# PROSPECT DRINKING FOUNTAIN

The **Prospect Drinking Fountain** is a unique contemporary design providing comfortable access for persons of all abilities. The marine grade 316 stainless steel frame, electro polish then further hand polished to a mirror finish, offers the highest level of corrosion resistance making it suitable for the most extreme environments. Its features include quality off the shelf fixtures in the vandal resistant bubbler and time delay bottle fill tap, which are readily serviceable, a self-draining & levelling dog bowl and a grate over the drainage outlet. The unit may be configured with any one, or all of these features and is available in a standard optimum height that also conforms to the Australian disabled access standard.
