Codes of Practice
- Australian Standard 2601 (2001) – Demolition of Structures
- The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 2005
- Relevant DECC/EPA Guidelines
- Randwick City Council Asbestos Policy (adopted 13 September 2005)

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

24. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

25. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 E of the *Environmental Planning & Assessment Regulation 2000*, it is a prescribed condition that the adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

- a) If the development involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development must, at the person's own expense:

- i) protect and support the adjoining premises from possible damage from the excavation, and
- ii) where necessary, underpin the adjoining premises to prevent any such damage.

- b) The condition referred to in subclause 1) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.

26. A dilapidation report prepared by a professional engineer, building surveyor or other suitably qualified independent person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the *zone of influence* of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
 - new dwellings or additions to dwellings sited up to shared property boundaries (e.g. additions to a semi-detached dwelling or a terraced dwelling),
 - excavations for new dwellings, additions to dwellings, swimming pools or the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,
 - as otherwise may be required by the Principal Certifying Authority.

The report (including photographs) are required to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works. A copy of the dilapidation report is to be given to the owners of the premises encompassed in the report/s before commencing any works.

27. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and between 8.00am to 5.00pm on Saturdays and all building activities are strictly prohibited on Sundays and Public Holidays.
28. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant requirements of the *Protection of the Environment Operations Act 1997* and NSW DECC Guidelines must be satisfied at all times.
29. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied, to the satisfaction of Council.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

30. A Construction Site Management Plan is to be developed and implemented **prior to the commencement of any works**. The site management plan must include the following measures, as applicable to the type of development:

- location and construction of protective fencing / hoardings to the perimeter of the site;
- location of site storage areas/sheds/equipment;
- location of building materials for construction;
- provisions for public safety;
- dust control measures;
- site access location and construction
- details of methods of disposal of demolition materials;
- protective measures for tree preservation;
- provisions for temporary sanitary facilities;
- location and size of waste containers/bulk bins;
- details of proposed sediment and erosion control measures;
- construction noise and vibration management;
- construction traffic management details.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and amenity to the satisfaction of Council.

A copy of the Construction Site Management Plan must be provided to the Principal Certifying Authority and Council. A copy must also be maintained on site and be made available to Council officers upon request.

The sediment and erosion control measures are to be in accordance with the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to the satisfaction of Council and details are to be provided in the Construction Site Management Plan.

31. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:
- a) Building materials, sand, soil, waste materials, construction equipment or other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
 - b) Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
 - c) Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.
 - d) Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction.

ADVISORY MATTERS:

A1 Demolition, building or excavation work must not be commenced until;

- A Construction Certificate has been obtained from Council or an Accredited Certifier
- Council or an Accredited Certifier has been appointed as the Principal

Certifying Authority for the development

- Council and the Principal Certifying Authority have been given at least 2 days notice (in writing) prior to commencing any works.

Failure to comply with these important requirements is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the *Environmental Planning & Assessment Act 1979*. Alternatively, Council may issue a penalty infringement notice (for up to \$1,500) for each offence.

A2 A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-

- Install or erect any site fencing, hoardings or site structures
- Operate a crane or hoist goods or materials over a footpath or road
- Placement of a waste skip (greater than 3m in length) or any container or other article.

A3 This determination does not include an assessment of the proposed works under the Building Code of Australia (BCA) and other relevant Standards. All new building work (including alterations and additions) must comply with the BCA and relevant Standards and you are advised to liaise with your architect, engineer and building consultant prior to lodgement of your construction certificate

MOTION: (Matson/-) that the application be deferred for mediation in relation to:

- the proposed decking on the eastern side of the development;
- the proposed bi-fold doors on the eastern side of the development; and
- the possibility of reducing the impact of the development on the western neighbour by negotiating a setback on the upper floor extension at the rear.

LAPSED for want of a seconder.

AMENDMENT: (Matson/Stevenson) that the staff recommendation be adopted, subject to:

- the proposed decking on eastern side of the development being removed; and
- the proposed bi-fold doors on eastern side of the development being removed and replaced with windows to the satisfaction of the Director City Planning.

LOST.

**D18/11 Development Application Report - 25 Dine Street, Randwick
 (DA/807/2010)**

PL21/11

RESOLUTION: (Nash/Procopiadis) -

A. That Council support the objections under State Environmental Planning No. 1 (SEPP No.1) in respect to non-compliance with Clause 20F and Clause 20G of the Randwick Local Environmental Plan 1998 (Consolidation), relating to maximum floor space ratio, building height and external wall height, on the grounds that the proposed development is consistent with the relevant objectives of the clauses and will not adversely affect the amenity of the surrounding locality and that the Department of Planning be advised accordingly.

and

B. That Council as the responsible authority grant its development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No DA807/2010 for the demolition of existing dwelling and construction of a new three storey multi-unit housing development containing 5 units with basement parking for 7 vehicles at 25 Dine Street, Randwick, subject to the following conditions:

1. The development must be implemented substantially in accordance with the plans numbered D00, D01, D02, D03, D04, D05, and D06 all Revision D, dated 8 December 2010, and stamped received by Council on 21 December 2010, and the application form, and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:

The following conditions are applied to satisfy the provisions of section 79C of the Environmental Planning and Assessment Act 1979 and to maintain reasonable levels of environmental amenity:

2. The colours, materials and finishes of the external surfaces to the proposed development are to be compatible with adjacent developments to maintain the

integrity and amenity of the building and the streetscape. Specifically, the use of brick material rather than the proposed predominantly rendered and painted surface shall be provided and a consistent external treatment of the front façade to Dine Street between all levels shall be undertaken.

Details of the proposed colours, materials and textures (i.e. a schedule and brochure/s or sample board) are to be submitted to and approved by Council's Director of City Planning, in accordance with section 80A (2) of the *Environmental Planning and Assessment Act 1979* prior to a construction certificate being issued for the relevant building works.

3. Details of bicycle storage as required in the Development Control Plan – Parking shall be submitted to and approved by Council's Director City Planning Council prior to a Construction Certificate being issued for the development in accordance with section 80A (2) of the Environmental Planning and Assessment Act 1979 prior to a construction certificate being issued for the development.
4. The following amendments to the proposal shall be undertaken:
 - Provision of operable "vental" type blinds to provide adequate privacy from the street and control western sun.
 - Provision of fire protection devices for opening exposed to the side boundaries comprising open sensor triggered fire shutters within colorbond box approximately 100mm x 100mm as indicated in the e-mail to Council dated 22 February 2011.
 - Installation of weather protection to openings in the southern elevation and sunshading devices to north facing openings.
 - Installation of ventilating clerestory skylights in the roof design and capture winter sun. Drawings should indicate thickness for good thermal insulation and appropriate falls.
 - Installation of downpipes in risers (that is, not exposed on the exterior of the building).
 - Installation of 1.8m high privacy screens to the southern edge of the east facing balconies to Units 2 and 4 which shall be measured from the finished floor level of the balconies.
 - Details of front fence to comply with the relevant fence controls contained in the DCP – Multi-unit housing.

Details shall be submitted to and approved by Council's Director City Planning prior to a Construction Certificate being issued for the development in accordance with section 80A (2) of the Environmental Planning and Assessment Act 1979 prior to a construction certificate being issued for the development.

5. Street numbering must be provided to the premises in a prominent position, to the satisfaction of Council.
6. The reflectivity index of glass used in the external façade of the development must not exceed 20 percent.
7. Lighting to the premises shall be designed in accordance with AS4282 – 1997 Control of the Obtrusive Effects of "Outdoor Lighting" so as not to cause a nuisance to nearby residents or motorists and to ensure that light overspill does not affect the amenity of the area.
8. In accordance with the provisions of clauses 143A and 154A of the Environmental Planning & Assessment Regulation 2000, a 'Design Verification Certificate' must be provided to the Certifying Authority and the Council, prior to issuing a construction certificate and an occupation certificate, respectively.

9. Public access to the visitor's carparking spaces is to be maintained at all times and an intercom system is to be provided adjacent to the vehicular entrance to the carpark, together with appropriate signage providing instructions for use.
10. In accordance with Section 80A (11) of the Environmental Planning and Assessment Act 1979 and Clause 97A of the Environmental Planning and Assessment Regulation 2000, it is a prescribed condition that all of the required commitments listed in the relevant BASIX Certificate for this development are fulfilled.
11. In accordance with the provisions of the Environmental Planning & Assessment Regulation 2000, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

12. In accordance with Clause 154B of the Environmental Planning & Assessment Regulation 2000, a Certifying Authority must not issue a final Occupation Certificate for this development, unless it is satisfied that each of the required BASIX commitments has been fulfilled.

Relevant documentary evidence of compliance with the BASIX commitments is to be forwarded to the Council upon issuing the final Occupation Certificate.

The following condition is applied to meet additional demands for public facilities:

13. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, the following monetary levy must be paid to Council.

Category	Cost	Applicable Levy	S94A Levy
Development Cost more than \$200,000	\$ 1,142,225.00	1%	\$11,422.25

The levy must be paid in cash, bank cheque or by credit card prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions have been applied to maintain reasonable levels of amenity to the area:

14. The operation of all plant and equipment shall not give rise to an 'offensive

noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the plant and equipment (excluding plant and equipment during the construction phase) shall not give rise to an $L_{Aeq, 15 \text{ min}}$ sound pressure level at any affected premises that exceeds the background $L_{A90, 15 \text{ min}}$ noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A) in accordance with relevant NSW Department of Environment & Conservation Noise Control Guidelines.

15. A report, prepared by a suitably qualified and experienced consultant in acoustics, shall be submitted to the Council prior to an **occupation certificate** being issued for the development, which demonstrates and certifies that noise and vibration emissions from the development comply with the relevant provisions of the *Protection of the Environment Operations Act 1997*, NSW Environmental Protection Authority Noise Control Manual & Industrial Noise Policy and conditions of Council's approval, to the satisfaction of Council's Manager Health, Building & Regulatory Services.
16. There are to be no emissions or discharges from the premises, which will give rise to a public nuisance or result in an offence under the *Protection of the Environment Operations Act 1997 and Regulations*.

The following conditions are applied to ensure that the development satisfies the provisions of the *Environmental Planning and Assessment Act 1979 and Regulations*:

17. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of 'on-the-spot' penalty infringements or service of a notice and order by Council.

18. All new building work must be carried out in accordance with the provisions of the **Building Code of Australia (BCA)**, in accordance with Clause 98 of the *Environmental Planning and Assessment Regulation 2000*.

19. **Prior to the commencement of any building works, a construction certificate must be obtained** from the Council or an accredited certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans & specifications and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

20. **Prior to the commencement of any building works**, the person having the benefit of the development consent must:
 - i) appoint a *Principal Certifying Authority* for the building work, and
 - ii) appoint a *principal contractor* for the building work and notify the *Principal Certifying Authority* and Council accordingly in writing, and
 - iii) notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal*

Certifying Authority, and

- iv) give at least two days notice to the Council, in writing, of the person's intention to commence building works.

In relation to residential building work, the principal contractor must be the holder of a contractor licence, in accordance with the provisions of the Home Building Act 1989.

21. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected in accordance with section 81A (2) (b1) (ii) of the Environmental Planning & Assessment Regulation 2000 and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

Documentary evidence of the building inspections carried out and details of compliance with Council's consent is to be maintained by the *Principal Certifying Authority*. Details of *critical stage inspections* carried out and copies of certification relied upon must also be forwarded to Council with the *occupation certificate*.

The *principal contractor* must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's* "Notice of Critical Stage Inspections", are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

22. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:

- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours,
- name, address and telephone number of the *Principal Certifying Authority*,
- a statement stating that "unauthorised entry to the work site is prohibited".

23. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building** in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The relevant requirements of the Environmental Planning & Assessment Act 1979 and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

24. **Prior to the issuing of an interim or final occupation certificate**, a statement is required to be obtained from the Principal Certifying Authority,

which confirms that the development is not inconsistent with the development consent and the relevant conditions of development consent have been satisfied.

Details of *critical stage* inspections carried out by the principal certifying authority together with any other certification relied upon must also be provided to Council with the occupation certificate.

25. In accordance with clause 98 of the Environmental Planning & Assessment Regulation 2000, it is a prescribed condition, that in the case of residential building work, a contract of insurance must be obtained and in force, in accordance with the provisions of the Home Building Act 1989.

Where the work is to be done by a licensed contractor, excavation or building work must not be carried out unless the Principal Certifying Authority (PCA):

- has been informed in writing of the licensee's name and contractor number; and
- is satisfied that the licensee has complied with the insurance requirements of Part 6 of the *Home Building Act 1989*, or

Details of the principal building contractor and compliance with the provisions of the *Home Building Act 1989* (i.e. *Details of the principal licensed building contractor and a copy of the Certificate of Insurance*) are to be submitted to Council **prior to the commencement of works**, with the notice of appointment of the PCA/notice of intention to commence building work.

26. The required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

27. A Fire Safety Certificate must be submitted to Council **prior to the issuing of an Occupation Certificate**, in accordance with the requirements of the Environmental Planning and Assessment Regulation 2000.

A single and complete *Fire Safety Certificate* must be provided which includes details of all of the fire safety measures contained in the building and as detailed in the *fire safety schedule* attached to the Construction Certificate.

Prior to issuing any Occupation Certificate the Principal Certifying Authority must be satisfied that all of the relevant fire safety measures have been included and are sufficiently detailed within the *Fire safety Certificate*.

A copy of the *fire safety certificate* must be displayed in the building near the entrance and a copy must be forwarded to the NSW Fire Brigades.

28. As a minimum, the building is required to be provided with a smoke alarm system complying with Clause 3 of Specification E2.2a of the Building Code of Australia or a smoke detection system complying with Clause 4 of Specification E2.2a of the Building Code of Australia or a combination of a smoke alarm system within the sole-occupancy units and a smoke detection system in areas not within the sole-occupancy units. The smoke detectors located within the stairway, corridors or the like must be interconnected.

Additional requirements regarding the design and installation of the smoke detection and alarm system may be specified in the construction certificate for the development.

29. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works**.

The following group of conditions have been applied to ensure the structural adequacy and integrity of the proposed building and adjacent premises:

30. Documentary evidence prepared by a suitably qualified *professional geotechnical engineer* shall be submitted to the certifying authority **prior to the issuing of a construction certificate**, certifying the suitability and stability of the site for the proposed building and certifying the suitability and adequacy of the proposed design and construction of the building for the site.
31. A report shall be prepared by a *professional engineer* and submitted to the certifying authority **prior to the issuing of a construction certificate**, detailing the proposed methods of excavation, shoring or pile construction, including details of potential vibration emissions. The report, must demonstrate the suitability of the proposed methods of construction to overcome any potential damage to nearby land/premises.

Any practices or procedures specified in the engineer's report in relation to the avoidance or minimisation of structural damage to nearby premises, must be fully complied with and incorporated into the documentation for the **construction certificate**.

A copy of the engineers report is to be submitted to the Council, if the Council is not the certifying authority.

32. Driven type piles/shoring must not be provided unless a geotechnical engineer's report is submitted to the certifying authority, **prior to the issuing of a construction certificate**, which demonstrates that damage should not occur to any adjoining premises and public place as a result of the works.

Any practices or recommendations specified in the engineer's report in relation to the avoidance or minimisation of structural damage to nearby premises or land must be fully complied with and incorporated into the documentation for the **construction certificate**.

33. A dilapidation report prepared by a *professional engineer* or suitably qualified and experienced building surveyor shall be submitted to the certifying authority **prior to the commencement of demolition, excavation or building works**

detailing the current condition and status of all buildings, including ancillary structures (*i.e. including dwellings, residential flat buildings, commercial/industrial building, garages, carports, verandah's, fences, retaining walls, swimming pools and driveways etc.*) located upon all of the premises adjoining the subject site.

The report is to be supported with photographic evidence of the status and condition of the buildings and a copy of the report must also be forwarded to the Council and to the owners of each of the abovementioned premises, **prior to the commencement of any works.**

34. The installation of ground or rock anchors underneath any adjoining premises must not be carried out without specific written consent of the owners of the affected adjoining premises (including the Council if bounding a public roadway or public place) and where applicable, details of compliance must be provided to the certifying authority **prior to the commencement of any excavation or building works.**
35. A Certificate prepared by a professional *engineer* shall be submitted to the certifying authority (*and the Council, if the Council is not the certifying authority*) **prior to occupation of the building**, which certifies that the building works satisfy the relevant structural design requirements of the Building Code of Australia.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

36. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Retaining walls, shoring, or piling must be designed and installed in accordance with appropriate professional standards and the relevant requirements of the Building Code of Australia and Australian Standards. Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

37. The adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

If an excavation associated with the erection or demolition of a building extends below the level of the base of the footings of any building located on an adjoining allotment of land, the person causing the excavation must:

- preserve and protect the building /s on the adjoining land from damage; and
- effectively support the excavation and building; and
- at least seven (7) days before excavating below the level of the base of the footings of a building on an adjoining allotment of land (including a public road or public place), give notice of the intention and particulars of the works to the owner of the adjoining land.

Notes

- *This consent and condition does not authorise any trespass or encroachment upon any adjoining or supported land or building whether private or public. Where any underpinning, shoring, soil anchoring (temporary or permanent) or the like is proposed to be carried out upon any adjoining or supported land, the principal contractor or owner-builder must obtain:*
 - a) *the consent of the owners of such adjoining or supported land to trespass or encroach, or*
 - b) *an access order under the Access to Neighbouring Land Act 2000, or*
 - c) *an easement under section 88K of the Conveyancing Act 1919, or*
 - d) *an easement under section 40 of the Land & Environment Court Act 1979, as appropriate.*
- *Section 177 of the Conveyancing Act 1919 creates a statutory duty of care in relation to support of land. Accordingly, a person has a duty of care not to do anything on or in relation to land being developed (the supporting land) that removes the support provided by the supporting land to any other adjoining land (the supported land).*

38. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and (except as detailed below) between 8.00am to 5.00pm on Saturdays.

All building, demolition and associated site works are strictly prohibited on Sundays, Public Holidays and also on Saturdays adjacent to a Public Holiday.

In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and loss of amenity to nearby residents.

39. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.

Noise and vibration from any rock excavation machinery and pile drivers (or the like) must be minimised by using appropriate plant and equipment and silencers and a construction noise and vibration minimisation strategy, prepared by a suitably qualified consultant is to be implemented during the works, to the satisfaction of the Principal Certifying Authority.

40. A report prepared by a suitably qualified and experienced person shall be submitted to the Principal Certifying Authority (PCA) and a copy is to be provided to Council upon commencement of works or as otherwise specified by the PCA or Council, certifying that noise and vibration emissions from the construction of the development satisfies the relevant provisions of the *Protection of the Environment Operations Act 1997*, Councils conditions of consent and relevant Standards relating to noise and vibration. In support of the above, it is necessary to submit all relevant readings and calculations made.

Any recommendations and requirements contained in the report are to be implemented accordingly and should noise and vibration emissions not comply with the terms and conditions of consent, work must cease forthwith and is not to recommence until details of compliance are submitted to the PCA and Council.

41. Public safety and convenience must be maintained at all times during

demolition, excavation and construction works and the following requirements must be complied with:

- a) The roadway, footpath and nature strip must be maintained in a good, safe condition and free from any obstructions, materials, soils or debris at all times. Any damage caused to the road, footway or nature strip must be repaired immediately, to the satisfaction of Council.
- b) Building materials, sand, soil, waste materials, construction equipment or other materials or articles must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
- c) Bulk bins, waste containers or other articles must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container or other articles in a public place can be made to Council's Health, Building & Regulatory Services department.
- d) Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
- e) A temporary timber, asphalt or concrete crossing is to be provided to the site entrance across the kerb and footway area, with splayed edges, to the satisfaction of Council, unless access is via an existing concrete crossover.
- f) A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road or nature strip or in any public place:-
 - Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip or any other container or article on the road, nature strip or footpath.
- g) The applicant/builder is required to hold Public Liability Insurance, with a minimum liability of \$10 million and a copy of the Insurance cover is to be provided to Council.
- h) A *Road/Asset Opening Permit* must be obtained from Council prior to carrying out any works within or upon a road, footpath, nature strip or in any public place, in accordance with section 138 of the *Roads Act 1993* and all of the conditions and requirements contained in the *Road/ Asset Opening Permit* must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council, prior to the issuing of a final occupation certificate for the development.

For further information, please contact Council's Road/Asset Opening Officer on 9399 0691 or 9399 0999.

- i) Temporary toilet facilities are to be provided, at or in the vicinity of the

work site throughout the course of demolition and construction, to the satisfaction of WorkCover NSW and the toilet facilities must be connected to a public sewer or other sewage management facility approved by Council.

42. A Registered Surveyor's check survey certificate or *compliance certificate* is to be forwarded to the principal certifying authority (*and a copy is to be forwarded to the Council, if the Council is not the principal certifying authority*), detailing compliance with Council's approval at the **following stage/s of construction:**
- a) Prior to construction of the first completed floor/floor slab (prior to pouring of concrete), showing the area of land, building and boundary setbacks and verifying that the building is being construction at the approved levels.
 - b) On completion of the erection of the building showing the area of the land, the position of the building and boundary setbacks and verifying the building has been constructed at the approved levels.
43. A **Construction Site Management Plan** is to be developed and implemented **prior to the commencement** of demolition, excavation or building works. The site management plan must include the following measures, as applicable to the type of development:
- location and construction of protective fencing/hoardings to the perimeter of the site;
 - location of site storage areas/sheds/equipment;
 - location of building materials for construction;
 - provisions for public safety;
 - dust control measures;
 - site access location and construction
 - details and methods of disposal of demolition materials;
 - protective measures for tree preservation;
 - provisions for temporary sanitary facilities;
 - location and size of waste containers/bulk bins;
 - details of proposed sediment and erosion control measures;
 - construction noise and vibration management;
 - construction traffic management provisions.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and convenience to the satisfaction of Council. A copy of the approved Construction Site Management Plan must be maintained on site and be made available to Council officers upon request.

44. During demolition excavation and construction works, dust emissions must be minimised, so as not to result in a nuisance to nearby residents or result in a potential pollution incident.

Adequate dust control measures must be provided to the site prior to the works commencing and the measures and practices must be maintained throughout the demolition, excavation and construction process, to the satisfaction of Council.

Dust control measures and practices may include:-

- Provision of geotextile fabric to all perimeter site fencing (attached on the prevailing wind side of the site fencing).

- Covering of stockpiles of sand, soil and excavated material with adequately secured tarpaulins or plastic sheeting.
 - Installation of a water sprinkling system or provision of hoses or the like.
 - Regular watering-down of all loose materials and stockpiles of sand, soil and excavated material.
 - Minimisation/relocation of stockpiles of materials, to minimise potential for disturbance by prevailing winds.
 - Revegetation of disturbed areas.
45. During construction stages, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by the NSW Department of Housing.

Details of the proposed sediment control measures are to be detailed in the *Site Management Plan* and must be submitted to and approved by the principal certifying authority **prior to the commencement of any site works**. The sediment and erosion control measures must be implemented prior to the commencement of any site works and be maintained throughout construction. A copy of the approved details must be forwarded to the Council and a copy is to be maintained on-site and be made available to Council officers upon request.

Details of proposed sediment and erosion control measures shall include; a site plan; indicating the slope of land, access points & access control measures, location and type of sediment & erosion controls, location of existing vegetation to be retained, location of material stockpiles and storage areas, location of building operations and equipment, methods of sediment control, details of drainage systems and details of existing and proposed vegetation.

Stockpiles of soil, sand, aggregate or other materials must not be located on any footpath, roadway, nature strip, drainage line or any public place and the stockpiles must be protected with adequate sediment control measures.

A warning sign for soil and water management must be displayed in a prominent position on the building site, visible to both the public and site workers. The sign must be displayed throughout the construction period. Copies of a suitable warning sign are available at Council's Customer Service Centre for a nominal fee.

46. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

If the work involved in the erection or demolition of a building is likely to cause pedestrian or vehicular traffic in a public place to be obstructed or rendered inconvenient or the building involves the enclosure of a public place, a hoarding or fence must be erected between the work site and the public place.

If necessary, an awning is to be erected sufficiently to prevent any substance from, or in connection with, the work from falling into the public place or

adjoining premises.

Temporary fences or hoardings are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

The public safety provisions and temporary fences must be in place **prior to the commencement of any demolition, excavation or building works** and be maintained throughout construction.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or any public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

47. The demolition, removal, storage, handling and disposal of materials and all building work must be carried out in accordance with the following requirements (as applicable):

- Australian Standard 2601 (2001) – Demolition of Structures
- Occupational Health and Safety Act 2000
- Occupational Health and Safety (Hazardous Substances) Regulation 2001
- Occupational Health and Safety (Asbestos Removal Work) Regulation 2001
- WorkCover NSW – Guidelines and Codes of Practice
- Randwick City Council's Asbestos Policy
- The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 1996.

48. A Demolition Work Plan must be prepared for the development in accordance with Australian Standard AS2601-2001, Demolition of Structures.

The Work Plan must include the following information (as applicable):

- The name, address, contact details and licence number of the Demolisher /Asbestos Removal Contractor
- Details of hazardous materials, including asbestos
- Method/s of demolition and removal of asbestos
- Measures and processes to be implemented to ensure the health & safety of workers and community
- Measures to be implemented to minimise any airborne asbestos and dust
- Methods and location of disposal of any asbestos or other hazardous materials
- Other relevant details, measures and requirements to be implemented as identified in the Asbestos Survey
- Date the demolition and removal of asbestos will commence

The Demolition Work Plan must be submitted to the Principal Certifying Authority (PCA), not less than two (2) working days before commencing any demolition works. A copy of the Demolition Work Plan must be forwarded to Council and a copy must also be maintained on site and be made available to Council officers upon request.

49. Any work involving the demolition, storage and disposal of asbestos products and materials must be carried out in accordance with the following requirements:

- a) Randwick City Council's Asbestos Policy (adopted 13 September 2005).

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

- a) A WorkCover licensed demolition or asbestos removal contractor must undertake removal of more than 10m² of bonded asbestos (or as otherwise specified by WorkCover or relevant legislation). Removal of friable asbestos material must only be undertaken by contractor that holds a current friable asbestos removal licence.
- b) On sites involving the removal of asbestos, a professionally manufactured sign must be clearly displayed in a prominent visible position at the front of the site, containing the words 'DANGER ASBESTOS REMOVAL IN PROGRESS' and include details of the licensed contractor. The sign shall measure not less than 400mm x 300mm and the sign is to be installed prior to demolition work commencing and is to remain in place until such time as all asbestos has been safely removed from the site.
- c) Asbestos waste must be stored, transported and disposed of in compliance with the Protection of the Environment Operations Act 1997 and the Protection of the Environment Operations (Waste) Regulation 1996. Asbestos waste must be disposed of at an approved waste disposal depot (refer to the DEC or Waste Service NSW for details of sites). Copies of all receipts detailing method and location of disposal must be maintained on site and be provided to Council officers upon request, as evidence of correct disposal.
- d) A Clearance Certificate or Statement, prepared by a suitably qualified person (i.e. an occupational hygienist, licensed asbestos removal contractor, building consultant, architect or experienced licensed building contractor), must be provided to Council upon completion of the works **prior to an Occupation Certificate being issued**, which confirms that the asbestos material have been removed appropriately and the relevant requirements contained in the Asbestos Survey and conditions of consent in relation to the safe removal and disposal of asbestos, have been satisfied.

The following conditions are applied to promote occupant safety in the building:

50. Openable windows to a room, corridor, stairway or the like with a floor level more than 4m above the external ground/surface level, must be designed and constructed to reduce the likelihood of a child accessing and falling through the window opening.

Options may include one or more of the following measures:

- i. The window having a minimum sill height of 1.5m above the internal floor level,
- ii. Providing a window locking device at least 1.5m above the internal floor level,
- iii. Fixing or securing the window (e.g. by screws or a window locking device) to restrict or to be able to secure the extent of the opening to a maximum width of 125mm,
- iv. Installing a fixed heavy-duty gauge metal screen over the opening (e.g. A metal security screen or metal security mesh and frame system, but not standard fly-screen material),

- v. Other appropriate effective safety measures or barrier.

The following conditions are applied to provide adequate security against damage to Council's infrastructure:

51. The following damage/civil works security deposit requirement is to be complied with prior to a construction certificate being issued for the development, as security for making good any damage caused to the roadway, footway, verge or any public place; or as security for completing any public work; and for remedying any defect on such public works, in accordance with section 80A(6) of the Environmental Planning and Assessment Act 1979:

- a) \$5000.00 - Damage / Civil Works Security Deposit

The damage/civil works security deposit may be provided by way of a cash or cheque with the Council and is refundable upon:

- A satisfactory inspection by Council that no damage has occurred to the Council assets such as roadway, kerb, guttering, drainage pits footway, or verge; and
- Completion of the civil works as conditioned in this development consent by Council.

The applicant is to advise Council, in writing, of the completion of all building works and/or obtaining an occupation certificate, if required.

The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

52. Prior to the issuing of an Occupation Certificate the applicant must meet the full cost for Council or a Council approved contractor to:
 - a) Construct a full width heavy duty concrete vehicular crossing and layback at kerb opposite the vehicular entrance to the site.
 - b) Re-construct a kerb and gutter for the full site frontage except opposite the vehicular entrance and exit points.
 - c) Carry out a minimum 1.00 metre wide, road reknit in front of the kerb and gutter along the full site frontage.
 - d) Reconstruct the Council concrete footpath along the full site frontage. Any unpaved areas on the nature strip must be turfed and landscaped to Council's specification.
53. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.
54. All external civil work to be carried out on Council property (including the installation and repair of roads, footpaths, vehicular crossings, kerb and guttering and drainage works), must be carried out in accordance with Council's Policy for "Vehicular Access and Road and Drainage Works" and the following

requirements:

- a) All work on Council land must be carried out by Council, unless specific written approval has been obtained from Council to use non-Council contractors.
 - b) Details of the proposed civil works to be carried out on Council land must be submitted to Council in a *Pre-paid Works Application Form*, prior to issuing an occupation certificate, together with payment of the relevant fees.
 - c) If it is proposed to use non-Council contractors to carry out the civil works on Council land, the work must not commence until the written approval has been obtained from Council and the work must be carried out in accordance with the conditions of consent, Council's design details and payment of a Council design and supervision fee.
 - d) The civil works must be completed in accordance with Council's conditions of consent and approved design and construction documentation, prior to occupation of the development, or as otherwise approved by Council in writing.
55. All new walls adjacent to vehicular crossings must be lowered to a height of 600mm above the internal driveway level for a distance of 1.50m within the site or splayed 1.5 metre by 1.5 metre to provide satisfactory sight lines. Details are to be submitted to the Certifying Authority prior to the release of the construction certificate showing compliance with this condition.
56. The driveway opening at the Dine Street frontage must be 3.00 metres wide (clear width) and located at least 0.5 metres clear of the side property boundary.
57. The internal driveway grades are to be constructed in accordance with the submitted amended plans (*Job No 1006 Sheet C01 & C06 by Draftsmart P/L dated 15.11.10*). The Principal Certifying Authority shall ensure compliance with this condition prior to the issuing of an Occupation Certificate.
58. 2 car spaces are to be allocated to the 3 bedroom unit.
59. A Works Zone is to be provided in Dine Street for the duration of the construction works. The 'Works Zone' shall be provided to the satisfaction of the Randwick Traffic Committee and shall have a minimum length of 12 metres. The prescribed fee for the Works Zone must be paid to Council at least four (4) weeks prior to the commencement of work on the site.

It is noted that the requirement for a Works Zone may be waived if it can be demonstrated (to the satisfaction of Council's traffic engineer) that all construction related activities (including all loading and unloading operations) may be undertaken wholly within the site.

60. Prior to the issue of a construction certificate, the applicant shall submit for approval and have approved by Council's Traffic Engineer a detailed construction traffic management plan. The plan shall demonstrate how construction and delivery vehicles will access the development site during the demolition and construction phase of the development.

All traffic associated with the subject development shall comply with the terms of the approved construction traffic management plan.

The following conditions are applied to provide adequate provisions for

future civil works in the road reserve:

61. The Council's Development Engineer has inspected the above site and has determined that the design alignment level (concrete/paved/tiled level) at the property boundary for driveways, access ramps and pathways or the like, must match the back of the existing footpath along the full site frontage.
62. The design alignment levels (concrete/paved/tiled level) issued by Council and their relationship to the footpath must be indicated on the building plans via a construction note for the construction certificate.
63. The above alignment levels and the site inspection by Council's Development Engineer has been issued at a prescribed fee of \$536.00 calculated at \$44.00 (inclusive of GST) per metre of site frontage. This amount is to be paid prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate consideration for service authority assets:

64. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
65. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.
66. Documentary evidence from the relevant public utility authorities confirming that their requirements have been satisfied, must be submitted to the certifying authority prior to a construction certificate being issued for the development.
67. A Road / Asset Opening Permit must be obtained from Council prior to carrying out any public utility service works within or upon a road, footpath, nature strip or in any public place, in accordance with section 138 of the Roads Act 1993 and all of the conditions and requirements contained in the Road / Asset Opening Permit must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council, prior to the issuing of a final occupation certificate for the development.

For further information, please contact Council's Road / Asset Opening Officer on 9399 0691 or 9399 0999.

68. Any electricity substation required for the site as a consequence of this development shall be located within the site and shall be screened from view. The proposed location and elevation shall be shown on all detailed landscape drawings and specifications. The applicant must liaise with Energy Australia prior to lodging the construction certificate to determine whether or not an electricity substation is required for the development.
69. A Section 73 Compliance Certificate under the Sydney water Act 1994 must be obtained. Application must be made through an authorised Water Servicing Coordinator. Please refer to "Your Business" section of Sydney Water's web site at www.sydneywater.com.au then the "e-developer" icon or telephone 13 20

92.

Following application a "Notice of Requirements" will detail water and sewer extensions to be built and charges paid. Please make early contact with the Coordinator, since building of water/sewer extensions can be time consuming and may impact on other services and building, driveway or landscape design.

The Notice must be issued to the Principal Certifying Authority prior to the construction certificate being issued.

The Section 73 Certificate must be submitted to the Principal Certifying Authority prior to occupation of the development

The following conditions are applied to provide adequate provisions for drainage and associated infrastructure:

70. **Stormwater drainage plans have not been approved as part of this development consent.** Engineering calculations and plans with levels reduced to Australian Height Datum in relation to site drainage shall be submitted to and approved by the certifying authority prior to a construction certificate being issued for the development. A copy of the engineering calculations and plans are to be forwarded to Council, prior to a construction certificate being issued, if the Council is not the certifying authority. The drawings and details shall include the following information:
- a) A detailed drainage design supported by a catchment area plan, at a scale of 1:100 or as considered acceptable to the Council or an accredited certifier, and drainage calculations prepared in accordance with the Institution of Engineers publication, Australian Rainfall and Run-off, 1987 edition.
 - b) A layout of the proposed drainage system including pipe sizes, type, grade, length, invert levels, etc., dimensions and types of all drainage pipes and the connection into Council's stormwater system.
 - c) Generally all internal pipelines must be capable of discharging a 1 in 20 year storm flow. However the minimum pipe size for pipes that accept stormwater from a surface inlet pit must be 150mm diameter. The site must be graded to direct any surplus run-off (ie. above the 1 in 20 year storm) to the proposed drainage system.
 - d) The separate catchment areas within the site, draining to each collection point or surface pit are to be classified into the following categories:
 - i. Roof areas
 - ii. Paved areas
 - iii. Grassed areas
 - iv. Garden areas
 - e) Where buildings abut higher buildings and their roofs are "flushed in" to the higher wall, the area contributing must be taken as: the projected roof area of the lower building, plus one half of the area of the vertical wall abutting, for the purpose of determining the discharge from the lower roof.
 - f) Proposed finished surface levels and grades of car parks, internal driveways and access aisles which are to be related to Council's design alignment levels.
 - g) The details of any special features that will affect the drainage design eg. the nature of the soil in the site and/or the presence of rock etc.

71. All stormwater run-off naturally draining to the site must be collected and discharged through this property's stormwater system. Such drainage must, if necessary, be constructed prior to the commencement of building work.
72. All site stormwater must be discharged (by gravity) to either:
 - a. The kerb and gutter or drainage system at the front of the property; OR
 - b. A suitably sized infiltration system (subject to geotechnical investigation confirming that the ground conditions are suitable for an infiltration system).
73. Should stormwater be discharged to Council's street drainage system, on-site detention must be provided to ensure that the maximum discharge from the above site is not to exceed that which would occur during a **1 in 5** year storm of 1 hour duration for the existing site conditions. All other stormwater run-off from the above site for all storms up to the 1 in 20 year storm is to be retained on the site for gradual release to the kerb and gutter or drainage system as required by Council. Provision is to be made for satisfactory overland flow should a storm in excess of the above parameters occur.

Should no formal overland escape route be provided for storms greater than the design storm, the on-site detention system shall be sized for the 1 in 100 year storm event.

For small areas up to 0.5 hectares, determination of the required cumulative storage must be calculated by the mass curve technique as detailed in Technical Note 1, Chapter 14 of the Australian Rainfall and Run-off Volume 1, 1987 Edition.

Where possible the detention tank must have an open base to infiltrate stormwater to the groundwater. Note that the ground water and any rock stratum has to be a minimum of 2.0 metres below the base of the tank.

74. Should stormwater be discharged to an infiltration system, the infiltration area shall be sized for all storm events up to the 1 in 20 year storm event with provision for a formal overland flow path to Council's Street drainage system.

Should no formal overland escape route be provided for storms greater than the design storm, the infiltration system shall be sized for the 1 in 100 year storm event.

75. Any Infiltration systems/Absorption Trenches must be designed in accordance with "Section 8.5 ABSORPTION TRENCHES" as stipulated in Randwick City Council's Private Stormwater Code.
76. The detention area/infiltration system must be regularly cleaned and maintained to ensure it functions as required by the design.
77. Any onsite detention/infiltration systems shall be located in areas accessible by residents of all units.
78. The maximum depth of ponding in above ground detention areas (and/or infiltration systems with above ground storage) shall be as follows:
 - a) 300mm in landscaped areas (where child proof fencing is not provided around the outside of the detention area and sides slopes are steeper than 1 in 10)
 - b) 600mm in landscaped areas where the side slopes of the detention area have a maximum grade of 1 in 10.

- c) 1200mm in landscaped areas where a childproof fence is provided around the outside of the detention area

Notes:

- It is noted that above ground storage will not be permitted in basement carparks or in any area which may be used for storage of goods.
- Mulch/bark must not be used in onsite detention areas

79. Any above ground stormwater detention areas (and/or infiltration systems with above ground storage) must be suitably signposted where required, warning people of the maximum flood level.
80. The floor level of all habitable and storage areas adjacent to the detention area (and/or infiltration systems with above ground storage) must be a minimum of 300mm above the maximum water level in the detention area for the design storm or alternately a permanent 300mm high water proof barrier is to be constructed.

(In this regard, it must be noted that this condition must not result in any increase in the heights or levels of the building. Any variations to the heights or levels of the building will require a new or amended development consent from the Council prior to a construction certificate being issued for the development).

81. A childproof and corrosion resistant fastening system shall be installed on access grates over pits/trenches where water is permitted to be temporarily stored.
82. A 'V' drain is to be constructed along the perimeter of the property, where required, to direct all stormwater to the detention/infiltration area.
83. A reflux valve shall be provided (within the site) over any pipelines discharging from the site to ensure that stormwater from Council drainage system does not surcharge back into the site stormwater system. (TO BE INCLUDED IF CONNECTING TO COUNCIL'S UNDERGROUND DRAINAGE SYSTEM)
84. Should a pump system be required to drain any portion of the site the system must be designed with a minimum of two pumps being installed, connected in parallel (with each pump capable of discharging at the permissible discharge rate) and connected to a control board so that each pump will operate alternatively. The pump wet well shall be sized for the 1 in 100 year, 2 hour storm assuming both pumps are not working.

The pump system must also be designed and installed strictly in accordance with "Section 8.4 PUMP SYSTEMS" as stipulated in Randwick City Council's Private Stormwater Code.

85. A sediment/silt arrester pit must be provided:-
- a) within the site at or near the street boundary prior to the site stormwater discharging by gravity to the kerb/street drainage system; and
 - b) prior to stormwater discharging into any absorption/infiltration system.

The sediment/silt arrester pit shall be constructed in accordance with the following requirements:-

- The base of the pit located a minimum 300mm under the invert level of

the outlet pipe.

- The pit constructed from cast in-situ concrete, precast concrete, double brick or equivalent.
- A minimum of 4 x 90 mm diameter weep holes located in the walls of the pit at the floor level with a suitable geotextile material with a high filtration rating located over the weep holes.
- A galvanised heavy-duty screen located over the outlet pipe/s (Mascot GMS multipurpose filter screen or equivalent).
- The grate being a galvanised heavy-duty grate that has a provision for a child proof fastening system.
- A child proof and corrosion resistant fastening system provided for the access grate (e.g. spring loaded j-bolts or similar).
- A sign adjacent to the pit stating:

"This sediment/silt arrester pit shall be regularly inspected and cleaned."

Note: Sketch details of a standard sediment/silt arrester pit may be obtained from Council's Drainage Engineer.

86. Prior to occupation of the development, a "restriction on the use of land" and "positive covenant" (under section 88E of the Conveyancing Act 1919) shall be placed on the title of the subject property to ensure that the onsite detention/infiltration system is maintained and that no works which could affect the design function of the detention/infiltration system are undertaken without the prior consent (in writing) from Council. Such restriction and positive covenant shall not be released, varied or modified without the consent of the Council.

Notes:

- a. The "restriction on the use of land" and "positive covenant" are to be to the satisfaction of Council. A copy of Council's standard wording/layout for the restriction and positive covenant may be obtained from Council's Development Engineer.
 - b. The works as executed drainage plan and hydraulic certification must be submitted to Council prior to the "restriction on the use of land" and "positive covenant" being executed by Council.
87. **One** covered car washing bay shall be provided for this development.
- a) The car washing bay must be drained to sewer to the requirements of Sydney Water and proof of compliance is to be submitted to the certifying authority, prior to an occupation certificate being issued for the proposed development.
 - b) The car washing bay must be located outside any required/approved stormwater detention system.
 - c) The car washing bay may be located within the visitor parking space provided it is signposted with '*Exclusive Carwash Bay Use Sat 2:00pm – 5:00pm and Sunday 10:00am – 2:00pm, Visitor parking at other times*'
 - d) The car washing bay must be constructed with a minimum 20mm bund

around the perimeter of the car washing bay/s (or equivalent)

- e) A water tap shall be located adjacent to the car washing bay.
88. Prior to the issuing of an occupation certificate, the applicant shall submit to Council, a works-as-executed drainage plan prepared by a registered surveyor and approved by a suitably qualified and experienced Hydraulic Engineer. The works-as-executed drainage plan shall be to the satisfaction of the Principal Certifying Authority (PCA) and shall include the following details:
- a) The location of the detention basin with finished surface levels;
 - b) Finished site contours at 0.2 metre intervals;
 - c) Volume of storage available in the detention areas;
 - d) The location, diameter, gradient and material (i.e PVC, RC etc) of all stormwater pipes;
 - e) The orifice size(s) (if applicable);
 - f) Details of any infiltration/absorption systems; and
 - g) Details of any pumping systems installed (including wet well volumes).
89. Prior to the issuing of an occupation certificate, the applicant shall submit to the Principal Certifying Authority (PCA) and Council, certification from a suitably qualified and experienced Hydraulic Engineer confirming that the design and construction of the stormwater drainage system complies with the conditions of development consent. The certification must be provided following inspection/s of the site stormwater drainage system by the certifying engineers and shall be provided to the satisfaction of the PCA.
90. **As the above site may encounter groundwater/seepage water within the depth of the basement excavation**, the basement carpark or similar structures are to be suitably tanked and waterproofed. A Structural Engineer\Geotechnical Engineer shall certify the tanking & waterproofing has been carried out to an acceptable standard, to the satisfaction of the certifying authority. A copy of the certification is to be forwarded to Council.

Notes:

- a) Any subsoil drainage (from planter boxes etc) is to be disposed of within the site and is not to be discharged to Council's kerb & gutter and/or underground drainage system.
 - b) Adequate provision is to be made for the ground water to drain around the basement carpark (to ensure that the basement will not dam or slow the movement of the ground water through the development site).
91. Seepage water **must not** be collected and discharged from the site.
92. If any temporary dewatering of the site is required to facilitate construction of any part of the basement car park and/or detention tank a licence under Part V of the Water Act 1912 will be required. The licence must be obtained from the NSW Department of Water and Energy prior to installation of the works. A copy of the license agreement must be forwarded to Council prior to any dewatering being undertaken.
93. A separate written approval from Council is required to be obtained in relation to any proposed discharge of groundwater into Council's drainage system external to the site, in accordance with the requirements of Section 138 of the Roads Act 1993.

The following conditions are applied to provide adequate provisions for waste management:

94. The garbage room areas will have to be designed so as to be able to contain a total of 6 x 240 litre bins (3 garbage bins & 3 recycle bins) whilst providing satisfactory access to these bins. Details showing compliance with this requirement are to be shown on the plans submitted to the certifying authority for the construction certificate.
95. The waste storage areas are to be provided with a tap and hose and the floor is to be graded and drained to the sewer to the requirements of Sydney Water.
96. The waste storage areas shall be clearly signposted.
97. Prior to the Certifying Authority issuing an occupation certificate for the proposed development the applicant is to contact Council's Manager of Waste in regards to meeting Council's requirements for waste services to the additional residence/dual occupancy.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

98. Landscaping at this site must be installed substantially in accordance with the Landscape Plan by Greenplan, drawing number 10.721-01, issue B, dated 26/08/10, subject to the following additional details being shown on an amended plan which must be submitted to, and be approved by, the PCA, prior to the commencement of any site works:
 - a. Additional notation showing soil and mulch details, irrigation details, edging, paving, fencing details, surface finishes, retaining wall details, and any other landscape elements in sufficient detail to fully describe the proposed landscape works.
 - b. The two *Melaleuca quinquinervia* (Broad Leafed Paperbarks) shown for planting in the courtyard area halfway along the length of the southern site boundary must be replaced with an alternative native species that will attain similar dimensions, as Council no longer supports the planting of this species due to problems associated with its invasive and aggressive root system and ability to cause costly structural damage.
 - c. All planter boxes and garden beds constructed on slab must have a minimum soil depth of 600mm and all lawn areas must have a minimum soil depth of 300mm. Planter box details shall be submitted with the detailed landscape plans.
 - d. In order to reduce the amount of storm-water generated by the site, as well as to recharge groundwater supplies, porous/permeable paving shall be used in all hard surfacing not over slab.
 - e. To ensure satisfactory maintenance of the landscaped areas, an automatic drip irrigation system shall be installed throughout all planted areas. Details shall be provided showing that the system will be connected to the sites rainwater tanks, with back-up connection to the mains supply, in accordance with all current Sydney Water requirements.
 - f. All detention tanks and below ground stormwater infiltration systems located within the landscaped areas shall have a minimum soil cover of 600mm to ensure sufficient soil depth to permit the establishment of landscaping.
 - g. Any substation required shall be screened from view. The proposed

location and elevation shall be shown on all detailed landscape drawings and specifications.

99. The nature-strip upon Council's footway shall be excavated to a depth of 150mm, backfilled with topsoil equivalent with 'Organic Garden Mix' as supplied by Australian Native Landscapes, and re-turfed with Kikuyu Turf or similar. Such works shall be installed prior to the issue of a final Occupation Certificate.
100. Prior to issuing a Final Occupation Certificate, certification from a qualified professional in the Landscape industry must be submitted to, and approved by, the PCA, confirming that a site inspection was conducted, with all landscape works having been installed and completed in accordance with the approved plan.
101. Suitable strategies are to be implemented by the Body Corporate (or similar) to ensure the ongoing maintenance of the approved landscaping in a healthy and vigorous state until maturity.

Removal & replacement of street trees

102. The applicant shall submit a total payment of **\$2,016.50** (including GST), being to cover Council's costs for the following:
 - a. Removal of the two existing street trees in front of the site, being a *Banksia serrata* (Saw Toothed Banksia), near the southern site boundary, to accommodate the proposed vehicle crossing and basement entry ramp as shown, as well as the *Melaleuca quinquinervia* (Broad Leafed Paperbark) to its north, towards the northern boundary, due to the significant and ongoing damage its invasive root system is causing to the footpath; and
 - b. Being the cost for Council to supply and install 2 x 25 litre street trees, *Banksia serrata* (Saw Toothed Banksia's), on Council's Dine Street verge, spaced evenly across the width of the site, to the north of the proposed vehicle crossing, at the completion of all works.

The contribution shall be paid into **Tree Amenity Income** at the Cashier on the Ground Floor of the Administrative Centre, **prior to a Construction Certificate being issued for the development.**

The applicant must contact Council's Landscape Development Officer on 9399-0613, giving at least four working weeks notice to arrange for removal of both street trees prior to the commencement of any site works, as well as upon completion, to arrange for planting of the replacement street trees.

Removal of trees within the site

103. Approval is granted for removal of the following trees from within the site, subject to full implementation of the approved landscaping:
 - a) One *Melaleuca quinquinervia* (Broad Leafed Paperbark) in the front yard, in the southwest corner of the site, as well as the small Frangipani in the rear yard, along the southern boundary, due to their inappropriate location near the southwest and southeast corners of the existing dwelling respectively, as well as to accommodate the proposed works as shown;
 - b) The mature *Eucalyptus nicholii* (Willow Leafed Peppermint) in the rear yard, near the southern boundary, in order to accommodate the proposed

basement level as shown, as the re-design *required* to ensure its preservation would require major design changes that would affect all aspects of the proposal;

- c) The *Callistemon salignus* (Willow Bottlebrush) to the northeast of the tree *described* above, due to its small size and direct conflict with the proposed works;

Pruning

104. Permission is granted for the selective pruning of only those lower growing, lower order branches from the western aspect of the *Callistemon viminalis* (Weeping Bottlebrush) located in the rear yard of the subject site, halfway across the width of the site, where necessary in order to avoid either damage to the tree or conflict with the proposed works.
105. All pruning must be undertaken by an Arborist who holds a minimum of AQF Level V in Arboriculture, and who is also a registered member of a nationally recognised organisation/association, with all pruning to be performed to Australian Standard AS 4373-1996 'Pruning of Amenity Trees.'

Tree Protection Measures

106. In order to ensure retention of the *Callistemon viminalis* (Weeping Bottlebrush) located in the rear yard, about halfway across the width of the rear (eastern) boundary in good health, the following measures are to be undertaken:
- a. All documentation submitted for the Construction Certificate application must show its retention, with the position and diameter of both its trunk and canopy to be clearly shown on all drawings.
 - b. So as to minimise the potential for root damage being caused to this tree, the eastern wall of the basement level must be constructed using contiguous bored piers, sheet piling or a similar approved alternative that will not involve any further works or excavations beyond the 6 metre setback off the rear boundary.
 - c. Any excavations required for new services, pipes, stormwater systems or similar in this rear portion of the site must be setback a minimum distance of 4 metres off the outside edge of its trunk at ground level.
 - d. This tree is to be physically protected by the installation of 1.8 metre high steel mesh/chainwire fencing, which shall be located a minimum distance of **3.0 metres** to its north, west and south (measured off the outside edge of its trunk at ground level), matching up with the eastern site boundary, so as to completely enclose this tree for the duration of works.
 - e. This fencing shall be installed prior to the commencement of demolition and construction works and shall remain in place until all works are completed, to which signage containing the following words shall be clearly displayed and permanently attached: "TREE PROTECTION ZONE (TPZ), DO NOT REMOVE/ENTER".
 - f. Within the TPZ, there is to be no storage of materials, machinery or site office/sheds, nor is cement to be mixed or chemicals spilt/disposed of and no stockpiling of soil or rubble, with all Site Management Plans needing to acknowledge this requirement.
 - g. Any roots encountered during the course of the approved works must be cut cleanly by hand, and the affected area backfilled with clean site soil as soon as practically possible.

ADVISORY MATTERS:

- A1. The applicant is advised that the Construction Certificate plans and specification must comply with the provisions of the Building Code of Australia (BCA).

In this regard, the development consent plans do not show compliance with the deemed-to-satisfy provisions of the BCA, including:

- | | | | |
|----|------------------|---|--|
| a) | Part B1 | - | Structural provisions |
| b) | Part C1 | - | Fire resistance and stability |
| c) | Part C3 | - | Protection of openings |
| d) | Clause C3.2&C3.4 | - | Protection of openings in external walls |
| e) | Part E1 | - | Fire fighting equipment |
| f) | Part E2 | - | Smoke Hazard Management |
| g) | Part E3 | - | Lift Installations |
| h) | Part E4 | - | Emergency lighting, exit signs & warning systems |
| i) | Part F1 | - | Damp and weatherproofing |
| k) | Part F4 | - | Light and ventilation |
| l) | Part F5 | - | Sound Transmission and Insulation |
| m) | Section J | - | Energy efficiency |

Details of compliance with the relevant provisions of the Building Code of Australia and conditions of development consent are to be provided in the plans and specifications for the construction certificate.

The applicant/developer is advised to ensure that the development is not inconsistent with Council's consent and if necessary consult with Council's Building Certification Services or your accredited certifier (as applicable) prior to submitting your construction certificate application to enable these matters to be addressed accordingly.

- A2. The applicant/owner is advised that this approval does not guarantee compliance with the provisions of the Disability Discrimination Act 1992 and the applicant should therefore consider their liability under the Act. In this regard, the applicant is advised that compliance with the requirements of the Building Code of Australia and Australian Standard 1428.1 - Design for Access and Mobility does not necessarily satisfy the objectives of the Disability Discrimination Act 1992.

The applicant/owner is requested to give consideration to providing access and facilities for people with disabilities in accordance with Australian Standard 1428 Parts 1, 2, 3 and 4 - Design for Access and Mobility, which may be necessary to satisfy the objectives of the Disability Discrimination Act 1992.

- A3. The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

MOTION: (Nash/Procopiadis) CARRIED UNANIMOUSLY - SEE RESOLUTION.

**D19/11 Development Application Report - 7A Clifton Road, Clovelly
(DA/1043/2010)**

PL22/11

RESOLUTION: (Nash/Procopiadis) -

- A. That Council supports the objections under State Environmental Planning Policy

No. 1 – Development Standards in respect to non-compliance with Clauses 20F & 20G of Randwick Local Environmental Plan 1998, relating to floor space ratio and building height respectively, on the grounds that the proposed development complies with the objectives of the above clauses, and will not adversely affect the amenity of the locality, and that the Department of Planning be advised accordingly.

- B. That Council grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. 1043/2010 for alterations and additions to the existing dwelling at 7A Clifton Road, Clovelly subject to the following conditions;

The following conditions are applied to satisfy the provisions of section 79C of the *Environmental Planning & Assessment Act 1979* and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered DA.01 & DA.02, dated November 2010 and received by Council on the 26th November 2010, plan numbered DA.03b dated February 2011 and received by Council on the 11th February 2011 the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The colours, materials and finishes of the external surfaces to the building are to be consistent with the nominated colour scheme submitted with the application and accompanying information on the 26th November 2010.
3. Metal roof sheeting is to be pre-painted (e.g. colourbond) and form part of the colour scheme and external finishes for the development.
4. Open-able windows to a room, corridor, stairway or the like with a floor level more than 4m above the external ground/surface level, must be designed and constructed to reduce the likelihood of a child accessing and falling through the window opening.

Options may include one or more of the following measures:

- i) The window having a minimum sill height of 1.5m above the internal floor level,
- ii) Providing a window locking device at least 1.5m above the internal floor level,
- iii) Fixing or securing the window (e.g. by screws or a window locking device) to restrict or to be able to secure the extent of the opening to a maximum of 125mm,
- iv) Installing a fixed heavy-duty gauge metal screen over the opening (e.g. A metal security screen or metal security mesh and frame system, but not standard fly-screen material),
- v) Other appropriate effective safety measures or barrier.

Preservation of Street Tree

5. Council requires that the *Lophostemon confertus* (Brush Box) located in the Clifton Road verge, centrally across the width of the site, be retained in the streetscape, and as such, **all Construction Certificate plans must show complete deletion of the vehicle crossing, alterations to the existing front boundary fence and internal hardstand.**

The following condition is imposed to satisfy relevant requirements of the

Sydney Water Corporation.

6. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition is applied to meet additional demands for public facilities;

7. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, based on the development cost of \$300 000 the following applicable monetary levy must be paid to Council: \$ 3 000.00.

The levy **must be paid in cash, bank cheque or by credit card** prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

8. In accordance with Section 80A (11) of the *Environmental Planning and Assessment Act 1979* and Clause 97A of the *Environmental Planning and Assessment Regulation 2000*, it is a prescribed condition that all of the required commitments listed in the relevant BASIX Certificate for this development are fulfilled.
9. In accordance with the provisions of the *Environmental Planning & Assessment Regulation 2000*, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

10. The following provisions are to be implemented in accordance with the relevant BASIX Certificate and details are to be included in the Construction Certificate documentation (as applicable), to the satisfaction of the Certifying Authority:
- Stormwater management (i.e. rainwater tanks)
 - Water efficiency (i.e. triple A rated taps and showers, dual flush toilets and water re-use)
 - Landscaping provisions
 - Thermal comfort (i.e. construction materials, glazing and insulation)
 - Energy efficiency (i.e. cooling & heating provisions and hot water systems)
11. In accordance with Clause 154B of the Environmental Planning & Assessment Regulation 2000, a Certifying Authority must not issue an Occupation Certificate for this development, unless it is satisfied that each of the required BASIX commitments have been fulfilled.

Relevant documentary evidence of compliance with the BASIX commitments is to be forwarded to the Council upon issuing an Occupation Certificate.

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

12. Surface water/stormwater must be drained and discharged to the street gutter or suitably designed absorption pit, to the satisfaction of the Certifying Authority and details are to be included in the construction certificate application for the development.

Absorption pits must be located not less than 3m from any adjoining premises and the stormwater must not be directed or flow onto any adjoining premises or cause a nuisance.

Details of any works proposed to be carried out in or on a public road/footway are to be submitted to and approved by Council prior to commencement of works.

13. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

14. The requirements and provisions of the *Environmental Planning & Assessment Act 1979* and *Environmental Planning & Assessment Regulation 2000*, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

15. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the provisions of the Building Code of

Australia (BCA).

16. **Prior to the commencement of any building works**, the following requirements must be complied with:

- a) a Construction Certificate must be obtained from the Council or an accredited certifier, in accordance with the provisions of the *Environmental Planning & Assessment Act 1979*.

A copy of the construction certificate, the approved development consent plans and consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

- b) a *Principal Certifying Authority* (PCA) must be appointed to carry out the necessary building inspections and to issue an *occupation certificate*; and
- c) a *principal contractor* must be appointed for the building work, or in relation to residential building work, an *owner-builder* permit may be obtained in accordance with the requirements of the *Home Building Act 1989*, and the PCA and Council are to be notified accordingly; and
- d) the *principal contractor* must be advised of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*; and
- e) at least two days notice must be given to the Council, in writing, prior to commencing building works.

17. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the *Environmental Planning & Assessment Act 1979* and clause 162A of the *Environmental Planning & Assessment Regulation 2000*, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

18. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:

- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable);
- name, address and telephone number of the *Principal Certifying Authority*; and
- a statement stating that "unauthorised entry to the work site is prohibited".

19. The relevant requirements of the *Home Building Act 1989* must be complied with, in accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*.

Details of the Licensed Building Contractor (and a copy of any relevant Certificate of Insurance) or a copy of the Owner-Builder Permit (as applicable) must be provided to the Principal Certifying Authority and Council **prior to commencement of works**.

20. The required Long Service Levy payment, under the *Building and Construction Industry Long Service Payments Act 1986*, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the *Environmental Planning & Assessment Act 1979*.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

21. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building work** encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the *Environmental Planning & Assessment Act 1979*.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The requirements of the *Environmental Planning & Assessment Act 1979* and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

22. Smoke alarms are required to be installed in each Class 1 building or residential dwelling in accordance with the relevant provisions of Part 3.7.2 of the B.C.A. – Housing Provisions.

Smoke alarms must comply with AS3786 – Smoke alarms and be connected to the consumer mains electric power supply and provided with a battery back-up.

Details of compliance with the provisions of the Building Code of Australia must be included in the plans/specification for the **construction certificate**.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

23. Certificate of Adequacy supplied by a *professional engineer* shall be submitted to the certifying authority (*and the Council, if the Council is not the certifying authority*) **prior to a construction certificate being issued** for the development, certifying the structural adequacy of the existing structure to support the upper floor addition.
24. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the relevant requirements of WorkCover NSW, the NSW Department of Environment & Climate Change (formerly EPA) and Randwick City Council policies, including:
- Occupational Health and Safety Act 2000 & Regulations
 - WorkCover NSW Guidelines & Codes of Practice
 - Australian Standard 2601 (2001) – Demolition of Structures
 - The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 2005

- Relevant DECC/EPA Guidelines
- Randwick City Council Asbestos Policy (adopted 13 September 2005)

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

25. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Retaining walls, shoring, or piling must be designed and installed in accordance with appropriate professional standards and the relevant requirements of the Building Code of Australia and Australian Standards. Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

26. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 E of the *Environmental Planning & Assessment Regulation 2000*, it is a prescribed condition that the adjoining land and buildings located upon the adjoining land must be adequately supported at all times.
- a) If the development involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development must, at the person's own expense:
- i) protect and support the adjoining premises from possible damage from the excavation, and
 - ii) where necessary, underpin the adjoining premises to prevent any such damage.
- b) The condition referred to in subclause 1) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.
27. A dilapidation report prepared by a professional engineer, building surveyor or other suitably qualified independent person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:

- excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the *zone of influence* of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- new dwellings or additions to dwellings sited up to shared property boundaries (e.g. additions to a semi-detached dwelling or a terraced dwelling),
- excavations for new dwellings, additions to dwellings, swimming pools or

the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,

- as otherwise may be required by the Principal Certifying Authority.

The report (including photographs) are required to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works. A copy of the dilapidation report is to be given to the owners of the premises encompassed in the report/s before commencing any works.

28. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and between 8.00am to 5.00pm on Saturdays and all building activities are strictly prohibited on Sundays and Public Holidays.
29. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant requirements of the *Protection of the Environment Operations Act 1997* and NSW DECC Guidelines must be satisfied at all times.
30. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied, to the satisfaction of Council.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

31. A Construction Site Management Plan is to be developed and implemented **prior to the commencement of any works**. The site management plan must include the following measures, as applicable to the type of development:
 - location and construction of protective fencing/hoardings to the perimeter of the site;
 - location of site storage areas/sheds/equipment;
 - location of building materials for construction;
 - provisions for public safety;
 - dust control measures;
 - site access location and construction
 - details of methods of disposal of demolition materials;
 - protective measures for tree preservation;
 - provisions for temporary sanitary facilities;
 - location and size of waste containers/bulk bins;
 - details of proposed sediment and erosion control measures;
 - construction noise and vibration management;

- construction traffic management details.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and amenity to the satisfaction of Council.

A copy of the Construction Site Management Plan must be provided to the Principal Certifying Authority and Council. A copy must also be maintained on site and be made available to Council officers upon request.

The sediment and erosion control measures are to be in accordance with the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to the satisfaction of Council and details are to be provided in the Construction Site Management Plan.

32. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:
- a) Building materials, sand, soil, waste materials, construction equipment or other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
 - b) Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
 - c) Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.
 - d) Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

33. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.
34. All external civil work to be carried out on Council property (including the installation and repair of roads, footpaths, vehicular crossings, kerb and guttering and drainage works), must be carried out in accordance with Council's Policy for "Vehicular Access and Road and Drainage Works" and the following requirements:
- a) All work on Council land must be carried out by Council, unless specific written approval has been obtained from Council to use non-Council contractors.
 - b) Details of the proposed civil works to be carried out on Council land

must be submitted to Council in a *Pre-paid Works Application Form*, prior to issuing an occupation certificate, together with payment of the relevant fees.

- c) If it is proposed to use non-Council contractors to carry out the civil works on Council land, the work must not commence until the written approval has been obtained from Council and the work must be carried out in accordance with the conditions of consent, Council's design details and payment of a Council design and supervision fee.
- d) The civil works must be completed in accordance with Council's conditions of consent and approved design and construction documentation, prior to occupation of the development, or as otherwise approved by Council in writing.

The following conditions are applied to provide adequate consideration for service authority assets:

- 35. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
- 36. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

- 37. The nature-strip upon Council's footway shall be excavated to a depth of 150mm, backfilled with topsoil equivalent with 'Organic Garden Mix' as supplied by Australian Native Landscapes, and re-turfed with Kikuyu Turf or similar. Such works shall be installed prior to the issue of a final Occupation Certificate.

Removal of trees within site

- 38. No objections are raised to removing any of the existing vegetation within the site where necessary in order to accommodate the proposed works as shown, as all were observed to be either in poor health and condition, such as the *Schinus areira* (Peppercorn Tree) in the rear yard, along the northern boundary, or; being insignificant or too small for the provisions of Council's Tree Preservation Order (TPO), and is subject to the provision of suitably decorative replacement planting and landscape treatment being provided in their place in this rear portion of the site.

Pruning of neighbouring tree

- 39. Permission is granted for the selective and minimal pruning of only those lower growing, lower order limbs from the western aspect of the large Gum tree growing in the rear yard of the adjoining property to the east, 97 St Thomas Street, only where they overhang the common boundary, above the subject site, and need to be pruned for clearance and/or maintenance/nuisance reasons.

Should clarification be sought on the location and extent of pruning allowable, Council's Landscape Development Officer may be contacted on 9399-0613 to

arrange a joint site inspection.

40. This approval does not imply any right of entry onto a neighbouring property nor does it allow pruning beyond a common boundary; however, where such measures are desirable in the best interests of correct pruning procedures, and ultimately, the ongoing health of this tree, the applicant must negotiate with the neighbour/tree owner for access to perform this work.
41. All pruning must be undertaken by an Arborist who holds a minimum of AQF Level V in Arboriculture, and to the requirements of both Australian Standard AS 4373-2007 'Pruning of Amenity Trees,' and NSW Work Cover Code of Practice for the Amenity Tree Industry (1998).

Protection of Street Tree

42. In order to ensure that the street tree described above is retained in good health, the following measures are to be undertaken:
 - a. All Construction Certificate documentation must show its retention, with the position and diameter of both its trunk and canopy to be clearly shown on all drawings.
 - b. Any excavations associated with the installation of new services, pipes, stormwater systems or similar over public property, must be done so along the southern site boundary, so as to both minimise root damage, as well as avoid future maintenance issues.
 - c. The applicant is not authorised to perform any works to this street tree, and shall contact Council's Landscape Development Officer on 9399-0613 should pruning or any similar such work appear necessary, with the applicant required to cover all associated costs with such work, to Council's satisfaction, prior to the issue of a Final Occupation Certificate.
 - d. While the verge is too narrow to accommodate the standard measure of Protective Fencing, the applicant must ensure that there will be no storage of materials, machinery or site office/sheds, nor is cement to be mixed or chemicals spilt/disposed of and no stockpiling of soil or rubble within the extent of its dripline, or, in an area where these types of harmful materials may run-off or wash towards its trunk and root system, with all Site Management Plans needing to acknowledge these requirements.
 - e. A refundable deposit in the form of cash, credit card or cheque for an amount of **\$1,250.00** shall be paid at the Cashier on the Ground Floor of the Administrative Centre, **prior to a Construction Certificate being issued for the development**, in order to ensure compliance with the conditions listed in this consent, and ultimately, preservation of this street tree.

The refundable deposit will be eligible for refund following the issue of a Final Occupation Certificate, subject to completion and submission of Council's 'Security Deposit Refund Application Form', and pending a satisfactory inspection by Council's Landscape Development Officer (9399-0613).

Any contravention of Council's conditions relating to the tree at any time during the course of the works, or prior to the issue of a final occupation certificate, may result in Council claiming all or part of the lodged security in order to perform any rectification works necessary, as per the requirements of 80A (6) of the Environmental Planning and

Assessment Act 1979.

- f. Further information and details on Council's requirements for trees on development sites can be obtained from the recently adopted Tree Technical Manual, which can be downloaded from Council's website at the following link, <http://www.randwick.nsw.gov.au> - Looking after our environment – Trees – Tree Management Technical Manual; which aims to achieve consistency of approach and compliance with appropriate standards and best practice guidelines.

ADVISORY MATTERS:

A1 Demolition, building or excavation work must not be commenced until;

- A Construction Certificate has been obtained from Council or an Accredited Certifier
- Council or an Accredited Certifier has been appointed as the Principal Certifying Authority for the development
- Council and the Principal Certifying Authority have been given at least 2 days notice (in writing) prior to commencing any works.

Failure to comply with these important requirements is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the *Environmental Planning & Assessment Act 1979*. Alternatively, Council may issue a penalty infringement notice (for up to \$1,500) for each offence.

A2 A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-

- Install or erect any site fencing, hoardings or site structures
- Operate a crane or hoist goods or materials over a footpath or road
- Placement of a waste skip (greater than 3m in length) or any container or other article.

A3 Specific details of the location of the building/s should be provided in the Construction Certificate to demonstrate that the proposed building work will not encroach onto the adjoining properties, Council's road reserve or any public place, to the satisfaction of the certifying authority.

A4 This determination does not include an assessment of the proposed works under the Building Code of Australia (BCA) and other relevant Standards. All new building work (including alterations and additions) must comply with the BCA and relevant Standards and you are advised to liaise with your architect, engineer and building consultant prior to lodgement of your construction certificate

A5 The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works

MOTION: (Nash/Procopiadis) CARRIED UNANIMOUSLY - SEE RESOLUTION.

D20/11 Development Application Report - 10 Eastbourne Avenue, Clovelly (DA/8/2011)

PL23/11

RESOLUTION: (Nash/Procopiadis) -

- A. That the Council support the objections under State Environmental Planning Policy No.1 (SEPP No.1) in respect to non-compliance with Clause 20F of the Randwick Local Environmental Plan 1998, relating to Floor Space Ratios on the grounds that the proposed use complies with the objective of the clause and will not adversely affect the amenity of the surrounding locality and that the Department of Planning be advised accordingly.
- B. That Council, as the consent authority, grants development consent under Sections 80 and 80A of the Environmental Planning and Assessment Act 1979, as amended, to Development Application No. DA/8/2011 for, the construction of a first floor addition to the front of the existing semi-detached dwelling house including new balcony at No. 10 Eastbourne Avenue, Clovelly subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the *Environmental Planning & Assessment Act 1979* and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered 1/11, dated 6/1/11 and received by Council on 7 January 2011, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The colours, materials and finishes of the external surfaces to the building are required to match, as closely as possible, the existing building.

Details of the proposed colours, materials and textures (i.e. a schedule and brochure/s or sample board) are to be submitted to and approved by Council's Director of City Planning, in accordance with section 80A (2) of the *Environmental Planning and Assessment Act 1979* prior to a construction certificate being issued for the relevant building works.

3. The design, materials and colour of the roofing to the proposed building/s are required to match, as closely as possible, the existing roof.
4. Metal roof sheeting is to be pre-painted (e.g. colourbond) and form part of the colour scheme and external finishes for the development.
5. There must be no encroachment of the structure/s or associated articles onto Council's road reserve, footway, nature strip or public place.

The following condition is imposed to satisfy relevant requirements of the Sydney Water Corporation.

6. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check

Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

7. In all new and upgraded building work, external timber or metal framed and brick veneer walls and roofs are to be provided with insulation (i.e. bulk insulation and a reflective building membrane/reflective sarking/foil insulation), having a minimum total thermal resistance R-value of 3.0 in roofs and 1.5 in external walls. The insulation and reflective building membrane is to be installed in accordance with the relevant requirements of the Building Code of Australia and the manufacturers details.

Details of compliance with the requirements for insulation are to be included in the **construction certificate** application.

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

8. Surface water/stormwater must be drained and discharged to the street gutter or suitably designed absorption pit, to the satisfaction of the Certifying Authority and details are to be included in the construction certificate application for the development.

Absorption pits must be located not less than 3m from any adjoining premises and the stormwater must not be directed or flow onto any adjoining premises or cause a nuisance.

Details of any works proposed to be carried out in or on a public road/footway are to be submitted to and approved by Council prior to commencement of works.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

9. The requirements and provisions of the *Environmental Planning & Assessment Act 1979* and *Environmental Planning & Assessment Regulation 2000*, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

10. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the provisions of the Building Code of Australia (BCA).

11. **Prior to the commencement of any building works**, the following requirements must be complied with:

- a) a Construction Certificate must be obtained from the Council or an accredited certifier, in accordance with the provisions of the *Environmental Planning & Assessment Act 1979*.

A copy of the construction certificate, the approved development consent

plans and consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

- b) a *Principal Certifying Authority* (PCA) must be appointed to carry out the necessary building inspections and to issue an *occupation certificate*; and
 - c) a *principal contractor* must be appointed for the building work, or in relation to residential building work, an *owner-builder* permit may be obtained in accordance with the requirements of the *Home Building Act 1989*, and the PCA and Council are to be notified accordingly; and
 - d) the *principal contractor* must be advised of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*; and
 - e) at least two days notice must be given to the Council, in writing, prior to commencing building works.
12. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the *Environmental Planning & Assessment Act 1979* and clause 162A of the *Environmental Planning & Assessment Regulation 2000*, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

13. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable);
 - name, address and telephone number of the *Principal Certifying Authority*; and
 - a statement stating that "unauthorised entry to the work site is prohibited".
14. The relevant requirements of the *Home Building Act 1989* must be complied with, in accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*.

Details of the Licensed Building Contractor (and a copy of any relevant Certificate of Insurance) or a copy of the Owner-Builder Permit (as applicable) must be provided to the Principal Certifying Authority and Council **prior to commencement of works**.

15. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building work** encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the *Environmental Planning &*

Assessment Act 1979.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The requirements of the *Environmental Planning & Assessment Act 1979* and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

16. Smoke alarms are required to be installed in each Class 1 building or residential dwelling in accordance with the relevant provisions of Part 3.7.2 of the B.C.A. – Housing Provisions.

Smoke alarms must comply with AS3786 – Smoke alarms and be connected to the consumer mains electric power supply and provided with a battery back-up.

Details of compliance with the provisions of the Building Code of Australia must be included in the plans/specification for the **construction certificate**.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

17. Certificate of Adequacy supplied by a *professional engineer* shall be submitted to the certifying authority (*and the Council, if the Council is not the certifying authority*) **prior to a construction certificate being issued** for the development, certifying the structural adequacy of the existing structure to support the proposed upper floor addition.
18. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the relevant requirements of WorkCover NSW, the NSW Department of Environment & Climate Change (formerly EPA) and Randwick City Council policies, including:
- Occupational Health and Safety Act 2000 & Regulations
 - WorkCover NSW Guidelines & Codes of Practice
 - Australian Standard 2601 (2001) – Demolition of Structures
 - The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 2005
 - Relevant DECC/EPA Guidelines
 - Randwick City Council Asbestos Policy (adopted 13 September 2005)

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

19. A Demolition Work Plan must be prepared for the development in accordance with Australian Standard AS2601-2001, Demolition of Structures.

The Demolition Work Plan must include the following information (as applicable):

- The name, address, contact details and licence number of the Demolisher /Asbestos Removal Contractor
- Details of hazardous materials (including asbestos)
- Method/s of demolition (including removal of any asbestos)
- Measures and processes to be implemented to ensure the health & safety of workers and community
- Measures to be implemented to minimise any airborne dust and asbestos
- Methods and location of disposal of any hazardous materials

- Other relevant details, measures and requirements to be implemented
- Date the demolition works will commence

The Demolition Work Plan must be submitted to the Principal Certifying Authority (PCA), not less than two (2) working days before commencing any demolition work. A copy of the Demolition Work Plan must be maintained on site and be made available to Council officers upon request.

If the work involves asbestos products or materials, a copy of the Demolition Work Plan must also be provided to Council, not less than 2 days before commencing such works.

Note it is the responsibility of the persons undertaking demolition work to obtain the relevant WorkCover licences and permits.

20. A dilapidation report prepared by a professional engineer, building surveyor or other suitably qualified independent person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:

- excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the *zone of influence* of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- new dwellings or additions to dwellings sited up to shared property boundaries (e.g. additions to a semi-detached dwelling or a terraced dwelling),
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- as otherwise may be required by the Principal Certifying Authority.

The report (including photographs) are required to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works. A copy of the dilapidation report is to be given to the owners of the premises encompassed in the report/s before commencing any works.

21. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and between 8.00am to 5.00pm on Saturdays and all building activities are strictly prohibited on Sundays and Public Holidays.

In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like, is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and loss of amenity to nearby residents.

22. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant requirements of the *Protection of the Environment Operations Act 1997* and NSW DECC Guidelines must be satisfied at all times.

Noise and vibration from any rock excavation machinery, pile drivers and all plant and equipment must be minimised, by using appropriate plant and

equipment, silencers and the implementation of noise management strategies.

23. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied, to the satisfaction of Council.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

24. A Construction Site Management Plan is to be developed and implemented **prior to the commencement of any works**. The site management plan must include the following measures, as applicable to the type of development:

- location and construction of protective fencing / hoardings to the perimeter of the site;
- location of site storage areas/sheds/equipment;
- location of building materials for construction;
- provisions for public safety;
- dust control measures;
- site access location and construction
- details of methods of disposal of demolition materials;
- protective measures for tree preservation;
- provisions for temporary sanitary facilities;
- location and size of waste containers/bulk bins;
- details of proposed sediment and erosion control measures;
- construction noise and vibration management;
- construction traffic management details.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and amenity to the satisfaction of Council.

A copy of the Construction Site Management Plan must be provided to the Principal Certifying Authority and Council. A copy must also be maintained on site and be made available to Council officers upon request.

The sediment and erosion control measures are to be in accordance with the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to the satisfaction of Council and details are to be provided in the Construction Site Management Plan.

25. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:

- a) Building materials, sand, soil, waste materials, construction equipment or other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be

maintained in a clean condition and free from any obstructions, soil and debris at all times.

- b) Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
- c) Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.
- d) Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction.

The following conditions have been applied to ensure that adequate security provisions are made for vehicular access, parking and public infrastructure:

26. A *Road / Asset Opening Permit* must be obtained from Council prior to carrying out any works within or upon a road, footpath, nature strip or in any public place, in accordance with section 138 of the *Roads Act 1993* and all of the conditions and requirements contained in the *Road / Asset Opening Permit* must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council, **prior to the issuing of a final occupation certificate** for the development.

For further information, please contact Council's Road / Asset Opening Officer on 9399 0691 or 9399 0999.

ADVISORY MATTERS:

- A1 Demolition, building or excavation work must not be commenced until;
- A Construction Certificate has been obtained from Council or an Accredited Certifier
 - Council or an Accredited Certifier has been appointed as the Principal Certifying Authority for the development
 - Council and the Principal Certifying Authority have been given at least 2 days notice (in writing) prior to commencing any works.

Failure to comply with these important requirements is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the *Environmental Planning & Assessment Act 1979*. Alternatively, Council may issue a penalty infringement notice (for up to \$1,500) for each offence.

- A2 A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-
- Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip (greater than 3m in length) or any container or other article.

- A3 Specific details of the location of the building/s should be provided in the Construction Certificate to demonstrate that the proposed building work will not encroach onto the adjoining properties, Council's road reserve or any public place, to the satisfaction of the certifying authority.
- A4 This determination does not include an assessment of the proposed works under the Building Code of Australia (BCA) and other relevant Standards. All new building work (including alterations and additions) must comply with the BCA and relevant Standards and you are advised to liaise with your architect, engineer and building consultant prior to lodgement of your construction certificate.

MOTION: (Nash/Procopiadis) CARRIED UNANIMOUSLY - SEE RESOLUTION.

**D21/11 Development Application Report - 205 Oberon Street, Coogee
(DA/500/2010)**

PL24/11 **RESOLUTION: (Nash/Procopiadis) -**

- A. That Council support objections under State Environmental Planning Policy No. 1 – Development Standards in respect to non-compliance with Clauses 20E and 20F Randwick Local Environmental Plan 1998 (Consolidation), relating to landscaped area and floor space ratio, on the grounds that the proposed development complies with the specified purpose of the clauses, and will not adversely affect the character and amenity of the locality, and that the Department of Planning be advised accordingly.
- B. That Council grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/500/2010 for alterations and additions to convert the existing dwelling into two dwelling units, including extension of the ground and lower ground floor levels, new first floor level, and associated strata subdivision into two lots at 205 Oberon street, Coogee subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the Environmental Planning and Assessment Act 1979 and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered DA01 to DA14 and stamped received by Council on 11 February 2011, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The colours, materials and finishes of the external surfaces to the building are to be compatible with the adjacent development to maintain the integrity and amenity of the building and the streetscape.

Details of the proposed colours, materials and textures (i.e. a schedule and brochure/s or sample board) are to be submitted to and approved by Council's Director of City Planning, in accordance with section 80A (2) of the *Environmental Planning and Assessment Act 1979* prior to a construction certificate being issued for the relevant building works.

3. Street numbering must be provided to the premises in a prominent position, to the satisfaction of Council.

In this regard, prior to occupation of the building, an application must be

- submitted to and approved by Council's Director of City Planning, together with the required fee, for the allocation of an appropriate street number/s to the development.
4. Power supply and telecommunications cabling to the development shall be underground.
 5. A single common television aerial, and/or satellite dish (having a maximum diameter of 700mm and not located on the front or street elevation of the building) is to be installed to serve the development.
 6. The finished ground levels external to the building are to be consistent with the development consent and are not to be raised (other than for the provision of paving or the like on the ground) without the written consent of Council.
 7. Lighting to the premises shall be designed so as not to cause a nuisance to nearby residents or motorists and to ensure that light overspill does not affect the amenity of the area.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

8. In accordance with the provisions of the Environmental Planning & Assessment Regulation 2000, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the **Construction Certificate** application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

The following condition/s are applied to meet additional demands for public facilities;

9. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, based on the development cost of \$495,000.00 the following applicable monetary levy must be paid to Council: \$4,950.00.

The levy **must be paid in cash, bank cheque or by credit card** prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following condition is applied to ensure safety from high windows;

10. Open-able windows to a room, corridor, stairway or the like with a floor level more than 4m above the external ground/surface level, must be designed and constructed to reduce the likelihood of a child accessing and falling through the window opening.

Options may include one or more of the following measures:

- i) The window having a minimum sill height of 1.5m above the internal floor level,
- ii) Providing a window locking device at least 1.5m above the internal floor level,
- iii) Fixing or securing the window (e.g. by screws or a window locking device) to restrict or to be able to secure the extent of the opening to a maximum of 125mm,
- iv) Installing a fixed heavy-duty gauge metal screen over the opening (e.g. A metal security screen or metal security mesh and frame system, but not standard fly-screen material),
- v) Other appropriate effective safety measures or barrier.

The following conditions are applied to ensure that the development satisfies the provisions of the *Environmental Planning and Assessment Act 1979* and Regulations and to provide for reasonable levels of safety and amenity:

Regulatory

11. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

12. All new building work must be carried out in accordance with the provisions of the **Building Code of Australia** (BCA), in accordance with Clause 98 of the *Environmental Planning and Assessment Regulation 2000*.
13. **Prior to the commencement of any building or fire safety works, a construction certificate must be obtained** from the Council or an accredited certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment

14. **Prior to the commencement of any building or fire safety works**, the person having the benefit of the development consent must:
 - i) appoint a *Principal Certifying Authority* for the building work, and
 - ii) appoint a *principal contractor* for the building work and notify the *Principal Certifying Authority* and Council accordingly in writing, and
 - iii) notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*, and
 - iv) give at least two days notice to the Council, in writing, of the person's intention to commence building works.

In relation to residential building work, the principal contractor must be the holder of a contractor licence, in accordance with the provisions of the Home

Building Act 1989.

15. The building works must be inspected by the *Principal Certifying Authority* (or another *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected in accordance with section 81A (2) (b1) (ii) of the Environmental Planning & Assessment Regulation 2000 and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

Documentary evidence of the building inspections carried out and details of compliance with Council's consent is to be maintained by the *Principal Certifying Authority*. Details of *critical stage inspections* carried out and copies of certification relied upon must also be forwarded to Council with the *occupation certificate*.

The *principal contractor* must ensure that the required critical stage and other inspections, as specified in the *Principal Certifying Authority's* "Notice of Critical Stage Inspections", are carried out to the satisfaction of the *Principal Certifying Authority* and at least 48 hours notice (excluding weekends and public holidays) is to be given to the *Principal Certifying Authority*, to carry out the required inspection, before carrying out any further works.

16. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours,
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
17. An **Occupation Certificate** must be obtained from the Principal Certifying Authority prior to any occupation of the building work encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The requirements of the Environmental Planning & Assessment Act 1979 and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

18. **Prior to the issuing of an interim or final occupation certificate**, a statement is required to be obtained from the Principal Certifying Authority, which confirms that the development is not inconsistent with the development consent and the relevant conditions of development consent have been satisfied.

Details of *critical stage* inspections carried out by the principal certifying authority together with any other certification relied upon and must also be provided to Council with the occupation certificate.

19. A Fire Safety Certificate must be submitted to Council **prior to the issuing of an Occupation Certificate**, in accordance with the requirements of the Environmental Planning and Assessment Regulation 2000.

A single and complete *Fire Safety Certificate* must be provided which includes details of all of the fire safety measures contained in the building and as detailed in the *fire safety schedule* attached to the Construction Certificate.

Prior to issuing any Occupation Certificate the Principal Certifying Authority must be satisfied that all of the relevant fire safety measures have been included and are sufficiently detailed within the *Fire safety Certificate*.

A copy of the *fire safety certificate* must be displayed in the building near the entrance and a copy must be forwarded to the NSW Fire Brigades.

20. The required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, prior to the issuing of a Construction Certificate, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

21. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works**.

Structural adequacy

22. A Certificate prepared by a *professional engineer* shall be submitted to the certifying authority **prior to issuing an occupation certificate or strata subdivision certificate**, which certifies that the structural adequacy of the building.
23. A Certificate prepared by a *professional engineer*, shall be submitted to the certifying authority **prior to issuing a construction certificate**, certifying the structural adequacy of the existing structure to support the new works.

Construction site management

24. Demolition work and the removal, storage, handling and disposal of building materials must be carried out in accordance with the following requirements (as applicable):
- Australian Standard 2601 (2001) – Demolition of Structures
 - Occupational Health and Safety Act 2000
 - Occupational Health and Safety (Hazardous Substances) Regulation 2001
 - Occupational Health and Safety (Asbestos Removal Work) Regulation 2001
 - Randwick City Council Asbestos Policy (adopted 13 September 2005)
 - WorkCover NSW Codes of Practice and Guidelines
 - The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 1996.
25. In accordance with Council's Asbestos Policy, the following requirements are to be satisfied if any materials containing asbestos are present in the building:
- a) Compliance with Randwick City Council's Asbestos Policy (adopted 13 September 2005).

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.
 - b) A Demolition Work Plan must be developed and implemented in accordance with Australian Standard AS2601-2001, Demolition of Structures.
 - c) A WorkCover licensed demolition or asbestos removal contractor must undertake removal of more than 10m² of bonded asbestos (or as otherwise specified by WorkCover or relevant legislation). Removal of friable asbestos material must only be undertaken by contractor that holds a current friable asbestos removal licence.
 - d) Asbestos waste must be stored, transported and disposed of in compliance with the Protection of the Environment Operations Act 1997 and the Protection of the Environment Operations (Waste) Regulation 1996.
 - e) Asbestos waste must be disposed of at an approved waste disposal depot (refer to the DEC or Waste Service NSW for details of sites). Copies of all receipts detailing method and location of disposal must be maintained on site and be provided to Council officers upon request, as evidence of correct disposal.
 - f) On demolition sites involving the removal of asbestos, a professionally manufactured sign must be clearly displayed in a prominent visible position at the front of the site, containing the words 'DANGER ASBESTOS REMOVAL IN PROGRESS' and include details of the licensed contractor. The sign shall measure not less than 400mm x 300mm and the sign is to be installed prior to demolition work commencing and is to remain in place until such time as all asbestos has been safely removed from the site.
 - g) A certificate or Statement, prepared by a suitably qualified person (ie an occupational hygienist, licensed asbestos removal contractor, building consultant, architect or experienced licensed building contractor), must be provided to Council upon completion of the works (prior to an Occupation Certificate being issued), which confirms that the relevant

requirements contained in the Asbestos Survey and conditions of consent, in relation to the safe removal and disposal of asbestos, have been satisfied.

26. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Retaining walls, shoring, or piling must be designed and installed in accordance with appropriate professional standards and the relevant requirements of the Building Code of Australia and Australian Standards. Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

27. The adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

If an excavation associated with the erection or demolition of a building extends below the level of the base of the footings of any building located on an adjoining allotment of land, the person causing the excavation must:

- preserve and protect the building /s on the adjoining land from damage; and
- effectively support the excavation and building; and
- at least seven (7) days before excavating below the level of the base of the footings of a building on an adjoining allotment of land (including a public road or public place), give notice of the intention and particulars of the works to the owner of the adjoining land.

Notes

- *This consent and condition does not authorise any trespass or encroachment upon any adjoining or supported land or building whether private or public. Where any underpinning, shoring, soil anchoring (temporary or permanent) or the like is proposed to be carried out upon any adjoining or supported land, the principal contractor or owner-builder must obtain:*
 - a) *the consent of the owners of such adjoining or supported land to trespass or encroach, or*
 - b) *an access order under the Access to Neighbouring Land Act 2000, or*
 - c) *an easement under section 88K of the Conveyancing Act 1919, or*
 - d) *an easement under section 40 of the Land & Environment Court Act 1979, as appropriate.*
- *Section 177 of the Conveyancing Act 1919 creates a statutory duty of care in relation to support of land. Accordingly, a person has a duty of care not to do anything on or in relation to land being developed (the supporting land) that removes the support provided by the supporting land to any other adjoining land (the supported land).*

28. Building, demolition and associated site works must be carried out in accordance with the following requirements:

Activity	Permitted working hours
All building, demolition and site work, including site deliveries (except as detailed below)	<ul style="list-style-type: none"> • Monday to Friday - 7.00am to 5.00pm • Saturday - 8.00am to 5.00pm • Sunday & public holidays - No work permitted
Internal work only within a commercial or industrial development, located in a commercial or industrial zone, which is not audible within any residential dwelling or commercial or industrial premises	<ul style="list-style-type: none"> • Monday to Saturday - No time limits (subject to column 1) • Sunday & public holidays - No work permitted

An application to vary the abovementioned hours may be submitted to Council's Manager Health, Building & Regulatory Services for consideration and approval to vary the specified hours may be granted in exceptional circumstances and for limited occasions (e.g. for public safety, traffic management or road safety reasons). Any applications are to be made on the standard application form and include payment of the relevant fees and supporting information. Applications must be made at least 10 days prior to the date of the proposed work and the prior written approval of Council must be obtained to vary the standard permitted working hours.

29. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant provisions of the *Protection of the Environment Operations Act 1997* must be satisfied at all times.

Noise and vibration from any rock excavation machinery and pile drivers (or the like) must be minimised by using appropriate plant and equipment and silencers and a construction noise and vibration minimisation strategy, prepared by a suitably qualified consultant is to be implemented during the works, to the satisfaction of the Principal Certifying Authority.

30. Public safety and convenience must be maintained at all times during demolition, excavation and construction works.
- a) The roadway, footpath and nature strip must be maintained in a good, safe condition and free from any obstructions, materials, soils or debris at all times. Any damage caused to the road, footway or nature strip must be repaired immediately, to the satisfaction of Council.
 - b) A Road Opening Permit must be obtained from the Council and other relevant Authorities prior to excavating or opening-up the road or footway for services or the like.
 - c) Building materials, sand, soil, waste materials or construction equipment must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
 - d) Bulk bins/waste containers must not be located upon the footpath,

roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container in a public place can be made to Council's Health, Building & Regulatory Services department.

- e) During construction stages, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by the NSW Department of Housing. Sediment and erosion control measures must be implemented prior to the commencement of any site works and be maintained throughout construction.
- f) Public access to demolition/building works, materials and equipment on the site is to be restricted and a temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.
- g) Temporary fences or hoardings or the like are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.
- h) The public safety provisions and temporary fences or hoardings must be in place prior to the commencement of any demolition, excavation or building works and be maintained throughout construction.
- i) If it is proposed to locate any hoardings, site fencing or amenities upon any part of the footpath, nature strip or any public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.
- j) Stockpiles of soil, sand, aggregate or other materials must not be located on any footpath, roadway, nature strip, drainage line or any public place and the stockpiles must be protected with adequate sediment control measures.
- k) Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
- l) A local approval application must be submitted to and be approved by Council's Building Services section prior to commencing any of the following activities upon any part of the footpath, road, nature strip or in any public place:-
 - Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip or any other container or article.

Fire safety

31. The existing levels of fire and safety within the building are to be upgraded in accordance with the following requirements and the fire safety certificate

provisions of Part 9 of the Environmental Planning and Assessment Regulation 2000 must be complied with, prior to issuing an occupation certificate [or strata subdivision certificate]:

- a) The following works are to be undertaken in accordance with the specified provisions of the Building Code of Australia (BCA), as applicable:
 - 1) Install a smoke detection and alarm system throughout the building in accordance with specification E2.2a of the BCA,
 - 2) Balustrades and handrails to stairway/s, balconies, decks or the like are to be designed and constructed to satisfy clause D2.16 & D2.17 of the BCA,
 - 3) Prior to commencing the abovementioned works, a Construction Certificate must be obtained from Council's Building Certification Services or an accredited certifier, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and *Environmental Planning & Assessment Regulation 2000*.
 - b) All new building works (including the proposed alterations/additions) must satisfy the relevant performance or deemed-to-satisfy provisions of the Building Code of Australia.
 - c) All of the fire safety upgrading works and new building work must be detailed in the Construction Certificate for the development.
32. The fire safety upgrading works must be carried out **prior to issuing of an Occupation Certificate** for the development and written confirmation must be provided to Council which confirms that all of the upgrading works have been carried out in accordance with the conditions of consent.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

33. Prior to the issuing of a final occupation certificate the applicant must meet the full cost for Council or a Council approved contractor to:
 - a) Re/Construct concrete vehicular crossings and layback at kerb opposite the vehicular entrances to the site.
34. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.
35. All external civil work to be carried out on Council property (including the installation and repair of roads, footpaths, vehicular crossings, kerb and guttering and drainage works), must be carried out in accordance with Council's Policy for "Vehicular Access and Road and Drainage Works" and the following requirements:
 - a) All work on Council land must be carried out by Council, unless specific written approval has been obtained from Council to use non-Council contractors.
 - b) Details of the proposed civil works to be carried out on Council land must be submitted to Council in a *Pre-paid Works Application Form*, prior to

issuing an occupation certificate, together with payment of the relevant fees.

- c) If it is proposed to use non-Council contractors to carry out the civil works on Council land, the work must not commence until the written approval has been obtained from Council and the work must be carried out in accordance with the conditions of consent, Council's design details and payment of a Council design and supervision fee.
- d) The civil works must be completed in accordance with Council's conditions of consent and approved design and construction documentation, prior to occupation of the development, or as otherwise approved by Council in writing.

The following conditions are applied to provide adequate provisions for future civil works in the road reserve:

- 36. The Council's Development Engineer has inspected the above site and has determined that the design alignment level (concrete/paved/tiled level) at the property boundary for driveways, access ramps and pathways or the like, must match the back of the existing footpath along the full site frontage.
- 37. The design alignment levels (concrete/paved/tiled level) issued by Council and their relationship to the footpath must be indicated on the building plans for the construction certificate. The design alignment level at the street boundary, as issued by the Council, must be strictly adhered to.
- 38. The above alignment levels and the site inspection by Council's Development Engineer have been issued at a prescribed fee of \$121.00 (inclusive of GST). This amount is to be paid prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate consideration for service authority assets:

- 39. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
- 40. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.

The following conditions are applied to provide adequate provisions for drainage and associated infrastructure:

- 41. Detailed drainage plans shall be submitted to and approved by the certifying authority prior to the issue of a construction certificate. The drainage plans shall demonstrate compliance with the conditions of this development approval.
- 42. Stormwater runoff from the site shall be discharged either:
 - a) To the kerb and gutter along the site frontage by gravity (preferably without the use of a charged system); OR

- b) Through a private drainage easement(s) to Council's kerb and gutter (or underground drainage system); OR
- c) To a suitably sized infiltration area. As a guide the infiltration area shall be sized based on a minimum requirement of 1 m² of infiltration area (together with 1 m³ of storage volume) for every 20 m² of roof/impervious area on the site. Infiltration systems shall be located a minimum 2.1 metres from any side or rear boundary and 3 metres from adjoining structures.

Prior to the use of infiltration in rear draining lots (where there is no formal overland escape route to Council's kerb and gutter/street drainage system), a geotechnical investigation will be required to determine whether the ground is suitable for infiltration. Should rock and/or a water table be encountered within two metres of the proposed base of the infiltration pit, or the ground conditions comprise low permeability soils such as clay, infiltration may not be appropriate.

NOTE: Should the applicant be unable to obtain a private drainage easement over properties to the rear of the development site (to facilitate stormwater discharge in accordance with option b)); and ground conditions preclude the use of infiltration (Option c), consideration may be given to the use of a charged system or a pump out system to drain that portion of the site that cannot be drained by gravity to the kerb and gutter at the front of the property.

- 43. Should a charged system be required to drain any portion of the site, the charged system must be designed with suitable clear-outs/inspection points at pipe bends and junctions.
- 44. Should a pump system be required to drain any portion of the site the system must be designed with a minimum of two pumps being installed, connected in parallel (with each pump capable of discharging at the required discharge rate) and connected to a control board so that each pump will operate alternatively. The pump wet well shall be sized for the 1 in 100 year, 2 hour storm assuming both pumps are not working.

The pump system must also be designed and installed strictly in accordance with Randwick City Council's Stormwater Code.

- 45. All pumps out water must pass through a stilling pit prior to being discharged by gravity to the kerb and gutter.
- 46. As the above site may encounter seepage water within the depth of the lower ground excavation, the lower ground structures are to be suitably tanked and waterproofed. A Structural Engineer\Geotechnical Engineer shall certify the tanking & waterproofing has been carried out to an acceptable standard, to the satisfaction of the certifying authority. A copy of the certification is to be forwarded to Council.

Notes:-

- a) Any subsoil drainage (from planter boxes etc) is to be disposed of within the site and is not to be discharged to Council's kerb & gutter and/or underground drainage system.
- b) Adequate provision is to be made for the ground water to drain around the lower ground level (to ensure that the lower ground structures will not dam or slow the movement of the ground water through the development site).

- c) Seepage water **must not** be collected and discharged from the site.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

47. That part of the naturestrip upon Council's footway which is damaged during the construction of the proposed works shall be excavated to a depth of 150mm, backfilled with topsoil equivalent with 'Organic Garden Mix' as supplied by Australian Native Landscapes, and re-turfed with Kikuyu turf or similar. Such works shall be completed at the applicant's expense prior to the issue of a final Occupation Certificate.

The following conditions are applied to provide adequate provisions for waste management:

48. Prior to the accredited certifier issuing an occupation certificate for the proposed development the applicant is to contact Council's Manager of Waste in regards to meeting Council's requirements for waste services to the dual occupancy.

The following conditions are applied to satisfy the provisions of Council's environmental plans, policies and codes for subdivision works:

49. All floors, external walls and ceilings depicted in the proposed strata plan must be constructed prior to the issue of a strata subdivision certificate.
50. All floors, external walls and ceilings depicted in the proposed strata plan must correspond to those depicted in this development consent and construction certificate for the building.
51. Prior to endorsement of the strata plans, all facilities required under this development consent (such as parking spaces, terraces and courtyards) must be provided in accordance with the relevant requirements.
52. If required, a Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section of the website www.sydneywater.com.au then refer to "Water Servicing Coordinator" under Developing Your Land" or telephone 13 20 92 for assistance.

Following application a "Notice of Requirements" will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Section 73 Certificate must be submitted to the Principal Certifying Authority prior to release of the plan of subdivision.

53. The applicant shall provide Council with the finalised survey plan of the property prior to receiving subdivision approval.
54. The applicant shall create suitable rights of carriageway, easements for services, support and stormwater lines, as required. The applicant shall be advised that the minimum easement width for any stormwater line is 0.9 metres.
55. A formal subdivision application is required to be submitted to and approved

by the Council or an accredited certifier and all conditions of this development consent are required to be satisfied prior to the release of the subdivision plans.

56. Details of critical stage inspections carried out by the principal certifying authority, together with any other certification relied upon, must be provided to Council or the accredited certifier prior to the issuing of a subdivision certificate.

Advisory Conditions

The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

MOTION: (Nash/Procopiadis) CARRIED UNANIMOUSLY - SEE RESOLUTION.

Cr Notley-Smith left the meeting at this point (9.00pm) and did not return.

D22/11 Development Application Report - 44 Adams Avenue, Malabar (DA/735/2009/A)

Having declared an interest in this matter earlier in the meeting, Cr Nash left the meeting during the debate and the vote on the matter.

PL25/11

RESOLUTION: (Belleli/White) that Council as the consent authority, grant its consent under Section 96 of the Environmental Planning and Assessment Act 1979 as amended to modify Development Consent No DA/735/2009 by modifying the approved development by increasing the size of the Unit 2 roof terrace and provision of roof over, and increase in wall height and ridge height for Unit 2 for 44 Adams Avenue, Malabar in the following manner:

Amend Condition No. 1 to read:

1. The development must be implemented substantially in accordance with the plans numbered 5116, DA01 - DA06, inclusive, all Revision A, dated July 2009 and received by Council on 12 October 2000, as amended by the plans numbered 5116_DA01 to 5116_DA04 dated July, 2009 all Revision B and received by Council on 10 March 2010, the application form and on any supporting information received with the application, as amended by the following:

- **Section 96 'A' plans numbered 5116S96_DA02 and 5116S96_DA03 (Issue A), and 5116S96_DA04 (Issue B) all dated 10/12/2010, and 5116_S9601 (Issue B) dated 04/03/2010 and all received by Council on 10 February 2010, only in so far as they relate to the modifications highlighted on the Section 96 'A' plans and detailed in the Section 96 'A' application, except as may be amended by the following conditions and as may be shown in red on the attached plans.**

MOTION: (Belleli/White) CARRIED – SEE RESOLUTION.

A **DIVISION** was taken and the names of the Councillors voting FOR and AGAINST were as follows:

FOR	AGAINST
Councillor Andrews	Councillor Bowen
Councillor Belleli	Councillor Matson
Councillor Hughes	Councillor Matthews
Councillor Seng	Councillor Procopiadis
Councillor Smith	Councillor Tracey

Councillor Stevenson
Councillor White
Total (7)

Councillor Woodsmith
Total (6)

Note: the officer's recommendation for refusal was overturned due to the fact that the increase in the wall height is only 20cm, the impact of the proposed modification on the neighbours is negligible as evidenced by the lack of objections and it would be unreasonable to refuse the application.

Cr Nash returned to the meeting (9.20pm).

**D23/11 Development Application Report - 37 The Corso, Maroubra
(DA/720/2010)**

PL26/11

RESOLUTION: (Nash/Procopiadis) -

- A. That Council support objections under State Environmental Planning Policy No. 1 – Development Standards in respect to non-compliance with Clauses 20B, 20F and 20G Randwick Local Environmental Plan 1998 (Consolidation), relating to Minimum Allotment Sizes, Floor Space Ratios and Building Heights, on the grounds that the proposed development complies with the specified purpose of the clauses, and will not adversely affect the character and amenity of the locality, and that the Department of Planning be advised accordingly.
- B. That Council grant development consent under Section 80 and 80A of the Environmental Planning and Assessment Act 1979 (as amended) to Development Application No. DA/720/2010 for demolition of existing structures, construction of a 3-level attached dual occupancy with basement garages, swimming pools to rear and associated works at 37 The Corso, Maroubra, subject to the following conditions:

The following conditions are applied to satisfy the provisions of section 79C of the Environmental Planning and Assessment Act 1979 and to maintain reasonable levels of environmental amenity:

1. The development must be implemented substantially in accordance with the plans numbered 2908 drawings 2 to 7 stamped received by Council 10 February 2011 and driveway drawings 1 and 2 stamped received by Council 15 November 2010, the application form and on any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:
2. The colours, materials and finishes of the external surfaces to the building are to be compatible with the adjacent development to maintain the integrity and amenity of the building and the streetscape.

Details of the proposed colours, materials and textures (i.e. a schedule and brochure/s or sample board) are to be submitted to and approved by Council's Director of City Planning, in accordance with section 80A (2) of the *Environmental Planning and Assessment Act 1979* **prior to a construction certificate being issued** for the relevant building works.

3. The upper two-thirds of the blade walls extending from the street elevation to the front boundary must be constructed or installed with inserts so that their surface area is at least 50% open for a distance of 3.6m from the front boundary. Design details must be shown on the Construction Certificate.
4. There must be no encroachment of the structure/s or associated articles onto Council's road reserve, footway, nature strip or public place.

5. Street numbering must be provided to the premises in a prominent position, in accordance with the Australia Post guidelines and AS/NZS 4819 (2003) to the satisfaction of Council, **prior to an occupation certificate being issued** for the development.
6. The finished ground levels external to the building are to be consistent with the development consent and are not to be raised (other than for the provision of approved paving or the like on the ground) without the written consent of Council.
7. External lighting to the premises shall be designed so as not to cause a nuisance to nearby residents.
8. No cooking facilities or sanitary fittings other than those indicated on the approved plans are to be installed in the premises without the prior written consent of the Council.
9. Open-able windows to a room, corridor, stairway or the like with a floor level more than 4m above the external ground/surface level, must be designed and constructed to reduce the likelihood of a child accessing and falling through the window opening.

Options may include one or more of the following measures:

- i) The window having a minimum sill height of 1.5m above the internal floor level,
- ii) Providing a window locking device at least 1.5m above the internal floor level,
- iii) Fixing or securing the window (e.g. by screws or a window locking device) to restrict or to be able to secure the extent of the opening to a maximum of 125mm,
- iv) Installing a fixed heavy-duty gauge metal screen over the opening (e.g. A metal security screen or metal security mesh and frame system, but not standard fly-screen material),
- v) Other appropriate effective safety measures or barrier.

The following condition/s are imposed to satisfy the requirements of the Sydney Water Corporation.

10. All building, plumbing and drainage work must be carried out in accordance with the requirements of the Sydney Water Corporation.

The approved Construction Certificate plans must be submitted to a Sydney Water Quick Check agent or Customer Centre prior to commencing any building or excavation works, to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if any further requirements need to be met.

If suitable, the plans will be appropriately stamped. For Quick Check agent details please refer to Sydney Water's web site at www.sydneywater.com.au and go to the Building, Developing and Plumbing, then Quick Check or Building and Renovating or telephone 13 20 92.

The principal certifying authority must ensure that a Quick Check Agent/Sydney Water has appropriately stamped the plans **before commencing any works.**

The following condition is applied to meet additional demands for public facilities;

11. In accordance with Council's Section 94A Development Contributions Plan effective from 2 July 2007, based on the development cost of \$934,887 the following applicable monetary levy must be paid to Council: \$9,348.

The levy **must be paid in cash, bank cheque or by credit card** prior to a construction certificate being issued for the proposed development. The development is subject to an index to reflect quarterly variations in the Consumer Price Index (CPI) from the date of Council's determination to the date of payment.

Council's Section 94A Development Contribution Plans may be inspected at the Customer Service Centre, Administrative Centre, 30 Frances Street, Randwick or at www.randwick.nsw.gov.au.

The following conditions are imposed to promote ecologically sustainable development and energy efficiency.

12. In accordance with Section 80A (11) of the Environmental Planning and Assessment Act 1979 and Clause 97A of the *Environmental Planning and Assessment Regulation 2000*, it is a prescribed condition that all of the required commitments listed in the relevant BASIX Certificate for this development are fulfilled.
13. In accordance with the provisions of the *Environmental Planning & Assessment Regulation 2000*, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building must not be inconsistent with the development consent and any proposed variations to the building to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

14. The following provisions are to be implemented in accordance with the relevant BASIX Certificate and details are to be included in the Construction Certificate documentation (as applicable), to the satisfaction of the Certifying Authority:
- Stormwater management (i.e. rainwater tanks)
 - Water efficiency (i.e. triple A rated taps and showers, dual flush toilets and water re-use)
 - Landscaping provisions
 - Thermal comfort (i.e. construction materials, glazing and insulation)
 - Energy efficiency (i.e. cooling & heating provisions and hot water systems)
15. In accordance with Clause 154B of the *Environmental Planning & Assessment Regulation 2000*, a Certifying Authority must not issue an Occupation Certificate for this development, unless it is satisfied that each of the required BASIX commitments have been fulfilled.

Relevant documentary evidence of compliance with the BASIX commitments is to be forwarded to the Council upon issuing an Occupation Certificate.

The following group of conditions have been applied to ensure that adequate drainage is provided from the premises and to maintain adequate levels of health and amenity in the locality:

16. External paths and ground surfaces are to be constructed at appropriate levels and be graded and drained away from the building and adjoining premises, so as not to result in the entry of water into the building, or cause a nuisance or damage to the adjoining premises.

The following conditions are applied to ensure that the development satisfies the provisions of the Environmental Planning and Assessment Act 1979 and Regulations:

17. The requirements and provisions of the *Environmental Planning & Assessment Act 1979* and *Environmental Planning & Assessment Regulation 2000*, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

18. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the provisions of the Building Code of Australia (BCA).

19. **Prior to the commencement of any building works**, the following requirements must be complied with:

- a) a Construction Certificate must be obtained from the Council or an accredited certifier, in accordance with the provisions of the *Environmental Planning & Assessment Act 1979*.

A copy of the construction certificate, the approved development consent plans and consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

- b) a *Principal Certifying Authority* (PCA) must be appointed to carry out the necessary building inspections and to issue an *occupation certificate*; and
- c) a *principal contractor* must be appointed for the building work, or in relation to residential building work, an *owner-builder* permit may be obtained in accordance with the requirements of the *Home Building Act 1989*, and the PCA and Council are to be notified accordingly; and
- d) the *principal contractor* must be advised of the required *critical stage inspections* and other inspections to be carried out, as specified by the *Principal Certifying Authority*; and
- e) at least two days notice must be given to the Council, in writing, prior to commencing building works.

In relation to residential building work, the principal contractor must be the holder of a contractor licence, in accordance with the provisions of the Home Building Act 1989.

20. The building works must be inspected by the *Principal Certifying Authority* (or

other *certifying authority* if the *Principal Certifying Authority* agrees), in accordance with sections 109 E (3) of the *Environmental Planning & Assessment Act 1979* and clause 162A of the *Environmental Planning & Assessment Regulation 2000*, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.

The *Principal Certifying Authority* must specify the relevant stages of construction to be inspected and a satisfactory inspection must be carried out, to the satisfaction of the *Principal Certifying Authority*, prior to proceeding to the subsequent stages of construction or finalisation of the works (as applicable).

21. A sign must be erected and maintained in a prominent position on the site for the duration of the works, which contains the following details:
- name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable)
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
22. The relevant requirements of the *Home Building Act 1989* must be complied with, in accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*.

Details of the Licensed Building Contractor (and a copy of any relevant Certificate of Insurance) or a copy of the Owner-Builder Permit (as applicable) must be provided to the Principal Certifying Authority and Council **prior to commencement of works**.

23. The required Long Service Levy payment, under the *Building and Construction Industry Long Service Payments Act 1986*, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the *Environmental Planning & Assessment Act 1979*.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

24. An **Occupation Certificate** must be obtained from the Principal Certifying Authority **prior to any occupation of the building work** encompassed in this development consent (including alterations and additions to existing buildings), in accordance with the relevant provisions of the *Environmental Planning & Assessment Act 1979*.

An Occupation Certificate must not be issued for the development if the development is inconsistent with the development consent. The relevant requirements of the *Environmental Planning & Assessment Act 1979* and conditions of development consent must be satisfied prior to the issuing of an occupation certificate.

25. **Prior to the issuing of an interim or final occupation certificate**, a statement is required to be obtained from the Principal Certifying Authority or

other suitably qualified person, which confirms that the development is not inconsistent with the development consent and the relevant conditions of development consent have been satisfied.

26. Smoke alarms must be installed in each Class 1 building or residential dwelling in accordance with the relevant provisions of Part 3.7.2 of the B.C.A. – Housing Provisions.

Smoke alarms must comply with AS3786 – Smoke alarms and be connected to the consumer mains electric power supply and provided with a battery back-up. Details of compliance with the provisions of the Building Code of Australia must be included in the plans / specification for the **construction certificate**.

The following conditions are applied to ensure that the development satisfies relevant standards of construction, and to maintain adequate levels of health, safety and amenity during construction:

27. The demolition of buildings and the removal, storage, handling and disposal of building materials must be carried out in accordance with the relevant requirements of WorkCover NSW, the NSW Department of Environment & Climate Change and Randwick City Council policies, including:

- Occupational Health & Safety Act 2000 & Regulations
- WorkCover NSW Code of Practice for the Safe Removal of Asbestos
- WorkCover NSW Guidelines and Codes of Practice
- Australian Standard 2601 (2001) – Demolition of Structures
- The Protection of the Environment Operations Act 1997 and Protection of the Environment Operations (Waste) Regulation 2005
- Relevant DECC/EPA Guidelines
- Randwick City Council Asbestos Policy (adopted 13 September 2005)

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development section or a copy can be obtained from Council's Customer Service Centre.

28. A Demolition Work Plan must be prepared for the development in accordance with Australian Standard AS2601-2001, Demolition of Structures.

The Demolition Work Plan must include the following information (as applicable):

- The name, address, contact details and licence number of the Demolisher /Asbestos Removal Contractor
- Details of hazardous materials (including asbestos)
- Method/s of demolition (including removal of any asbestos)
- Measures and processes to be implemented to ensure the health & safety of workers and community
- Measures to be implemented to minimise any airborne dust and asbestos
- Methods and location of disposal of any hazardous materials
- Other relevant details, measures and requirements to be implemented
- Date the demolition works will commence

The Demolition Work Plan must be submitted to the Principal Certifying Authority (PCA), not less than two (2) working days before commencing any demolition work. A copy of the Demolition Work Plan must be maintained on site and be made available to Council officers upon request.

If the work involves asbestos products or materials, a copy of the Demolition Work Plan must also be provided to Council not less than 2 days before

commencing those works.

Note it is the responsibility of the persons undertaking demolition work to obtain the relevant WorkCover licences and permits.

29. Any work involving the demolition, storage or disposal of asbestos products and materials must be carried out in accordance with the following requirements:

- Relevant Occupational Health & Safety legislation and WorkCover NSW requirements
- Randwick City Council's Asbestos Policy (adopted 13 September 2005)
- A WorkCover licensed demolition or asbestos removal contractor must undertake removal of more than 10m² of bonded asbestos (or as otherwise specified by WorkCover or relevant legislation). Removal of friable asbestos material must only be undertaken by contractor that holds a current friable asbestos removal licence.
- On sites involving the removal of asbestos, a sign must be clearly displayed in a prominent visible position at the front of the site, containing the words 'DANGER ASBESTOS REMOVAL IN PROGRESS' and include details of the licensed contractor.
- Asbestos waste must be stored, transported and disposed of in compliance with the *Protection of the Environment Operations Act 1997* and the *Protection of the Environment Operations (Waste) Regulation 2005*.
- A Clearance Certificate or Statement, prepared by a suitably qualified person (ie an occupational hygienist, licensed asbestos removal contractor, building consultant, architect or experienced licensed building contractor), must be provided to Council and the Principal certifying authority upon completion of the asbestos related works which confirms that the asbestos material have been removed appropriately and the relevant conditions of consent have been satisfied.

A copy of Council's Asbestos Policy is available on Council's web site at www.randwick.nsw.gov.au in the Building & Development Section or a copy can be obtained from Council's Customer Service Centre.

30. A dilapidation report prepared by a professional engineer, building surveyor or other suitably qualified independent person must be submitted to the satisfaction of the Principal Certifying Authority **prior to commencement** of any demolition, excavation or building works, in the following cases:

- excavations for new dwellings, additions to dwellings, swimming pools or the like which are proposed to be located within the *zone of influence* of the footings of any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- new dwellings or additions to dwellings sited up to shared property boundaries (e.g. additions to a semi-detached dwelling or terraced dwellings),
- excavations for new dwellings, additions to dwellings, swimming pools or the like which are within rock and may result in vibration and or potential damage to any dwelling, associated garage or other substantial structure located upon an adjoining premises,
- as otherwise may be required by the Principal Certifying Authority.

The report (including photographs) are required to detail the current condition and status of any dwelling, associated garage or other substantial structure located upon the adjoining premises, which may be affected by the subject works. A copy of the dilapidation report is to be given to the owners of the premises encompassed in the report/s before commencing any works.

31. All excavations and backfilling associated with the erection or demolition of a building must be executed safely in accordance with appropriate professional standards and excavations are to be properly guarded and supported to prevent them from being dangerous to life, property or buildings.

Retaining walls, shoring or piling must be provided to support land which is excavated in association with the erection or demolition of a building, to prevent the movement of soil and to support the adjacent land and buildings, if the soil conditions require it. Adequate provisions are also to be made for drainage.

Details of proposed retaining walls, shoring or piling are to be submitted to and approved by the Principal Certifying Authority for the development prior to commencing such excavations or works.

32. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 E of the *Environmental Planning & Assessment Regulation 2000*, it is a prescribed condition that the adjoining land and buildings located upon the adjoining land must be adequately supported at all times.

- a) If the development involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development must, at the person's own expense:

- i) protect and support the adjoining premises from possible damage from the excavation, and
- ii) where necessary, underpin the adjoining premises to prevent any such damage.

- b) The condition referred to in subclause 1) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.

33. Except with the written approval of Council's Manager of Health, Building & Regulatory Services, all building, demolition and associated site works (including site deliveries) must only be carried out between the hours of 7.00am to 5.00pm on Monday to Friday inclusive and between 8.00am to 5.00pm on Saturdays and all building activities are strictly prohibited on Sundays and Public Holidays.

In addition, the use of any rock excavation machinery or any mechanical pile drivers or the like, is restricted to the hours of 8.00am to 5.00pm (maximum) on Monday to Friday only, to minimise the noise levels during construction and loss of amenity to nearby residents.

34. Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents and the relevant requirements of the *Protection of the Environment Operations Act 1997* and NSW DECC Guidelines must be satisfied at all times.

Noise and vibration from any rock excavation machinery, pile drivers and all plant and equipment must be minimised, by using appropriate plant and equipment, silencers and the implementation of noise management strategies.

A Construction Noise Management Plan, prepared by a suitably qualified person is to be implemented throughout the works, to the satisfaction of the Council. A copy of the strategy must be provided to the Principal Certifying Authority and Council **prior to the commencement of works**.

The Construction Noise Management Plan is to be prepared in accordance with the NSW DECC Construction Noise Guideline.

35. A Registered Surveyor's check survey certificate or *compliance certificate* is to be obtained at the following stage/s of construction to demonstrate compliance with the approved setbacks, levels, layout and height of the building to the satisfaction of the Principal Certifying Authority:

- prior to construction of the footings or first completed floor slab (prior to the pouring of concrete),
- upon completion of the building, prior to issuing an occupation certificate.

The survey documentation must be forwarded to the Principal Certifying Authority and a copy is to be forwarded to the Council, if the Council is not the principal certifying authority.

36. Temporary toilet facilities are to be provided, at or in the vicinity of the work site throughout the course of demolition and construction, to the satisfaction of WorkCover NSW and the toilet facilities must be connected to a public sewer or other sewage management facility approved by Council.
37. Public safety must be maintained at all times and public access to the site and building works, materials and equipment on the site is to be restricted, when work is not in progress or the site is unoccupied, to the satisfaction of Council.

A temporary safety fence is to be provided to protect the public, located to the perimeter of the site (unless the site is separated from the adjoining land by an existing structurally adequate fence, having a minimum height of 1.5 metres). Temporary fences are to have a minimum height of 1.8 metres and be constructed of cyclone wire fencing, with geotextile fabric attached to the inside of the fence to provide dust control, or other material approved by Council.

Temporary site fences are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

The public safety provisions and temporary fences must be in place **prior to the commencement of any demolition, excavation or building works** and be maintained throughout construction.

If it is proposed to locate any site fencing, hoardings or amenities upon any part of the footpath, nature strip or public place, the written consent from Council's Building Services section must be obtained beforehand and detailed plans are to be submitted to Council for consideration, together with payment of the weekly charge in accordance with Council's adopted fees and charges.

38. A Construction Site Management Plan is to be developed and implemented

prior to the commencement of any works. The site management plan must include the following measures, as applicable to the type of development:

- location and construction of protective fencing / hoardings to the perimeter of the site;
- location of site storage areas/sheds/equipment;
- location of building materials for construction;
- provisions for public safety;
- dust control measures;
- site access location and construction
- details of methods of disposal of demolition materials;
- protective measures for tree preservation;
- provisions for temporary sanitary facilities;
- location and size of waste containers/bulk bins;
- details of proposed sediment and erosion control measures;
- construction noise and vibration management;
- construction traffic management details.

The site management measures are to be implemented prior to the commencement of any site works and be maintained throughout the works, to maintain reasonable levels of public health, safety and amenity to the satisfaction of Council. A copy of the Construction Site Management Plan must be provided to the Principal Certifying Authority and Council. A copy must also be maintained on site and be made available to Council officers upon request.

39. Sediment and erosion control measures must be provided in accordance with the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to Council's satisfaction.

Details of proposed sediment and erosion control measures shall include; a site plan; indicating the slope of land, access points & access control measures, location and type of sediment & erosion controls, location of existing vegetation to be retained, location of material stockpiles and storage areas, location of building operations and equipment, methods of sediment control, details of drainage systems and details of existing and proposed vegetation.

40. Public safety and convenience must be maintained at all times during demolition, excavation and construction works and the following requirements must be complied with:

- a) Building materials, sand, soil, waste materials, construction equipment or 5 other activities must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
- b) Stockpiles of soil, sand, aggregate or other materials must not be located on any footpath, roadway, nature strip, drainage line or any public place and the stockpiles must be protected with adequate sediment control measures.
- c) Building operations such as brick cutting, washing tools or equipment and mixing mortar are not permitted on public footpaths, roadways, nature strips, in any public place or any location which may lead to the discharge of materials into the stormwater drainage system.
- d) Bulk bins/waste containers must not be located upon the footpath, roadway or nature strip at any time without the prior written approval

of the Council. Applications to place a waste container in a public place can be made to Council's Health Building and Regulatory Services section.

- e) Any part of Council's road, footway or nature strip which is damaged as a result of the work must be repaired or replaced to Council's satisfaction.

The following conditions are applied to ensure compliance with the Swimming Pools Act 1992 and to maintain public safety and amenity:

- 41. Swimming pools are to be provided with childproof fences and self-locking gates, in accordance with the *Swimming Pools Act 1992* and regulations.

The swimming pool is to be surrounded by a fence having a minimum height of 1.2m, that separates the pool from any residential building situated on the premises and from any place (whether public or private) adjoining the premises; and that is designed, constructed and installed in accordance with AS 1926.1 - 2007.

Gates to pool area shall be a maximum width of 1 metre, and be self-closing and latching; the gate is required to open outwards from the pool area and prevent a small child opening the gate or door when the gate or door is closed.

Temporary pool safety fencing is to be provided pending the completion of all building work and the pool must not be filled until a fencing inspection has been carried out and approved by the principal certifying authority.

A 'warning notice' must be erected in a prominent position in the immediate vicinity of the swimming pool, in accordance with the provisions of the *Swimming Pools Regulation 2008*, detailing pool safety requirements, resuscitation techniques and the importance of the supervision of children at all times.

- 42. Spa pools are to be provided with a child resistant barrier, in accordance with the provisions of the *Swimming Pools Act 1992* and regulations.

A 'warning notice' must be erected in a prominent position in the immediate vicinity of the swimming pool, in accordance with the provisions of the *Swimming Pools Regulation 2008*, detailing pool safety requirements, resuscitation techniques and the importance of the supervision of children at all times.

- 43. Swimming pools are to be designed, installed and operated in accordance with the following general requirements: -

- a) Backwash of the pool filter and other discharge of water is to be drained to the sewer in accordance with the requirements of the Sydney Water Corporation; and
- b) All pool overflow water is to be drained away from the building and adjoining premises, so as not to result in a nuisance or damage to premises; and
- c) Water recirculation and filtrations systems are required to comply with AS 1926.3 - 2003: *Swimming Pool Safety - Water Recirculation and Filtration Systems*; and
- d) Pool plant and equipment is to be enclosed in a sound absorbing enclosure or installed within a building, to minimise noise emissions and possible nuisance to nearby residents; and
- e) The pool plant and equipment shall not be operated during the following hours if the noise emitted can be heard within a habitable room in any

other residential premises, or, as otherwise specified in relevant Noise Control Regulations:

- i. before 8.00am or after 8.00pm on any Sunday or public holiday; or
- ii. before 7.00am or after 8.00pm on any other day.

44. Written notification must be provided to Council advising of the installation and completion of the Swimming Pool (or Spa Pool), to satisfy the requirements of the *Swimming Pools Act 1992*, **prior to issuing an Occupation Certificate.**

Council's "Notification & Registration of a Swimming Pool" form must be completed and forwarded to Council prior to any Occupation Certificate being issued for the pool.

45. The operation of all plant and equipment shall not give rise to an 'offensive noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the plant and equipment shall not give rise to an $L_{Aeq, 15 \text{ min}}$ sound pressure level at any affected premises that exceeds the background $L_{A90, 15 \text{ min}}$ noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A) in accordance with relevant NSW Department of Environment & Conservation Noise Control Guidelines.

The following conditions have been applied to ensure that noise emissions from the development satisfy legislative requirements and maintain reasonable levels of amenity to the area:

46. The installation of rainwater tanks shall comply with the following noise control requirements:
- a) The operation of all plant and equipment shall not give rise to an 'offensive noise' as defined in the *Protection of the Environment Operations Act 1997 and Regulations*.

In this regard, the operation of the plant and equipment shall not give rise to an $L_{Aeq, 15 \text{ min}}$ sound pressure level at any affected premises that exceeds the background $L_{A90, 15 \text{ min}}$ noise level, measured in the absence of the noise source/s under consideration by more than 5dB(A) in accordance with relevant NSW Department of Environment & Conservation Noise Control Guidelines.

- b) Plant and equipment associated with rainwater tank(s) are to be enclosed in a sound absorbing enclosure or installed within a building, to minimise noise emissions and possible nuisance to nearby residents.
- c) The operation of plant and equipment associated with the rainwater tank(s) are to be restricted to the following hours if the noise emitted can be heard within a habitable room in any other residential premises:
 - before 8.00am or after 8.00pm on weekends or public holiday; or
 - before 7.00am or after 8.00pm on weekdays.

The following conditions are applied to provide adequate security against damage to Council's infrastructure:

47. The following damage/civil works security deposit requirement is to be complied with prior to a construction certificate being issued for the development, as security for making good any damage caused to the roadway, footway, verge or any public place; or as security for completing any public

work; and for remedying any defect on such public works, in accordance with section 80A(6) of the Environmental Planning and Assessment Act 1979:

- a) \$2000.00 - Damage/Civil Works Security Deposit

The damage/civil works security deposit may be provided by way of a cash or cheque with the Council and is refundable upon:

- A satisfactory inspection by Council that no damage has occurred to the Council assets such as roadway, kerb, guttering, drainage pits footway, or verge; and
- Completion of the civil works as conditioned in this development consent by Council.

The applicant is to advise Council, in writing, of the completion of all building works and/or obtaining an occupation certificate, if required.

The following conditions are applied to provide adequate provisions for access, transport and infrastructure:

48. Prior to the issuing of an Occupation Certificate the applicant must meet the full cost for Council or a Council approved contractor to:
- a) Construct a concrete vehicular crossing and layback at kerb opposite the vehicular entrances to the site.
 - b) Re-construct a kerb and gutter for the full site frontage except opposite the vehicular entrance and exit points.
 - c) Re/construct a 1.3m wide concrete footpath along the full site frontage. Any unpaved areas on the nature strip must be turfed and landscaped to Council's specification.
49. The applicant must meet the full cost for Council or a Council approved contractor to repair/replace any damaged sections of Council's footpath, kerb & gutter, nature strip etc which are due to building works being carried out at the above site. This includes the removal of cement slurry from Council's footpath and roadway.
50. All external civil work to be carried out on Council property (including the installation and repair of roads, footpaths, vehicular crossings, kerb and guttering and drainage works), must be carried out in accordance with Council's Policy for "Vehicular Access and Road and Drainage Works" and the following requirements:
- a) All work on Council land must be carried out by Council, unless specific written approval has been obtained from Council to use non-Council contractors.
 - b) Details of the proposed civil works to be carried out on Council land must be submitted to Council in a *Pre-paid Works Application Form*, prior to issuing an occupation certificate, together with payment of the relevant fees.
 - c) If it is proposed to use non-Council contractors to carry out the civil works on Council land, the work must not commence until the written approval has been obtained from Council and the work must be carried out in accordance with the conditions of consent, Council's design details and payment of a Council design and supervision fee.

- d) The civil works must be completed in accordance with Council's conditions of consent and approved design and construction documentation, prior to occupation of the development, or as otherwise approved by Council in writing.
51. The vehicle crossing shall be widened to 4.0m wide at the front property alignment. Plans submitted for the construction certificate shall demonstrate compliance with this requirement.

The following conditions are applied to provide adequate provisions for future civil works in the road reserve:

52. The Council's Development Engineer has inspected the above site and has determined that the design alignment level at the property boundary for driveways, access ramps and pathways or the like, must match the back of the existing footpath along the full site frontage.
53. The design alignment levels issued by Council and their relationship to the /kerb/footpath must be indicated on the building plans for the construction certificate. The design alignment level at the street boundary, as issued by the Council, must be strictly adhered to.
54. The above alignment levels and the site inspection by Council's Development Engineering Section have been issued at a prescribed fee of \$588 calculated at \$44.00 (inclusive of GST) per metre of site frontage. This amount is to be paid to Council prior to a construction certificate being issued for the development.

The following conditions are applied to provide adequate consideration for service authority assets:

55. A public utility impact assessment must be carried out on all public utility services on the site, roadway, nature strip, footpath, public reserve or any public areas associated with and/or adjacent to the development/building works and include relevant information from public utility authorities and exploratory trenching or pot-holing, if necessary, to determine the position and level of service.
56. The applicant must meet the full cost for telecommunication companies, gas providers, Energy Australia and Sydney Water to adjust/repair/relocate their services as required. The applicant must make the necessary arrangements with the service authority.
57. A Road/Asset Opening Permit must be obtained from Council prior to carrying out any works within or upon a road, footpath, nature strip or in any public place, in accordance with section 138 of the Roads Act 1993 and all of the conditions and requirements contained in the Road / Asset Opening Permit must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council, prior to the issuing of a final occupation certificate for the development.

For further information, please contact Council's Road / Asset Opening Officer on 9399 0691 or 9399 0999.

58. A Section 73 Compliance Certificate under the Sydney water Act 1994 must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section of the website www.sydneywater.com.au then refer to "Water Servicing Coordinator" under Developing Your Land" or telephone 13 20 92 for assistance.

Following application a "Notice of Requirements" will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Notice must be issued to the Principal Certifying Authority prior to the construction certificate being issued.

The Section 73 Certificate must be submitted to the Principal Certifying Authority prior to occupation of the development.

The following conditions are applied to provide adequate provisions for drainage and associated infrastructure:

59. Generally all site stormwater shall be piped to a sediment/silt arrester pit that drains to Council's kerb and gutter OR underground drainage system via a new kerb inlet pit.

The location and details of the proposed internal stormwater pipelines, silt arrester pit, kerb inlet pit shall be submitted to and approved by the certifying authority prior to a construction certificate being issued for the development. A copy of the plans shall be forwarded to Council, prior to a construction certificate being issued, if Council is not the certifying authority.

Notes:

- a. The sediment/silt arrester pit shall be constructed:-
- i. within the site at or near the street boundary.
 - ii. with a child proof and corrosion resistant fastening system (e.g. spring loaded jay-bolt).
 - iii. with a minimum of 4 x 90 mm diameter weep holes (preferably located in the walls of the pit at the floor level) and with a suitable geotextile material **with a high filtration rating** located around the weep holes.
 - iv. with the pit floor being a minimum 300mm below the invert level of the outlet pipelines.
 - v. with a **galvanised** heavy duty screen (Lysaght RH3030 Maximesh or similar) located over the outlet pipes draining to the infiltration pit and the kerb. (Similar to a Mascot GRC stormwater discharge control pit, product code DS3SDC).

All works shall be to the satisfaction of the certifying authority.

- b. The overflow pipe/s from the rainwater tank/s shall be directed into the sediment arrester pit.
60. Prior to the issuing of an occupation certificate, the applicant shall submit to the Principal Certifying Authority (PCA) and Council, certification from a suitably qualified and experienced Hydraulic Engineer confirming that the design and construction of the stormwater drainage system complies with the conditions of development consent. The certification must be provided to the satisfaction of the PCA.
61. If connecting to Council's underground drainage system a new kerb inlet pit shall be constructed in The Corso over the existing Council stormwater line and

shall be constructed in general accordance with Council's standard drawing SD7a.

62. As the above site may encounter groundwater/seepage water within the depth of the basement excavation), the basement garage and similar structures are to be suitably tanked and waterproofed. A Structural Engineer\Geotechnical Engineer shall certify the tanking & waterproofing has been carried out to an acceptable standard, to the satisfaction of the certifying authority. A copy of the certification is to be forwarded to Council.

Notes:

- a) Any subsoil drainage (from planter boxes etc) is to be disposed of within the site and is not to be discharged to Council's kerb & gutter and/or underground drainage system.
- b) Adequate provision is to be made for the ground water to drain around the basement area (to ensure that the basement will not dam or slow the movement of the ground water through the development site).
- c) Seepage water must not be collected and discharged from the site.

The following conditions are applied to provide adequate provisions for waste management:

63. Prior to the issuing of a construction certificate for the proposed development the applicant is to submit to Council and have approved by Council's Manager of Waste Services, a Waste Management Plan detailing waste and recycling storage and disposal for the development site.

The plan shall detail the type and quantity of waste to be generated by the development; demolition waste; construction waste; materials to be re-used or recycled; facilities/procedures for the storage, collection recycling & disposal of waste and the on-going management of waste.

64. Prior to the Principal Certifying Authority issuing an occupation certificate for the proposed development the applicant is to contact Council's Manager of Waste in regards to meeting Council's requirements for waste services to the new residences.

The following conditions are applied to provide adequate provisions for landscaping and to maintain reasonable levels of environmental amenity:

65. Landscaping at the site shall be installed substantially in accordance with the Landscape Plan by Andre Baroukh + Associates Architects, drawing no.8, job number 2908, dated 19/08/10, subject to the following additional details being included on an amended plan, which must be submitted to, and be approved by, the PCA, prior to the commencement of site works:

- a) The *Strelitzia parvifolia var. juncea* (Reed Strelitzia's) shown along the front of the proposed building must be a minimum of 200mm pot size at the time of planting;
- b) Additional planting incorporating the use of suitable accent/feature species within the front yards of both proposed dwellings to improve the appearance of the development and its presentation to the streetscape;
- c) At least 2 x 100 litre (pot/bag size at the time of planting) native trees shall be planted within the rear portion of the site, comprising one each within each of the proposed dwellings, selecting those species which will

attain a minimum height of between 4-7 metres at maturity;

- d) The raised planter proposed across the width of the rear boundary must have a minimum soil width of 800mm.
66. The PCA must ensure that the landscaping is installed in accordance with the approved plan and relevant conditions, prior to issuing a Final (or any other type of Interim) Occupation Certificate/s, with the owner to ensure it is maintained in a healthy and vigorous state until maturity.
67. The nature-strip upon Council's footway shall be excavated to a depth of 150mm, backfilled with topsoil equivalent with 'Organic Garden Mix' as supplied by Australian Native Landscapes, and re-turfed with Kikuyu Turf or similar. Such works shall be installed prior to the issue of a final Occupation Certificate.

New Street Trees

68. The applicant shall submit a total payment of **\$214.50** (including GST), being the cost for Council to supply and install 2 x 25 litre street trees, *Cupaniopsis anacardioides* (Tuckeroo's) on The Corso verge, being one each in line with both the western and eastern site boundaries.

The contribution shall be paid into Tree Amenity Income at the Cashier on the Ground Floor of the Administrative Centre, prior to a Construction Certificate being issued for the development.

The applicant must contact Council's Landscape Development Officer on 9399-0613 (quoting the receipt number), and giving at least four working weeks notice, to arrange for planting of the new street trees upon completion of all works.

Tree removals within site

69. Approval is granted for the removal of any existing vegetation within the site where necessary in order to accommodate the proposed works as shown, as all were observed to be insignificant, including the Bottlebrush and two Conifers located centrally in the rear yard, but is subject to full implementation of the approved landscape plan as described above.

Pruning of neighbouring tree

70. Permission is granted for the selective and minimal pruning of only those overhanging branches from the western aspect of the *Callistemon viminalis* (Weeping Bottlebrush), located in the front yard of the adjoining property to the east, 39 The Corso, against the common boundary, where necessary in order to avoid damage to the tree, or, clearance for the proposed covered walkway as shown.
71. This approval does not imply any right of entry onto a neighbouring property nor does it allow pruning beyond a common boundary; however, where such measures are desirable in the best interests of correct pruning procedures, and ultimately, the ongoing health of this tree, the applicant must negotiate with the neighbour/tree owner for access to perform this work.
72. All pruning must be undertaken by an Arborist who holds a minimum of AQF Level V in Arboriculture, and to the requirements of Australian Standard AS 4373-2007 'Pruning of Amenity Trees,' and NSW Work Cover Code of Practice for the Amenity Tree Industry (1998).

Protection of neighbouring Palm

73. In order to ensure retention of the *Archontophoenix cunninghamiana* (Bangalow Palm) located in the rear yard of the adjoining property to the southwest, 40 Sackville Street, against the common boundary in good health, the following measures are to be undertaken:
- a. All documentation submitted for the Construction Certificate application must show the retention of this neighbouring palm, with the position and diameter of both its trunk and crown to be clearly shown on all drawings.
 - b. Any roots encountered during either demolition of the existing garage; or; excavations associated with the new masonry wall/planter and in-ground pool as shown must be cut cleanly by hand, and the affected area backfilled with clean site soil as soon as practically possible.
 - c. During the course of the approved works, there is to be no storage of materials, machinery or site office/sheds, nor is cement to be mixed or chemicals spilt/disposed of and no stockpiling of soil or rubble within a radius of 2 metres off the common boundary (measured adjacent the centreline of its trunk), with all Site Management Plans needing to acknowledge this requirement.

ADVISORY MATTERS:

- A1 Demolition, building or excavation work must not be commenced until;
- A Construction Certificate has been obtained from Council or an Accredited Certifier
 - Council or an Accredited Certifier has been appointed as the Principal Certifying Authority for the development
 - Council and the Principal Certifying Authority have been given at least 2 days notice (in writing) prior to commencing any works.

Failure to comply with these important requirements is an offence, which renders the responsible person liable to a maximum penalty of \$1.1 million under the *Environmental Planning & Assessment Act 1979*. Alternatively, Council may issue a penalty infringement notice (for up to \$1,500) for each offence.

- A2 A local approval application must be submitted to and be approved by Council's Building Certification Services section prior to commencing any of the following activities on a footpath, road, nature strip or in any public place:-
- Install or erect any site fencing, hoardings or site structures
 - Operate a crane or hoist goods or materials over a footpath or road
 - Placement of a waste skip or any other container or article.

For further information please contact Council's Building Certification Services on 9399 0944.

- A3 Specific details of the location of the building/s should be provided in the Construction Certificate to demonstrate that the proposed building work will not encroach onto the adjoining properties, Council's road reserve or any public place, to the satisfaction of the Certifying Authority.
- A4 This determination does not include an assessment of the proposed works under the Building Code of Australia (BCA) and other relevant Standards. All

new building work (including alterations and additions) must comply with the BCA and relevant Standards and you are advised to liaise with your architect, engineer and building consultant prior to lodgement of your construction certificate.

- A5 The applicant is to advise Council in writing and/or photographs of any signs of existing damage to the Council roadway, footway, or verge prior to the commencement of any building/demolition works.

MOTION: (Nash/Procopiadis) CARRIED UNANIMOUSLY - SEE RESOLUTION.

D24/11 Development Application Report - 1202/95 Brompton Road, Kensington (DA/964/2010)

PL27/11

RESOLUTION: (Andrews/Nash) –

- A. That Council supports the objection under State Environmental Planning Policy No. 1 – Development Standards in respect to non-compliance with Clause 20F(1) of Randwick Local Environmental Plan 1998 (Consolidation), relating to floor space ratio, on the grounds that the proposed development complies with the objectives of the above clause and will not adversely affect the amenity of the adjoining premises and the locality, and that the Department of Planning be advised accordingly.
- B. That Council, as the consent authority, grants development consent under Sections 80 and 80A of the Environmental Planning and Assessment Act 1979, as amended, to Development Application No. 964/2010 for installation of partitions to enclose an existing awning structure at the roof top of a multi-unit residential building and construction of a spiral staircase linking with Unit 1202 below, at 1202/95 Brompton Road, Kensington subject to the following conditions:

CONDITIONS OF CONSENT

Referenced Plans:

1. The development must be implemented substantially in accordance with the following plans:

Plan Number	Dated	Received	Prepared By
05-304-08 Sheet 01	10 March 2009	3 November 2010	Barry Freeman
05-304-08 Sheet 02	10 March 2009	3 November 2010	
05-304-08 Sheet 03	10 March 2009	3 November 2010	
05-304-08 Sheet 04	10 March 2009	3 November 2010	
05-304-08 Sheet 05	10 March 2009	3 November 2010	
Plan showing staircase construction, unnumbered and untitled	Undated	3 November 2010	A B & M Constructions

the application form and any supporting information received with the application, except as may be amended by the following conditions and as may be shown in red on the attached plans:

2. The colours, materials and finishes of the external surfaces to the proposed structures are to be compatible with the existing building.

brochure or sample board) are to be submitted to and approved by the Council /Accredited Certifier prior to a Construction Certificate being issued for the relevant building works.

3. The reflectivity index of glazing used in the development shall not exceed 20%. Details demonstrating compliance shall be incorporated in the Construction Certificate documentation to the satisfaction of the Council/ Accredited Certifier.
4. In accordance with the provisions of the Environmental Planning & Assessment Regulation 2000, a relevant BASIX Certificate and associated documentation must be submitted to the Certifying Authority with the Construction Certificate application for this development.

The required commitments listed and identified in the BASIX Certificate are to be included on the plans, specifications and associated documentation for the proposed development, to the satisfaction of the Certifying Authority.

The design of the building/structures must not be inconsistent with the development consent and any proposed variations to achieve the BASIX commitments may necessitate a new development consent or amendment to the existing consent to be obtained, prior to a construction certificate being issued.

Building regulation & construction conditions

5. The requirements and provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of `on-the-spot` penalty infringements or service of a notice and order by Council.

6. In accordance with section 80 A (11) of the *Environmental Planning & Assessment Act 1979* and clause 98 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the provisions of the Building Code of Australia (BCA). Details of compliance are to be provided in the construction certificate.

7. **Prior to the commencement of any building works, a construction certificate must be obtained from the Council or an accredited certifier**, in accordance with the provisions of the Environmental Planning & Assessment Act 1979 and Environmental Planning & Assessment Regulation 2000.

A copy of the construction certificate, the approved plans and development consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.

8. **Prior to the commencement of any building works**, the person having the benefit of the development consent must:
 - appoint a *Principal Certifying Authority* for the building work, and
 - appoint a *principal contractor* for the building work, and notify the *Principal Certifying Authority* and Council accordingly in writing, and
 - unless the person having the benefit of the consent is the *principal contractor*, notify the *principal contractor* of the required *critical stage inspections* and other inspections to be carried out, as specified by the

Principal Certifying Authority, and

- give at least two days notice to the Council, in writing, of the person's intention to commence building works.
9. The works must be inspected by the *Principal Certifying Authority*, in accordance with sections 109 E (3) of the Environmental Planning & Assessment Act 1979 and clause 162A of the Environmental Planning & Assessment Regulation 2000, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.
10. An Occupation Certificate must be obtained from the Principal Certifying Authority **prior to any occupation or use of the development** encompassed in this development consent (including alterations, additions and 'fit-out' work to existing buildings), in accordance with the relevant provisions of the Environmental Planning & Assessment Act 1979.
11. Where applicable, a *Fire Safety Certificate* must be submitted to Council **prior to the issuing of an Occupation Certificate**, in accordance with the requirements of the *Environmental Planning and Assessment Regulation 2000*.

The *Fire Safety Certificate* must include details of all of the fire safety measures contained in the building and as detailed in the *fire safety schedule* attached to the Construction Certificate.

Prior to issuing any Occupation Certificate the Principal Certifying Authority must be satisfied that all of the relevant fire safety measures have been included and are sufficiently detailed within the *Fire Safety Certificate*. A copy of the *fire safety certificate* must be displayed in the building near the entrance and a copy must be forwarded to the NSW Fire Brigades.

An annual *Fire Safety Statement* is also required to be submitted to the Council and the NSW Fire Brigades, each year after the date of the *Fire Safety Certificate*, in accordance with the *Environmental Planning & Assessment Regulation 2000*.

12. A Certificate of Adequacy prepared by a professional engineer shall be submitted to the certifying authority prior to a construction certificate being issued for the development, certifying the structural adequacy of the existing building to support the proposed works.
13. Any required Long Service Levy payment, under the Building and Construction Industry Long Service Payments Act 1986, is to be forwarded to the Long Service Levy Corporation or the Council, **prior to the issuing of a Construction Certificate**, in accordance with Section 109F of the Environmental Planning & Assessment Act 1979.

At the time of this development consent, Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works.

14. In existing buildings, the following works are to be carried out to ensure minimum levels of fire safety (as applicable):-
- 1) Any new or replacement ceilings walls and floor linings and doorways are required to satisfy the relevant requirements of the Building Code of Australia.
 - 2) Any residential parts of the building must be provided with a smoke

detection and alarm system, in accordance with the relevant provisions of the Building Code of Australia.

Details of the abovementioned items and other building and fire safety works are to be provided in the **construction certificate**.

15. Building, demolition and associated site works must be carried out in accordance with the following requirements:

Activity	Permitted working hours
All building, demolition and site work, including site deliveries (except as detailed below)	<ul style="list-style-type: none"> • Monday to Friday - 7.00am to 5.00pm • Saturday - 8.00am to 5.00pm • Sunday & public holidays - No work permitted
Internal work only within a commercial or industrial development, located in a commercial or industrial zone, which is not audible within any residential dwelling or commercial or industrial premises	<ul style="list-style-type: none"> • Monday to Saturday - No time limits (subject to column 1) • Sunday & public holidays - No work permitted

An application to vary the abovementioned hours may be submitted to Council's Manager Health, Building & Regulatory Services for consideration and approval to vary the specified hours may be granted in exceptional circumstances and for limited occasions (e.g. for public safety, traffic management or road safety reasons). Any applications are to be made on the standard application form and include payment of the relevant fees and supporting information. Applications must be made at least 10 days prior to the date of the proposed work and the prior written approval of Council must be obtained to vary the standard permitted working hours.

16. Public health, safety and convenience must be maintained at all times during demolition and building works and the following requirements must be complied with at all times (as applicable):

- a) Demolition work must be carried out in accordance with Australian Standard, AS2601 (2001) - The Demolition of Structures and a Demolition Work Plan is required to developed and implemented to the satisfaction of the Principal Certifying Authority **prior to commencing any demolition works**.
- b) A sign must be provided and maintained in a prominent position, which contains the following details:
 - name, address, contractor licence number and telephone number of the *principal contractor*, including a telephone number at which the person may be contacted outside working hours, or *owner-builder* permit details (as applicable)
 - name, address and telephone number of the *Principal Certifying Authority*,
 - a statement stating that "unauthorised entry to the work site is prohibited".
- c) The roadway, footpath and nature strip must be maintained in a good, safe condition and free from any obstructions, trip hazards, materials, soils or debris at all times. Any damage caused to the road, footway or nature strip must be repaired immediately, to the satisfaction of Council.
- d) A Road / Asset Opening Permit must be obtained from Council prior to carrying out any works within or upon a road, footpath, nature strip or in

any public place, in accordance with section 138 of the Roads Act 1993 and all of the conditions and requirements contained in the Road / Asset Opening Permit must be complied with.

The owner/builder must ensure that all works within or upon the road reserve, footpath, nature strip or other public place are completed to the satisfaction of Council. For further information, please contact Council's Road / Asset Opening Officer on 9399 0691 or 9399 0999.

- e) Building materials, sand, soil, waste materials, construction equipment or other materials or articles must not be placed upon the footpath, roadway or nature strip at any time and the footpath, nature strip and road must be maintained in a clean condition and free from any obstructions, soil and debris at all times.
- f) Bulk bins, waste containers or other articles must not be located upon the footpath, roadway or nature strip at any time without the prior written approval of the Council. Applications to place a waste container or other articles in a public place can be made to Council's Building Services section.
- g) During demolition and construction, sediment laden stormwater run-off shall be controlled using the sediment control measures outlined in the manual for Managing Urban Stormwater – Soils and Construction, published by Landcom, to the satisfaction of Council.
- h) Public safety must be maintained at all times and public access to any demolition and building works, materials and equipment on the site is to be restricted. If necessary, a temporary safety fence or hoarding is to be provided to protect the public. Temporary site fences are to be structurally adequate, safe and be constructed in a professional manner and the use of poor quality materials or steel reinforcement mesh as fencing is not permissible.

If it is proposed to locate any site fencing, hoardings or items upon any part of the footpath, nature strip or any public place, a Local Approval application must be submitted to and approved by Council's Health, Building & Regulatory Services department beforehand. Details and plans are to be submitted with the application, together with payment of the weekly charge in accordance with Council's adopted Pricing Policy.

- i) Noise and vibration emissions during the construction of the building and associated site works must not result in damage to nearby premises or result in an unreasonable loss of amenity to nearby residents.

The requirements and practices contained in the Protection of the Environment Operations Act 1997 and relevant DECC Construction Noise and Vibration Guidelines are to be satisfied and a Construction Noise and Vibration Management Plan is to be developed and implemented throughout the works to the satisfaction of Council.

ADVISORY

- A1 The assessment of this development application does not include an assessment of the proposed building work under the Building Code of Australia (BCA).

All new building work must comply with the BCA and relevant Australian Standards and details of compliance must be provided in the Construction Certificate application.

- A2 In existing buildings, the levels of fire and occupant safety should be upgraded where necessary and details should be incorporated in the Construction Certificate to the satisfaction of the Certifying authority.

Where the levels of accessibility to existing buildings do not meet current standards, if practicable, the level of accessibility should also be upgraded in conjunction with the proposed development (e.g. via the installation of a 1:8 access ramp within the building) and details included in the construction certificate application.

Building owners, applicants and builders are advised to speak to the appointed Certifying Authority prior to lodgement of the Construction Certificate.

- A3 The applicant/owner is advised to engage the services of a suitably qualified and experienced Acoustic consultant, prior to finalising the design and construction of the development, to ensure that the relevant noise criteria and conditions of consent can be fully satisfied.

MOTION: (Andrews/Nash) CARRIED - SEE RESOLUTION.
